BRIGHTSPHERE
Investment Group

Q2 2024 EARNINGS PRESENTATION

August 1, 2024

Q2'24 Highlights

BrightSphere Highlights

- U.S. GAAP EPS of $0.29 for Q2'24 compared to $0.27 for Q2'23
- ENI EPS of $0.45 for the quarter compared to $0.28 for Q2'23
- Systematic Credit's U.S. and Global High Yield strategies continued to build good track records and a third strategy, U.S. Investment Grade strategy, was seeded in July 2024
- Continued strong investment performance with 86%, 92% and 93% of strategies by revenue beating their benchmarks over the prior 3-, 5-, and 10-year periods, respectively, as of June 30, 2024
- Total AUM of $112.6 billion as of June 30, 2024, a 2.0% increase from March 31, 2024, driven by market appreciation
- Net flows were flat for Q2'24 compared to $0.1 billion for Q2'23
- Repurchased 0.9 million shares of common stock (2% of total outstanding shares) for an aggregate total of $20.5 million in Q2'24; repurchased 4.4 million shares of common stock (11% of total outstanding shares) for an aggregate total of $94.9 million year to date through Q2'24
- Cash balance of $71.6 million as of June 30, 2024; expect to continue deploying excess capital toward supporting organic growth and share repurchases

Please see Definitions and Additional Notes

U.S. GAAP Statement of Operations

($ in millions, unless otherwise noted)	Three Months Ended			
	June 30, 2024	June 30, 2023	Increase (Decrease)	March 31, 2024

Please see Definitions and Additional Notes

Q2'24 vs. Q2'23

- Total revenue increased 13.2% from Q2'23 primarily due to higher management fees reflecting an increase in average AUM in Q2'24 compared to Q2'23
- Operating expenses increased 16.5% from Q2'23 driven by an increase in compensation and benefits expense due to an increase in the value of the Acadian equity plan liability in Q2'24 and an increase in variable compensation
- Income tax expense increased 1.8% from Q2'23 primarily driven by changes in discrete tax items, partially offset by a decrease in pre-tax income attributable to controlling interests
- U.S. GAAP net income attributable to controlling interests decreased 3.5% from Q2'23 primarily due to an increase in operating expenses
- Diluted earnings per share increased 7.4% from Q2'23 reflecting the positive impact of stock repurchases made year to date through Q2'24 that decreased average diluted shares outstanding

Acadian Financial Highlights

- Net flows were flat with $1.4 million annualized revenue impact for Q2'24 compared to net flows of $0.1 billion with annualized revenue impact of $0.9 million for Q2'23
- AUM increased 12.7% from Q2'23 mainly driven by market appreciation in the last twelve months; AUM increased 2.0% compared to Q1'24 due to the positive market
- Continued strong long-term investment outperformance
- Segment ENI increased 29.4% in Q2'24 compared to Q2'23 due to higher average AUM and management fees; Segment ENI increased 1.0% in Q2'24 compared to Q1'24 due to higher average AUM

(1) As of June 30, 2024, Acadian's assets representing 93% of revenue were outperforming benchmarks on a 1-year basis, compared to 66% at June 30, 2023 and 92% at March 31, 2024.

Acadian Platform Overview

Business Overview

- Leading, at-scale, systematic investment manager with a track record of over 35 years and $112.6 billion in AUM as of June 30, 2024
- Quant-focused investment platform offering unique capabilities in active equities, credit and alternatives; including recently launched multi-strategy hedge fund and systematic credit strategies
- Continued strong investment performance with more than 86%, 92%, and 93% of strategies by revenue outperforming benchmarks over 3-, 5-, and 10-year periods, respectively, as of June 30, 2024
- Diversified offerings across developed and emerging markets; approximately 80% of AUM invested outside the U.S.
- Long-standing relationships with 950+ premier global institutional clients
- Experienced management team with a proven track record

Systematic Investing Capabilities Built On

Economic intuition & insights of a talented, experienced, diverse group of investors:
100+ person investment team | 1600+ years' collective experience
100+ advanced analytical degrees

PEOPLE

DATA

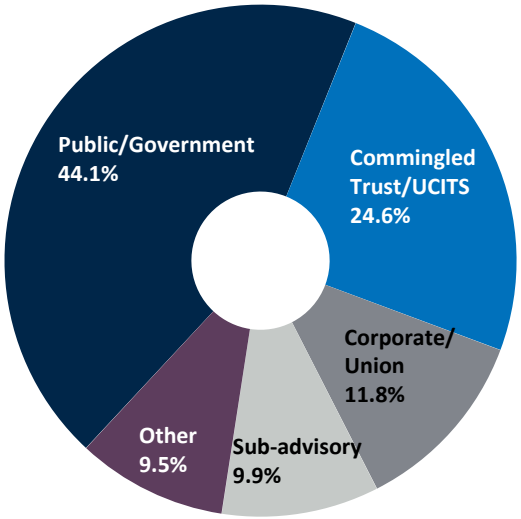
Extensive data repository supplemented by alternative data scouting effort:
450M+ daily observations | 55TB+ data
150+ global markets | 40K+ traded assets

Transforming information into insights:
Robust technological infrastructure
Sophisticated analytical tools & portfolio attribution illuminate trends, relationships, and drivers of alpha

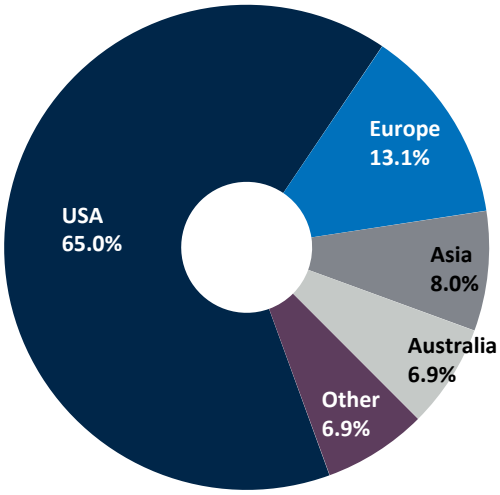
CLARITY

Diversified Asset Base

AUM by Client Type



AUM by Client Location



AUM by Strategy

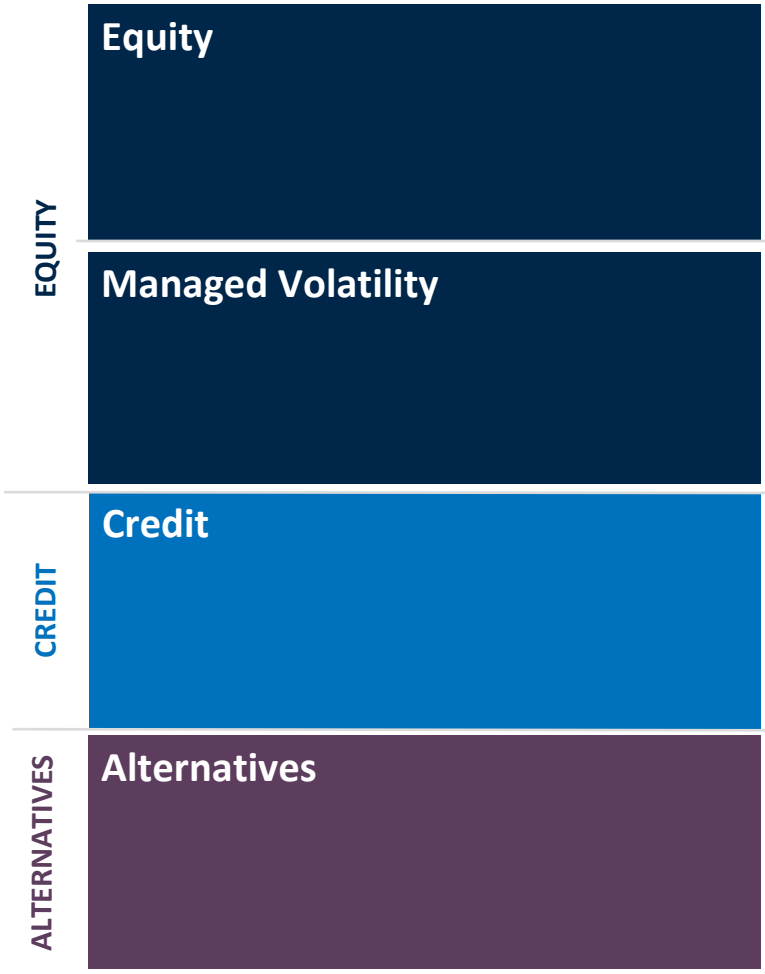
Total: $112.6 billion[(1)]

Please see Definitions and Additional Notes

(1) Data as of June 30, 2024

Systematic Investment Capabilities

Diversified Quant Offerings



Equity strategies apply insights from over 35 years of systematic investing experience combined with the power of data

Global, Emerging Markets, Non-US, Regional

Managed volatility portfolios seek to deliver active returns and lower volatility based on both the mispricing of risk and stock fundamentals

Global Managed Volatility, EM Managed Volatility

Fixed income capabilities systematically investing in corporate bonds seeking to deliver differentiated excess returns (platform in development)

Investment Grade, High Yield

Alternatives capabilities systematically apply new signals, alternative data and portfolio construction techniques

- Also includes Systematic macro capabilities designed to generate absolute returns uncorrelated with major asset classes and regardless of market conditions

Multi-strategy, Equity Long-Short, Market Neutral

Sector Tailwinds Expected to Support Organic Long-term Growth

Secular Trends

- Explosive Growth in Alternative Data
- Continued Development of Advanced Techniques: Machine Learning, AI
- Scale of Investment in Data, Technology, and Talent Increasingly Important
- Growing Demand for Uncorrelated Strategies and Customization

ACADIAN

Anticipated Impact for Acadian

Alpha → Acadian Brand and Barriers to Entry → Organic Growth → Applying Data and Expertise to New Capabilities

Disciplined Execution of Long-Term Growth Strategy

Continue Harnessing our Unique Quant Capabilities

- **Leveraging broad quant capabilities to provide exposures and solutions sought by clients**
  - Ongoing initiatives including Equity Alternatives and Systematic Credit strategies
- **Highly scalable offerings with substantial capacity and global demand**

Additional Growth Levers

- **Product innovation**
  - Extensions of quant investment strategies into high-demand areas supported by ongoing seeding program
- **Distribution enhancements**
  - Expansion of distribution teams including entry into new markets and channels

Drive Shareholder Value

- **Strong free cash flow generated from revenues from a broad array of investment strategies**
- **Continue deploying free cash flow toward supporting organic growth and for share repurchases**
  - Repurchased 0.9 million shares of common stock (2% of total outstanding shares) for an aggregate total of $20.5 million in Q2'24; repurchased 4.4 million shares of common stock (11% of total outstanding shares) for an aggregate total of $94.9 million year to date through Q2'24

ENI Revenue

Commentary

- ENI revenue includes management fees and performance fees
- Q2'24 ENI revenue of $108.3 million increased from Q2'23 by 14%; primarily due to higher management fees driven by higher average AUM
- Management fees increased 14% from Q2'23 reflecting a 13% increase in average AUM driven by market appreciation

ENI Revenue

($M)	Three Months Ended June 30,			Three Months Ended March 31,

ENI revenue	**$ 108.3**	**$ 95.0**	*14%*	**$ 105.3**	*3%*

Please see Definitions and Additional Notes

ENI Operating Expenses

Commentary

- Total ENI operating expenses reflect Acadian and Center operating expenses (excluding variable compensation)
- ENI operating expenses stayed generally flat at $51.5 million in Q2'24 compared to $51.2 million in Q2'23
- Q2'24 Operating Expense Ratio[(1)] fell to 48.8% for the period from 55.2% in Q2'23 reflecting the impact of positive operating leverage
- Full-year Operating Expense Ratio expected to be approximately 46%-50% if the equity market remains at the same level; ratio is subject to fluctuations as AUM and ENI management fees change

Please see Definitions and Additional Notes

(1) Operating Expense Ratio reflects total ENI operating expenses as a percent of management fees.

(2) Represents reported ENI management fee revenue.

ENI Variable Compensation

Commentary

- Variable compensation comprises a contractual percentage of Acadian's ENI earnings before variable compensation and a contractual split of performance fees, which is recognized over the contractual vesting period, awarded to Acadian's employees and additionally includes Center bonuses
  - Acadian variable compensation includes cash and Acadian equity provided through recycling
  - Center variable compensation includes cash and BSIG equity
- Q2'24 Variable Compensation Ratio decreased to 48.2% from 51.8% in Q2'23; ratio decreased driven by higher growth in earnings before variable compensation
- Full-year Variable Compensation Ratio expected to be 46%-50%

ENI Variable Compensation

($M)	Three Months Ended June 30,			Three Months Ended March 31,	
	2024	2023	Increase (Decrease)	2024	Increase (Decrease)
Cash variable compensation	**$ 25.5**	**$ 21.4**	*19%*	**$ 24.9**	*2%*
Add: Non-cash equity-based award amortization	1.9	1.3	*46%*	1.7	*12%*
Variable compensation	**27.4**	**22.7**	*21%*	**26.6**	*3%*
Earnings before variable compensation	**$ 56.8**	**$ 43.8**	*30%*	**$ 55.8**	*2%*
Variable Compensation Ratio (VC as % of earnings before variable comp.)	48.2 %	51.8 %	*(359) bps*	47.7 %	*57 bps*

Please see Definitions and Additional Notes

Affiliate Key Employee Distributions

Commentary

- Represents key employees' share of profit from our Affiliate's earnings
- Full-year Distribution Ratio expected to be 7%-8% if the equity market remains at the same level; mix of core and performance fee profits will impact the ratio

Affiliate Key Employee Distributions

($M)	Three Months Ended June 30, 2024	Three Months Ended June 30, 2023	Increase (Decrease)	Three Months Ended March 31, 2024	Increase (Decrease)

Reconciliations and Disclosures

Reconciliations from U.S. GAAP to Non-GAAP Measures[1]

($ in millions)	Three Months Ended June 30, 2024	June 30, 2023	March 31, 2024
U.S. GAAP net income attributable to controlling interests	**$ 11.0**	**$ 11.4**	**$ 14.6**
Adjustments to reflect the economic earnings of the Company:			
1 Non-cash key employee-owned equity and profit interest revaluations[2]	5.9	(0.7)	4.4
2 Amortization of acquired intangible assets[2]	—	—	—
3 Capital transaction costs[2]	0.1	0.1	0.1
4 Seed/Co-investment (gains) losses and financings[2]	(0.2)	(0.1)	(1.2)
5 Tax benefit of goodwill and acquired intangible deductions	0.4	0.3	0.4
6 Discontinued operations attributable to controlling interests and restructuring [2][3]	1.4	0.2	—
Total adjustment to reflect earnings of the Company	**$ 7.6**	**$ (0.2)**	**$ 3.7**
Tax effect of above adjustments[2]	(2.0)	0.2	(0.9)
7 ENI tax normalization	0.6	0.6	—
Economic net income	**$ 17.2**	**$ 12.0**	**$ 17.4**
ENI net interest expense to third parties	3.5	3.5	3.0
Depreciation and amortization[4]	4.7	4.8	4.9
Tax on Economic Net Income	6.6	4.4	6.6
Adjusted EBITDA	**$ 32.0**	**$ 24.7**	**$ 31.9**

ENI Adjustments

1. Exclude non-cash expenses representing changes in the value of Affiliate equity and profit interests held by Affiliate key employees
2. Exclude non-cash amortization or impairment expenses related to acquired goodwill and other intangibles
3. Exclude capital transaction costs including the costs of raising debt or equity, gains or losses realized as a result of redeeming debt or equity and direct incremental costs associated with acquisitions of businesses or assets
4. Exclude gains/losses on seed capital and co-investments, as well as related financing costs
5. Include cash tax benefits related to tax amortization of acquired intangibles
6. Exclude results of discontinued operations as they are not part of the ongoing business, and restructuring costs incurred in continuing operations
7. Exclude one-off tax benefits or costs unrelated to current operations

Please see Definitions and Additional Notes

(1) For further information and additional reconciliations between U.S. GAAP and non-GAAP measures, see the Company's Quarterly Report on Form 10-Q.

(2) Tax-affected items for which adjustments are included in "Tax effect of above adjustments" line, excluding the discontinued operations component of item 6; taxed at 27.3% U.S. statutory rate (including state tax).

(3) The three months ended June 30, 2024 includes costs associated with the transfer of an insurance policy from our former Parent of $0.4 million, severance-related items at Acadian of $(0.3) million, and costs associated with the wind-down of the Multi-Asset Class Strategies ("MACS") business in the standalone format of $1.3 million. The three months ended June 30, 2023 includes costs associated with the transfer of an insurance policy from our former Parent of $0.2 million. The three months ended March 31, 2024 includes costs associated with the transfer of an insurance policy from our former Parent of $0.2 million, and severance-related items at Acadian of $(0.2) million.

(4) Includes non-cash equity-based award amortization expense.

Reconciliations from U.S. GAAP to Non-GAAP Measures[(1)] (cont.)

Reconciliation of per-share U.S. GAAP Net Income to Economic Net Income per share

(2) The three months ended June 30, 2024 includes costs associated with the transfer of an insurance policy from our former Parent of $0.4 million, severance-related items at Acadian of $(0.3) million and costs associated with the wind-down of the MACS business in the standalone format of $1.3 million. The three months ended June 30, 2023 includes costs associated with the transfer of an insurance policy from our former Parent of $0.2 million. The three months ended March 31, 2024 includes costs associated with the transfer of an insurance policy from our former Parent of $0.2 million, and severance-related items at Acadian of $(0.2) million.

Definitions and Additional Notes

References to "BrightSphere," "BSIG" or the "Company" refer to BrightSphere Investment Group Inc.; references to "BSUS" or the "Center" refer to the holding company excluding our Affiliate. BrightSphere currently operates its business through one asset management firm (the "Affiliate"). The Company's distribution activities are conducted in various jurisdictions through affiliated companies in accordance with local regulatory requirements.

The Company uses a non-GAAP performance measure referred to as economic net income ("ENI") to represent its view of the underlying economic earnings of the business. ENI is used to make resource allocation decisions, determine appropriate levels of investment or dividend payout, manage balance sheet leverage, determine Affiliate variable compensation and equity distributions, and incentivize management. The Company's ENI adjustments to U.S. GAAP include both reclassifications of U.S. GAAP revenue and expense items, as well as adjustments to U.S. GAAP results, primarily to exclude non-cash, non-economic expenses, or to reflect cash benefits not recognized under U.S. GAAP.

The Company re-categorizes certain line items on the income statement to:

- exclude the effect of Fund consolidation by removing the portion of Fund revenues, expenses and investment return which is not attributable to its shareholders.
- include within management fee revenue any fees paid to Affiliates by consolidated Funds.
- include the Company's share of earnings from equity-accounted Affiliates within other income, rather than investment income;
- treat sales-based compensation as a general and administrative expense, rather than part of fixed compensation and benefits; and
- identify separately from operating expenses, variable compensation and Affiliate key employee distributions, which represent Affiliate earnings shared with Affiliate key employees.

The Company also makes the following adjustments to U.S. GAAP results to more closely reflect its economic results by:

i. excluding non-cash expenses representing changes in the value of Affiliate equity and profit interests held by Affiliate key employees. These ownership interests may in certain circumstances be repurchased by BrightSphere at a value based on a pre-determined fixed multiple of trailing earnings and as such this value is carried on the Company's balance sheet as a liability. Non-cash movements in the value of this liability are treated as compensation expense under U.S. GAAP. However, any equity or profit interests repurchased by BrightSphere can be used to fund a portion of future variable compensation awards, resulting in savings in cash variable compensation that offset the negative cash effect of repurchasing the equity.
ii. excluding non-cash amortization or impairment expenses related to acquired goodwill and other intangibles as these are non-cash charges that do not result in an outflow of tangible economic benefits from the business.
iii. excluding capital transaction costs, including the costs of raising debt or equity, gains or losses realized as a result of redeeming debt or equity and direct incremental costs associated with acquisitions of businesses or assets.
iv. excluding seed capital and co-investment gains, losses and related financing costs. The net returns on these investments are considered and presented separately from ENI because ENI is primarily a measure of the Company's earnings from managing client assets, which therefore differs from earnings generated by its investments in Affiliate products, which can be variable from period to period.
v. including cash tax benefits associated with deductions allowed for acquired intangibles and goodwill that may not be recognized or have timing differences compared to U.S. GAAP.
vi. excluding the results of discontinued operations attributable to controlling interests since they are not part of the Company's ongoing business, restructuring costs incurred in continuing operations.
vii. excluding deferred tax resulting from changes in tax law and expiration of statutes, adjustments for uncertain tax positions, deferred tax attributable to intangible assets and other unusual items not related to current operating results to reflect ENI tax normalization.

Definitions and Additional Notes

The Company adjusts its income tax expense to reflect any tax impact of its ENI adjustments.

Adjusted EBITDA
Adjusted EBITDA is defined as economic net income before interest, income taxes, depreciation and amortization. The Company notes that its calculation of Adjusted EBITDA may not be consistent with Adjusted EBITDA as calculated by other companies. The Company believes Adjusted EBITDA is a useful liquidity metric because it indicates the Company's ability to make further investments in its business, service debt and meet working capital requirements. Refer to the reconciliation of U.S. GAAP net income attributable to controlling interests to ENI and Adjusted EBITDA.

Segment ENI
Segment ENI represents ENI for the Company's reportable segment, calculated in accordance with the Company's definition of Economic Net Income, before income tax, interest income and interest expense.

Methodologies for calculating investment performance:

Revenue-weighted investment performance measures the percentage of management fee revenue generated by Affiliate strategies which are beating benchmarks. It calculates each strategy's percentage weight by taking its estimated composite revenue over total composite revenues in each period, then sums the total percentage of revenue for strategies outperforming.

Equal-weighted investment performance measures the percentage of Affiliate scale strategies (defined as strategies with greater than $100 million of AUM) beating benchmarks. Each outperforming strategy over $100 million has the same weight; the calculation sums the number of strategies outperforming relative to the total number of composites over $100 million.

Asset-weighted investment performance measures the percentage of AUM in strategies beating benchmarks. It calculates each strategy's percentage weight by taking its composite AUM over total composite AUM in each period, then sums the total percentage of AUM for strategies outperforming.

ENI operating earnings
ENI operating earnings represents ENI earnings before Affiliate key employee distributions and is calculated as ENI revenue, less ENI operating expense, less ENI variable compensation. It differs from economic net income because it does not include the effects of Affiliate key employee distributions, net interest expense or income tax expense.

ENI operating margin
The ENI operating margin, which is calculated before Affiliate key employee distributions, is used by management and is useful to investors to evaluate the overall operating margin of the business without regard to the Company's various ownership levels at each of the Affiliates. ENI operating margin is a non-GAAP efficiency measure, calculated based on ENI operating earnings divided by ENI revenue. The ENI operating margin is most comparable to the Company's U.S. GAAP operating margin.

ENI management fee revenue
ENI management fee revenue corresponds to U.S. GAAP management fee revenue.

ENI operating expense ratio
The ENI operating expense ratio is used by management and is useful to investors to evaluate the level of operating expense as measured against the Company's recurring management fee revenue. The Company has provided this ratio since many operating expenses, including fixed compensation & benefits and general and administrative expense, are generally linked to the overall size of the business. The Company tracks this ratio as a key measure of scale economies at BrightSphere because in its profit sharing economic model, scale benefits both the Affiliate employees and BrightSphere shareholders.

Definitions and Additional Notes

ENI earnings before variable compensation
ENI earnings before variable compensation is calculated as ENI revenue, less ENI operating expense.

ENI variable compensation ratio
The ENI variable compensation ratio is calculated as variable compensation divided by ENI earnings before variable compensation. It is used by management and is useful to investors to evaluate consolidated variable compensation as measured against the Company's ENI earnings before variable compensation. Variable compensation is usually awarded based on a contractual percentage of our Affiliate's ENI earnings before variable compensation and may be paid in the form of cash or non-cash Affiliate equity or profit interests. Center variable compensation includes cash and BrightSphere equity. Non-cash variable compensation awards typically vest over several years and are recognized as compensation expense over that service period.

ENI Affiliate key employee distribution ratio
The Affiliate key employee distribution ratio is calculated as Affiliate key employee distributions divided by ENI operating earnings. The ENI Affiliate key employee distribution ratio is used by management and is useful to investors to evaluate Affiliate key employee distributions as measured against the Company's ENI operating earnings. Affiliate key employee distributions represent the share of Affiliate profits after variable compensation that is attributable to Affiliate key employee equity and profit interests holders, according to their ownership interests. For Affiliate profit interest distributions, BSUS is entitled to an initial preference over profits after variable compensation, structured such that before a preference threshold is reached, there would be no required key employee distributions, whereas for profits above the threshold the key employee distribution amount would be calculated based on the key employee economic percentages at its consolidated Affiliate.

U.S. GAAP operating margin
U.S. GAAP operating margin equals operating income from continuing operations divided by total revenue.

Consolidated Funds

Financial information presented in accordance with U.S. GAAP may include the results of consolidated pooled investment vehicles, or Funds, managed by the Company's Affiliate, where it has been determined that these entities are controlled by the Company. Financial results which are "attributable to controlling interests" exclude the impact of Funds to the extent it is not attributable to the Company's shareholders.

Annualized revenue impact of net flows
Annualized revenue impact of net flows represents annualized management fees expected to be earned on new accounts and net assets contributed to existing accounts (inflows), less the annualized management fees lost on terminated accounts or net assets withdrawn from existing accounts (outflows), plus revenue impact from reinvested income and distribution. Annualized management fee for client flow is calculated by multiplying the annual gross fee rate for the relevant account with the inflow or the outflow. In addition, reinvested income and distribution for each segment is multiplied by average fee rate for the respective segment to compute the revenue impact.

Reinvested income and distributions
Net flows include reinvested income and distributions made by BrightSphere's Affiliate. Reinvested income and distributions represent investment yield not distributed as cash, and reinvested back to the portfolios.
