Ford's Lisa Drake to Discuss EV Battery Technology at Jefferies Industrials Conference 2025

DEARBORN, Mich., Aug. 19, 2025 – Ford Vice President, Tech Programs and EV Systems Lisa Drake will participate in the Jefferies Industrials Conference 2025 on Thursday, Sep. 4, 2025, in New York City.

Drake will join global autos analyst Philippe Houchois for a fireside chat at 7:30 a.m. ET to share insights on Ford's strategic advantages related to electric vehicle battery breakthrough innovation and assets. Drake will discuss how Ford continues to improve capital efficiency and maximize the utilization of its assets in line with remaking Ford into a higher growth, higher margin, more capital efficient and more durable company.

The webcast and, after the event, a transcript will be available at shareholder.ford.com.

About Ford Motor Company

Ford Motor Company (NYSE: F) is a global company based in Dearborn, Michigan, committed to helping build a better world, where every person is free to move and pursue their dreams. The company's Ford+ plan for growth and value creation combines existing strengths, new capabilities and always-on relationships with customers to enrich experiences for customers and deepen their loyalty. Ford develops and delivers innovative, must-have Ford trucks, sport utility vehicles, commercial vans and cars and Lincoln luxury vehicles, along with connected services. The company offers freedom of choice through three customer-centered business segments: Ford Blue, engineering iconic gas-powered and hybrid vehicles; Ford Model e, inventing breakthrough EVs along with embedded software that defines always-on digital experiences for all customers; and Ford Pro, helping commercial customers transform and expand their businesses with vehicles and services tailored to their needs. Additionally, Ford provides financial services through Ford Motor Credit Company. Ford employs about 169,000 people worldwide. More information about the company and its products and services is available at corporate.ford.com
