

ROCCAT Expands Award-Winning Vulcan PC Gaming Keyboard Series With New Vulcan Pro Model Featuring the Brand's Fan-Favorite Tactile Mechanical Switch Feeling

2021-03-29

Vulcan Pro Optical-Tactile Gaming Keyboard is up to 100x Faster and Offers Double the Lifespan of Standard Mechanical Keyboards

SAN DIEGO, March 29, 2021 /PRNewswire/ — **ROCCAT®**, Turtle Beach Corporation's (Nasdaq: HEAR) Hamburg, Germany-based PC peripheral brand, today unveiled the new **Vulcan Pro Optical-Tactile RGB Gaming Keyboard** as the latest addition to its award-winning line of **Vulcan** keyboards. The new Vulcan Pro Optical-Tactile variant combines the ridiculously fast speed of ROCCAT's groundbreaking Titan Optical Switch technology with the brand's fan-favorite Tactile mechanical switch feeling. The combination provides gamers with unrivaled speed and precision as the Titan Optical Switch registers response rates up to 100 times faster than conventional mechanical switches, plus double the lifespan. ROCCAT's Vulcan Pro Optical-Tactile RGB Gaming Keyboard is available at participating retailers in the U.S. for a MSRP of \$199.99 and will be available in select regions across the EU later this year.

"Now serious PC gamers have two very fast optical switch options – Tactile or Linear – for the Vulcan Pro, which is our fastest keyboard yet," said René Korte, ROCCAT Founder and General Manager of PC Products at Turtle Beach. "Some PC gamers love the smooth ease of our Speed switches, while others prefer a bit more feedback which is where the Tactile switches come into play. Whatever your preference, the Vulcan Pro keyboards feel great, look beautiful on your desktop with their **AIMO** RGB lighting, and offer a true advantage by being faster than the competition."

Following last fall's debut of ROCCAT's Titan Optical Switch technology which launched in the **Vulcan Pro Optical-Linear** and **Vulcan TKL Pro** (recent recipient of a **5/5 Star Review + Platinum Award from T3**), ROCCAT now introduces the Tactile variant of its acclaimed switch, in Optical form. ROCCAT's Titan Optical-Tactile switch has a 1.8mm actuation point, making it perfect for gaming and typing. Beyond being one of the fastest gaming keyboards available, the full-size Vulcan Pro Optical-Tactile RGB Gaming Keyboard also has a 100 million keystroke lifecycle that's double the lifespan of keyboards with standard mechanical switches. It also includes a magnetically detachable palm rest and mixer-style audio controls. The ergonomic design combines ROCCAT's renowned build quality with an ultra-low-profile, tailored to maximize comfort and eliminate wrist strain. The Vulcan Pro Optical RGB Gaming Keyboard comes with a premium braided cable and AIMO intelligent RGB lighting capabilities so it can be synchronized with other AIMO enabled devices.
