“Both gamer and critic response to our Recon and REACT-R controllers has been

unquestionably bullish, and the Cloud Controller gives Xbox and mobile gamers the same award-winning Turtle Beach controls for both the worlds they love to play in,” said Juergen Stark, Chairman and CEO, Turtle Beach Corporation. “While the Recon Cloud is the first of our expanded lineup of mobile controllers launching this year, we have additional new products designed for iOS and other platforms coming soon.”

The Recon Cloud Hybrid Controller combines the best of both worlds for mobile gamers on Xbox and PC. Gamers can play longer and in total comfort thanks to the Recon Cloud's ergonomic shape and cooling grips. The Recon Cloud's adjustable phone clip securely mounts all compatible Android phones – nearly any sized phone, even in its case – above the controller. When the Recon Cloud's phone clip is detached, it can be used as a convenient tabletop stand.

Of course, it wouldn't be a Turtle Beach controller without the best-selling gaming headset brand's exclusive signature audio features. When the Recon Cloud is connected to Xbox Series X|S, Xbox One, and Windows PCs in wired mode, additional features including Superhuman Hearing to hear enemy players before they see you, EQ Presets to personalize sound, controls for Game & Chat Balance to find just the right mix, and Mic Monitoring to ensure no more yelling at others – all come into play.

The complete list of Recon Cloud Controller features includes:

- **Designed for Xbox & Cloud Gaming:** Equipped with a detachable 10ft./3m braided cable for using in wired mode with Xbox Series X|S, Xbox One & Windows PCs, or flip the input switch to play wirelessly on Android 8.0+ devices and Windows PCs.
