### About Grab

Grab is Southeast Asia's leading superapp based on GMV in 2020 in the food deliveries, mobility and the e-wallets segment of financial services, according to Euromonitor. Grab operates across the deliveries, mobility and digital financial services sectors in over 400 cities in eight countries in the Southeast Asia region. Grab enables millions of people each day to access its driver- and merchant-partners to order food or groceries, send packages, hail a ride or taxi, pay for online purchases or access services such as lending, insurance, wealth management and telemedicine, all through a single "everyday everything" app. Grab was founded in 2012 with the mission to drive Southeast Asia forward by creating economic empowerment for everyone, and since then, the Grab app has been downloaded onto millions of mobile devices. Grab strives to serve a double bottom line: to simultaneously deliver financial performance for its shareholders and a positive social impact in Southeast Asia.

On April 13, Grab announced that it intends to go public in the U.S. via a merger with Altimeter Growth Corp. (Nasdaq: "AGC"). Upon closing of the merger, the combined company expects its securities to be traded on NASDAQ under the symbol "GRAB".
