# Agrinos India Achieves First Place In “Sustainable Agriculture Awards” 2022

2022-12-05

**Agrinos India**, an American Vanguard Company, is pleased to announce it has received a prestigious first place award from the Federation of Indian Chambers of Commerce and Industry (FICCI) in the category of Innovative Product/Technology/Services Promoting Sustainable Agriculture Development.

This is the second edition of the FICCI “**Sustainable Agriculture Awards**,” the objective of which is to recognize and showcase programs that promote sustainable agriculture development and those that focus on improving farmers’ income. **FICCI** is the largest and oldest apex business organization in India and the “voice of India’s business and industry.”

“Winning this award by securing first position is indeed a great honor for all of us at Agrinos India,” said Rajagopal Selvasundaram, Vice President, Agrinos India. “We’re pleased to be recognized for doing our part to help ensure Indian farmers continue to grow more sustainably as well as more profitably.”

The Agrinos line of biologicals available for Indian farmers includes **HYT® MC**, which is produced by a proprietary fermentation process of naturally occurring soil-borne microbes and creates an enhanced crop nutritional environment; **HYT® LB**, a unique foliar nutrient solution that increases the activity of important metabolic and photosynthetic pathways in the crop; **HYT® C**, a nutrient-rich powder derived from organic, biologically extracted chitin and other crucial ingredients that improve plant nutrition; and **HYT® M**, which is an arbuscular mycorrhizal fungi (AMF) product using exceptional gel technology with a concentration of endomycorrhiza spores within the formulation; it is offered widely to farmers in India, greatly increasing crop nutrient and water absorption by extending the root system through mycelial growth and helping to alleviate environmental stress to the crop.

## About Agrinos India

The biological platform of Agrinos®, an American Vanguard Company, works in conjunction with other nutritional crop inputs to increase crop yield, improve soil health, and reduce the environmental footprint of traditional agricultural practices. [in.Agrinos.com](https://in.Agrinos.com)
