## Balance Sheet and Liquidity

The Company's primary sources of liquidity are cash flow from operating activities, cash and cash equivalents, and its revolving credit facility. Cash flow from operations was reported at \$17.4 million. After adjusting for the \$19.0 million decrease in the payroll accrual, cash flow from operations was \$36.4 million. As of the end of the fourth quarter, the Company had cash and marketable securities of \$203.9 million and an unutilized \$300.0 million credit facility.

## Share Repurchases

The Company announced the completion of its \$50.0 million, 12-month share repurchase plan, five months ahead of schedule. Those share repurchases included \$19.6 million of buybacks during the fourth quarter, which contributed to the Company's \$61.6 million of share repurchases in 2025. In February 2026, the Board of Directors authorized the repurchase of up to 10.0 million outstanding shares of common stock. In conjunction with that authorization, the Company announced that it plans to further accelerate the pace of its share buybacks, and over the next 12-months, intends to repurchase \$75.0 million of its common stock.

Mr. Wahl stated, "Over the past few years, we have continued to strengthen our balance sheet and expect strong cash flow generation over the next 12 months and beyond. We have demonstrated a prudent and balanced approach to capital allocation, including first and foremost investing in our growth initiatives. The current valuation of our shares, relative to our long-term growth potential, presents a compelling opportunity to return meaningful capital to shareholders through the buyback."
