

AGNICO EAGLE

Second Quarter 2026 Results

July 30, 2026

Forward-Looking Statements

The information in this presentation has been prepared as at July 29, 2026. Certain statements contained in this presentation constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" under the provisions of Canadian provincial securities laws and are referred to herein as "forward-looking statements". All statements, other than statements of historical fact, that address circumstances, events, activities or developments that could, or may or will occur are forward-looking statements. When used in this presentation, the words "achieve", "aim", "anticipate", "commit", "could", "envisions", "estimate", "expect", "forecast", "future", "guide", "objective", "plan", "potential", "schedule", "target", "track", "will", and similar expressions are intended to identify forward-looking statements. Such statements include the Company's forward-looking guidance, including metal production, estimated ore grades, recovery rates, project timelines, drilling targets or results, life of mine estimates, total cash costs per ounce, AISC per ounce, other expenses and cash flows; the potential for additional gold production at the Company's sites, including the potential to increase annual gold production by 20% to 30% over the next decade, exceeding four million ounces by the 2030s; the estimated timing and conclusions of the Company's studies and evaluations; the methods by which ore will be extracted or processed; the Company's plans at Detour Lake underground, Upper Beaver, Odyssey, Hope Bay and San Nicolás, including the approval, timing, funding, completion and commissioning thereof and the commencement of production therefrom; statements concerning the Company's "fill-the-mill" strategy at Canadian Malartic; statements regarding the rock mass movement at the Barnat open pit's effect on production; statements regarding the remediation plan and redesign at the Barnat open pit; statements regarding the effect of the rock mass movement on the development or production outlook at the Odyssey mine or change to the Company's pathway to increase annual production at Canadian Malartic; the Company's plans to reduce dilution associated with the acquisition of Rupert; statements concerning other expansion projects, recovery rates, mill throughput, optimization efforts and projected exploration, including costs and other estimates upon which such projections are based; timing and amounts of capital expenditures, other expenditures and other cash needs, and expectations as to the funding thereof; estimates of future mineral reserves, mineral resources, mineral production and sales; the projected development of certain ore deposits, including estimates of exploration, development, production, closure and other capital expenditures and estimates of the timing of such exploration, development, production and closure or decisions with respect to such exploration, development, production and closure; estimates of mineral reserves and mineral resources and the effect of drill results and studies on future mineral reserves and mineral resources; the Company's ability to obtain the necessary permits and authorizations in connection with its proposed or current exploration, development and mining operations, and the anticipated timing or submission or receipt thereof; future exploration; the anticipated timing of events with respect to the Company's mine sites; the Company's plans and strategies with respect to sustainability initiatives; the sufficiency of the Company's cash resources; the Company's plans with respect to hedging and the effectiveness of its hedging strategies and the economic impact thereof; future activity with respect to the Company's unsecured revolving bank credit facility and other indebtedness; future dividend amounts, record dates and payment dates; statements regarding potential payments under the CVRs; the effect of tariffs, trade restrictions and the effect of geopolitical events on the Company, whether through availability of inputs or inflation; plans with respect to activity under the NCIB and the renewal thereof, including the anticipated increase in the purchase limit; and anticipated trends with respect to the Company's operations, exploration and the funding thereof. Such statements reflect the Company's views as at the date of this presentation and are subject to certain risks, uncertainties and assumptions, and undue reliance should not be placed on such statements. Forward-looking statements are necessarily based upon a number of factors and assumptions that, while considered reasonable by Agnico Eagle as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The material factors and assumptions used in the preparation of the forward-looking statements contained herein, which may prove to be incorrect, include, but are not limited to, the assumptions set forth herein and in management's discussion and analysis for the year ended December 31, 2025 (the "2025 MD&A") and the Company's Annual Information Form (the "AIF") for the year ended December 31, 2025 filed with Canadian securities regulators and that are included in its Annual Report on Form 40-F for the year ended December 31, 2025 (the "Form 40-F") filed with the U.S. Securities and Exchange Commission (the "SEC") as well as: that there are no significant disruptions affecting operations; that production, permitting, development, expansion and the ramp-up of operations at each of Agnico Eagle's properties proceeds on a basis consistent with current expectations and plans; that the Company's plans for its mining operations are not changed or amended in a material way; that the relevant metal prices, foreign exchange rates and prices for key mining and construction inputs (including labour and electricity) will be consistent with Agnico Eagle's expectations; that the effect of tariffs or trade disputes will not materially affect the price or availability of the inputs the Company uses at its operations; that Agnico Eagle's current estimates of mineral reserves, mineral resources, mineral grades and metal recovery are accurate; that there are no material delays in the timing for completion of ongoing growth projects; that seismic activity at the Company's operations at LaRonde, Goldex, Fosterville and other properties is as expected by the Company and that the Company's efforts to mitigate its effect on mining operations, including with respect to community relations, are successful; that the Company's current plans to address climate change and reduce greenhouse gas emissions are successful; that the Company's current plans to optimize production are successful; that there are no material variations in the current tax and regulatory environment; that governments, the Company or others do not take measures in response to pandemics or other health emergencies or otherwise that, individually or in the aggregate, materially affect the Company's ability to operate its business or its productivity; and that measures taken relating to, or other effects of, pandemics or other health emergencies do not affect the Company's ability to obtain necessary supplies and deliver them to its mine sites. Many factors, known and unknown, could cause the actual results to be materially different from those expressed or implied by such forward-looking statements. Such risks include, but are not limited to: the volatility of prices of gold and other metals; uncertainty of mineral reserves, mineral resources, mineral grades and mineral recovery estimates; uncertainty of future production, project development, capital expenditures and other costs; foreign exchange rate fluctuations; inflationary pressures; financing of additional capital requirements; cost of exploration and development programs; seismic activity at the Company's operations, including at LaRonde, Goldex and Fosterville; mining risks; community protests, including by Indigenous groups; risks associated with foreign operations; risks associated with joint ventures; governmental and environmental regulation; the volatility of the Company's stock price; risks associated with the Company's currency, fuel and by-product metal derivative strategies; the current interest rate environment; the potential for major economies to encounter a slowdown in economic activity or a recession; the potential for increased conflict or hostilities in various regions, including Europe, South America and the Middle East; and the extent and manner of communicable diseases or outbreaks, and measures taken by governments, the Company or others to attempt to mitigate the spread thereof may directly or indirectly affect the Company. For a more detailed discussion of such risks and other factors that may affect the Company's ability to achieve the expectations set forth in the forward-looking statements contained in this presentation, see the AIF and 2025 MD&A filed on SEDAR+ at www.sedarplus.ca and included in the Form 40-F filed on EDGAR at www.sec.gov, as well as the Company's other filings with the Canadian securities regulators and the SEC. Other than as required by law, the Company does not intend, and does not assume any obligation, to update these forward-looking statements.

About this Presentation

Unless otherwise stated, references to "Canadian Malartic", "Goldex", "LaRonde" and "Meadowbank" are to the Company's operations at the Canadian Malartic complex, the Goldex complex, the LaRonde complex and the Meadowbank complex, respectively. The Canadian Malartic complex consists of the mining, milling and processing operations at the Canadian Malartic mine and the mining operations at the Odyssey mine. The Goldex complex consists of the mining, milling and processing operations at the Goldex mine and the mining operations at the Akasaba West open pit mine. The LaRonde complex consists of the mining, milling and processing operations at the LaRonde mine and the mining operations at the LaRonde Zone 5 mine. The Meadowbank complex consists of the milling and processing operations at the Meadowbank mine and the mining operations at the Amaruq open pit and underground mines. References to other operations are to the relevant mines, projects or properties, as applicable.

Further Information – For further details on Agnico Eagle's second quarter 2026 results, see the Company's news release dated July 29, 2026.

Note Regarding Currency – All amounts expressed in U.S. dollars unless otherwise noted.

Front Cover – Agnico Eagle's Detour Lake operations located in Ontario, Canada, taken in the second quarter of 2026.

Q2 2026 Highlights – High-Quality, Consistent, Resilient Business

1

Solid Production and Cost Control Drive Strong Financial Results

- Strong operational performance led by Detour Lake, Kittila and Fosterville
- Production remains towards low-end of guidance range
- Continued focus on safe production, productivity initiatives and cost discipline

2

Record Free Cash Flow Supports Strong Shareholder Returns

- Record free cash flow¹ of \$1.3B driven by strong operational performance
- Record shareholder returns of ~\$625 million*
- Targeting to return ~40% of annual free cash flow to shareholders*

3

Building the Foundations of Our Future Growth

- Advancing 5 key value driver projects, including approval of development at Hope Bay
- Positive exploration results at key value driver projects
- Acquisition of Finland properties completed

Production Tracking Towards Low-End of 2026 Guidance Range

Full Year Guidance

- Total Cash Costs¹ \$1,020 - \$1,120/oz
- AISC¹ \$1,400 - \$1,550/oz

* Through the dividend and NCIB

¹ These are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in this presentation

² Gold production excludes gold ounces from La India and Creston Mascota which were produced from residual leaching, see Notes to Investors Regarding Certain Measures of Performance in the appendix

Financial Highlights – Record Free Cash Flow Reflects Continued Focus On Cost Discipline

	Q2 2026	Q2 2025	Q2 YTD 2026	Q2 YTD 2025
Realized Gold Price ¹ (\$/oz)	\$4,483	\$3,288	\$4,672	\$3,090
Gold Production ² (koz)	856	866	1,681	1,740
Production Costs (\$/oz)	\$1,114	\$911	\$1,136	\$895
Total Cash Costs ^{3,4} (\$/oz)	\$1,054	\$925	\$1,073	\$910
AISC ^{3,4} (\$/oz)	\$1,459	\$1,281	\$1,471	\$1,227
<i>(in millions)</i>				
Net Income	\$1,600	\$1,069	\$3,296	\$1,883
Adjusted Net Income ³	\$1,541	\$976	\$3,246	\$1,746
Adjusted EBITDA ³	\$2,738	\$1,914	\$5,748	\$3,504
Cash Provided by Operating Activities	\$2,144	\$1,845	\$3,490	\$2,890
Capital Expenditures ^{3,5}	\$801	\$538	\$1,375	\$957
Free Cash Flow ³	\$1,335	\$1,305	\$2,067	\$1,899
<i>(basic shares outstanding)</i>				
Net Income per share	\$3.19	\$2.13	\$6.58	\$3.75
Adjusted Net Income per share ³	\$3.07	\$1.94	\$6.48	\$3.47
Operating Cash Flow per share ³	\$4.27	\$3.67	\$6.97	\$5.75

¹ Realized gold price is calculated as gold revenues from mining operations divided by the number of ounces sold

² Gold production excludes gold ounces from La India and Creston Mascota which were produced from residual leaching, see Notes to Investors Regarding Certain Measures of Performance in the appendix

³ These are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in the appendix

⁴ Total cash costs per ounce and AISC per ounce for each period of 2025 have been restated using the Company's revised composition for periods commencing on or after January 1, 2026. Using the Company's composition of this measure for periods ending on or prior to December 31, 2025, total cash costs per ounce were \$933, \$918, \$994 and \$1,089 for Q2, Q2 YTD, Q3 and Q4 2025, respectively, and AISC per ounce were \$1,289 and \$1,235 for Q2 and Q2 YTD, respectively.

⁵ Includes capitalized exploration

Disciplined Approach to Capital Allocation

Shareholder Returns

- Targeting to return 40% of annual free cash flow to shareholders
- Dividend
 - Dividends paid since 1983
 - Quarterly dividend of \$0.45 per share declared
- Share Buyback
 - Total share repurchases of \$400M in Q2 2026
 - Renewed the NCIB in May 2026 on substantially the same terms, with an increased internal purchase limit of \$2B

Strengthening the Balance Sheet

- Net cash¹ position increased to ~\$3.3B at the end of Q2 2026
- Fitch Ratings upgraded the Company's long-term issuer default rating from BBB+ to A- in April 2026

Reinvestment in the Business

- Investing in production growth at 5 key value driver projects

**Cumulative returns to shareholders (1983 to Q2 2026):
~\$6.6 billion²**

¹ This is a non-GAAP measure, see Notes to Investors Regarding Certain Measures of Performance in the appendix

² Calculated as \$5.3B cumulative dividends declared since 1983 plus \$1.3B cumulative shares repurchased under the NCIB since 2022

H1 2026 Operating Cash Flow Allocation*

* Chart segments are indicative only

**Returned 48% of free cash flow⁴ to shareholders
in H1 2026 through dividends and share buybacks**

³ Includes growth capital and strategic investments

⁴ Free cash flow is calculated including the effect of changes in non-cash working capital balances; excluding the effect of changes in non-cash working capital balances equates to a return of 34%

Operational Highlights – Quebec, Nunavut, Finland

Q2 2026 Results

- Strong production led by Kittila, partially offset by lower mill throughput and grades at Meadowbank and lower throughput at Canadian Malartic
- Production at Meliadine, Goldex and LaRonde in line with plan
- Record quarterly mill throughput achieved at Kittila and Meliadine

Optimization Initiatives

- Acquisition of Finland properties completed, with integration in progress
- Implementation of autonomous trucking at LZ5 drives 65% increase over H1 2026 in hauled tonnes during fully automated shifts
- Underground fleet management system – Hardware installation on LZ5 haulage fleet largely completed

Region	Q2 2026				Q2 YTD 2026			
	Gold Prod. (koz)	Prod. Costs (\$/oz)	TCC ¹ (\$/oz)	Op. Margin ¹ (\$M)	Gold Prod. (koz)	Prod. Costs (\$/oz)	TCC ¹ (\$/oz)	Op. Margin ¹ (\$M)
Quebec	245	\$1,139	\$1,096	\$831	523	\$1,029	\$1,044	\$1,896
Nunavut	198	\$1,376	\$1,121	\$673	405	\$1,355	\$1,119	\$1,367
Finland	62	\$1,091	\$1,133	\$196	110	\$1,227	\$1,212	\$380

¹“TCC” represents Total Cast Costs and “Op. Margin” represents Operating Margin; these are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in the appendix

Pipeline Projects – Building Foundations for Decades of Production

Canadian Malartic

Pathway to 1Moz Annual Producer

- Advancing development and infrastructure at East Gouldie
 - Extraction of first 2 stopes via ramp in H1 2026
 - First production via shaft expected in Q2 2027
- Exploration drilling yields positive results at Odyssey and Marban, extending mineralization envelope

Hope Bay

The Next Multi-Decade Producer in Nunavut

- Anticipated annual production of 400 – 435 koz¹
- Initial 11-year mine life beginning 2030
- PEA completed and construction approved in May 2026, supported by ~62% detailed engineering completed
- Significant exploration upside potential

¹ The forecast parameters were based on internal evaluations which are preliminary in nature and include inferred mineral resources, see Notes to Investors Regarding Certain Project Evaluations in the appendix

Positioning Finland Platform for Future Growth

Building a 500koz/yr Platform

- Ability to leverage over 20 years of operating experience and relationships in the region
- Kittilä – Long-life asset with significant upside
 - Ongoing operational excellence initiatives
 - Deposit remains open at depth and along strike
- Consolidated prospective land package (~2,500km²)
- Commenced exploration drilling at Ikkari, targeting an updated evaluation for unrestricted project by YE 2027

Operational Highlights – Ontario, Australia, Mexico

Q2 2026 Results

- Strong production led by Detour Lake and Fosterville
- Record quarterly tonnes extracted from open pit at Detour Lake, combined with record tonnes of ore milled per day of 80,275
- Record mill throughput achieved at Macassa for second consecutive quarter

Optimization Initiatives

- Continue to strengthen mine-to-mill alignment at Detour Lake through deployment of an Integrated Operations Centre
- Fosterville development optimization project drives year-over-year increase in development rates, supporting planned increase in mining rate

Region	Q2 2026				Q2 YTD 2026			
	Gold Prod. (koz)	Prod. Costs (\$/oz)	TCC ¹ (\$/oz)	Op. Margin ¹ (\$M)	Gold Prod. (koz)	Prod. Costs (\$/oz)	TCC ¹ (\$/oz)	Op. Margin ¹ (\$M)
Ontario	287	\$779	\$885	\$943	520	\$894	\$955	\$1,953
Australia	42	\$1,230	\$1,114	\$156	83	\$1,165	\$1,118	\$291
Mexico ²	21	\$2,796	\$1,873	\$50	39	\$3,231	\$2,073	\$106

¹ "TCC" represents Total Cast Costs and "Op. Margin" represents Operating Margin; these are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in the appendix

² Excludes gold ounces from La India and Creston Mascota which were produced from residual leaching, see Notes to Investors Regarding Certain Measures of Performance in the appendix

Pipeline Projects – Advancing Next Phase of Growth

Detour Lake

Pathway to 1Moz Annual Producer

- Advancing exploration ramp and overburden excavation of conveyor-ramp portal
- High-intensity drilling program in West Pit zone near the exploration ramp yielding positive results
- Drilling further defined high-grade domains and West Extension zone

Upper Beaver

Annual Producer with 200koz+ in Kirkland Lake Camp

- Development of exploration ramp and exploration shaft continues to advance
- High-intensity drilling program targeting zone at 500-600m depth completed

San Nicolás

50% Joint Venture with Teck Resources

- Cu-Zn-Ag-Au deposit located in Zacatecas, Mexico
- Land use change (ETJ) and environmental impact assessment (MIA-R) permits received
- Continued to advance the project engineering and execution strategy

Odyssey – Growing a World-Class Asset

- **East Gouldie deposit** – Drilling continues to yield positive results in the upper eastern and deeper areas of the East Gouldie deposit
- **Odyssey North** – Conversion drilling encountered significant mineralization in the lower portion of the porphyry in the newly identified Artemis zone within the internal zones

Highlight Intercepts

- East Gouldie – 5.1 g/t gold over 14.3m at 916m depth
- East Gouldie – 3.8 g/t gold over 19.2m (core length) at 1,951m depth
- Odyssey internal zone – 13.7 g/t gold over 14.6m (core length) at 1,078m depth

Detour Lake – Canada's Largest Gold Mine with Room to Grow

- **West Pit zone** – Continued high-intensity drilling program from surface to test the proposed underground bulk sample area near the planned exploration ramp, to validate the continuity of mineralization and improve the accuracy of the geological model
- **West Extension zone** – Drilling continued ~1.0 km and ~2.3 km west of the resource-pit outline to extend the underground mineral potential to the west

Highlight Intercepts

- West Pit zone – 2.5 g/t gold over 62.3m at 275m depth
- West Pit zone – 4.5 g/t gold over 15.3m at 229m depth
- West Extension zone – 13.5 g/t gold over 2.5m at 564m depth
- West Extension zone – 20.8 g/t gold over 4.8m at 836m depth

Hope Bay – Continued Exploration Success at Madrid; Drilling Starts at Boston

- **Patch 7** – Drilling continued to convert and expand several mineralized areas open laterally and at depth beyond current mineral resources
- **Suluk** – Positive drilling results demonstrate the potential for additional mineral resource expansion at shallow depths near planned infrastructure
- **Boston** – Commenced drilling at Boston, located ~50 kilometres south of the Madrid deposit; first exploration drill program since project acquisition in 2021

Highlight Intercepts

- Patch 7 – 18.5 g/t gold over 11.3m at 328m depth
- Patch 7 – 15.2 g/t gold over 15.6m at 710m depth
- Patch 7 – 31.6 g/t gold over 3.8m at 852m depth
- Suluk – 6.7 g/t gold over 8.9m at 129m depth

High-Quality Business Generating Strong Returns

Low-Risk Mining Jurisdictions

- Multi-mine, multi-decade geologic potential
- Multi-decade political stability
- Regional focus maintaining a manageable business

Highest Quality Senior Gold Producer

- High sustainability standards with multi-decade investment horizon
- Disciplined capital investments based on technical and regional knowledge
- Creating value through the drill bit and technical expertise

Strategic Regional Focus

- High-quality project pipeline in core operating regions with unique potential to leverage existing assets
- Competitive advantage from over 60 years of operations in Canada
- Unique mining expertise in Nunavut

Strong Financial Returns

- Emphasis on per share value creation
- Strong financial position to fund growth projects, strengthen balance sheet and return capital to shareholders
- 43 consecutive years of dividend payments

Appendix

Hope Bay – Gold Mineral Reserves and Mineral Resources (May 19, 2026)*

Mineral Reserves as at May 19, 2026					
Operation		Proven & Probable			
Gold	Mining Method**	000 Tonnes	g/t	000 Oz Au	Metallurgical Recovery (%)
Hope Bay	U/G	—	—	—	—

Mineral Resources as at May 19, 2026													
Operation		Measured			Indicated			Measured & Indicated			Inferred		
Gold	Mining Method**	000 Tonnes	g/t	000 Oz Au	000 Tonnes	g/t	000 Oz Au	000 Tonnes	g/t	000 Oz Au	000 Tonnes	g/t	000 Oz Au
Hope Bay	U/G	93	6.77	20	31,880	5.63	5,771	31,972	5.63	5,791	17,334	5.97	3,326

* See AEM May 19, 2026 news release for further details on the 2026 Hope Bay update and mineral reserves and mineral resources as at May 19, 2026

** Underground ("U/G")

The Hope Bay mineral resources as at May 19, 2026, are reported at cut-off grade varying between 3.20 and 3.26 g/t gold. The gold price used in the calculation of the cut-off grade is \$2,000 per ounce and the C\$/US\$ exchange rate is 1.34. Underground measured and indicated mineral resources are reported within mineable shapes and include internal and external dilution. Inferred mineral resources are reported within mineable shapes and include internal dilution. No mining recovery is applied.

Mineral reserve and mineral resource estimates for Hope Bay have been approved by Dyane Duquette, P.Geo., Vice-President, Mineral Resources Management, who is a "Qualified Person" for the purposes of NI 43-101.

Notes to Investors Regarding Certain Project Evaluations

The forecast parameters surrounding certain projects, including Detour Lake underground, Upper Beaver, Hope Bay and the "fill-the-mill" strategy at Canadian Malartic (Odyssey Shaft #1, Odyssey Shaft #2, Marban, Wasamac), were based on internal evaluations, which are preliminary in nature and include inferred mineral resources that are too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves and there is no certainty that the forecast production amounts will be realized.

The basis for the internal evaluations and the qualifications and assumptions made by the qualified persons who undertook the internal evaluations are set out in this presentation and the news releases dated June 29, 2024 for Detour Lake underground, dated July 31, 2024 for Upper Beaver and dated May 19, 2026 for Hope Bay. The results of the internal evaluations had no impact on the results of any pre-feasibility or feasibility study. An updated internal evaluation is expected for the "fill-the-mill" strategy at Canadian Malartic, for Detour Lake and Upper Beaver in 2027.

2025 Gold Mineral Reserves and Mineral Resources*

Category	As at December 31, 2025			As at December 31, 2024

*Open Pit ("O/P"), Underground ("U/G")

¹ LaRonde mine: Net smelter value cut-off varies according to mining type and depth, not less than C\$95/t for LP1 (Area 11-3) and not less than C\$228/t for LaRonde.

² LaRonde Zone 5: Gold cut-off grade varies according to stope size and depth, not less than 1.46 g/t.

³ Canadian Malartic: Gold cut-off grade is 0.35 g/t.

⁴ Marban deposit: Gold cut-off grade is 0.31 g/t.

⁵ Odyssey deposit: Gold cut-off grade varies according to mining zone and depth, not less than 1.44 g/t.

⁶ East Gouldie: Gold cut-off grade not less than 1.57 g/t.

⁷ Goldex: Gold cut-off grade varies according to mining type and depth, not less than 1.00 g/t.

⁸ Akasaba West: Net smelter value cut-off varies, not less than C\$33.28/t.

⁹ Detour Lake: Gold cut-off grade is 0.27 g/t.

¹⁰ Macassa: Gold cut-off grade varies according to mining type, not less than 3.35 g/t for long hole method and 3.78 g/t for cut and fill method.

¹¹ Macassa Near Surface deposit: Gold cut-off grade not less than 2.10 g/t.

¹² Amalgamated Kirkland ("AK") deposit: Gold cut-off grade not less than 2.10 g/t.

¹³ Upper Beaver: Net smelter value cut-off varies according to mining type, not less than C\$118.17/t for underground and C\$43.49/t for open pit.

¹⁴ Hammond Reef: Gold cut-off grade is 0.41 g/t.

¹⁵ Amaruk: Gold cut-off grade varies according to mining type, not less than 0.98 g/t for open pit mineral reserves and 3.05 g/t for underground mineral reserves (gold cut-off grade for marginal underground mineral reserves from development is 1.17 g/t).

¹⁶ Meliadine: Gold cut-off grade varies according to mining type, not less than 1.50 g/t for open pit mineral reserves and 3.90 g/t for underground mineral reserves (gold cut-off grade for marginal underground mineral reserves from development is 1.50 g/t).

¹⁷ Hope Bay: Gold cut-off grade not less than 4.00 g/t.

¹⁸ Fosterville: Gold cut-off grade varies according to mining zone and type, not less than 3.00 g/t.

¹⁹ Kittila: Gold cut-off grade varies according to haulage distance, not less than 2.63 g/t.

²⁰ Pinos Altos: Net smelter value cut-off varies according to mining zone and type, not less than C\$25.44/t for open pit mineral reserves and US\$85.97/t for the underground mineral reserves.

²¹ San Nicolás (50%): Net smelter return cut-off values for low zinc/copper ore of \$9.71/t and for high zinc/copper ore of \$13.15/t.

Notes to Investors

Notes to Investors Regarding the Use of Mineral Resources

The mineral reserve and mineral resource estimates contained in this presentation have been prepared in accordance with the Canadian Securities Administrators' (the "CSA") National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* ("NI 43-101").

The SEC's disclosure requirements and policies for mining properties now more closely align with current industry and global regulatory practices and standards, including NI 43-101; however Canadian issuers that report in the United States using the Multijurisdictional Disclosure System ("MJDS"), such as the Company, may still use NI 43-101 rather than the SEC disclosure requirements when using the SEC's MJDS registration statement and annual report forms. Accordingly, mineral reserve and mineral resource information contained in this presentation may not be comparable to similar information disclosed by U.S. companies.

Investors are cautioned that while the SEC recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources", investors should not assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. These terms have a great amount of uncertainty as to their economic and legal feasibility. **Accordingly, investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources" or "inferred mineral resources" that the Company reports in this presentation are or will be economically or legally mineable.**

Further, "inferred mineral resources" have a great amount of uncertainty as to their existence and as to their economic and legal feasibility. It cannot be assumed that any part or all of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian regulations, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in limited circumstances. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists, or is or will ever be economically or legally mineable.

The mineral reserve and mineral resource data set out in this presentation are estimates, and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. The Company does not include equivalent gold ounces for by-product metals contained in mineral reserves in its calculation of contained ounces. Mineral reserves are not reported as a subset of mineral resources.

Scientific and Technical Information

The scientific and technical information contained in this presentation relating to Nunavut, Quebec and Finland operations has been approved by Dominique Girard, Eng., Executive Vice-President & Chief Operating Officer – Nunavut, Quebec & Europe; relating to Ontario, Australia and Mexico operations has been approved by Natasha Vaz, P.Eng., Executive Vice-President & Chief Operating Officer – Ontario, Australia & Mexico; relating to exploration has been approved by Guy Gosselin, Eng. and P.Geo., Executive Vice-President, Exploration; and relating to mineral reserves and mineral resources has been approved by Dyane Duquette, P.Geo., Vice-President, Mineral Resources Management, each of whom is a "Qualified Person" for the purposes of NI 43-101.

Mineral reserves reported are not included in mineral resources. Tonnage amounts and contained metal amounts set out in this table have been rounded to the nearest thousand, so may not aggregate to equal column or row totals. Mineral reserves are in-situ, taking into account all mining recoveries, before mill or heap leach recoveries. Underground mineral reserves and measured and indicated mineral resources are reported within mineable shapes and include internal and external dilution. Inferred mineral resources are reported within mineable shapes and include internal dilution. Mineable shape optimization parameters may differ for mineral reserves and mineral resources.

The mineral reserves and mineral resources tonnages reported for silver, copper and zinc are a subset of the mineral reserves and mineral resources tonnages for gold. The Company's economic parameters set the maximum price allowed to be no more than the lesser of the three-year moving average and current spot price, which is a common industry standard. Given the current commodity price environment, Agnico Eagle continues to use more conservative gold and silver prices.

The below metal price assumptions are all below the three-year historic averages (from January 1, 2023 to December 31, 2025) of approximately \$2,606 per ounce of gold, \$30.64 per ounce of silver, \$4.32 per pound of copper and \$1.26 per pound of zinc.

Metal Price for Mineral Reserve Estimation*			
Gold (\$/oz)	Silver (\$/oz)	Copper (\$/lb)	Zinc (\$/lb)
\$1,600	\$24.00	\$3.80	\$1.20
*Exceptions: \$1,350 per ounce of gold used for Hammond Reef; \$1,500 per ounce of gold used for Detour Lake open pit; \$1,650 per ounce of gold used for Wasamac and Marban; \$2,000 per ounce of gold for Amaruq; \$1,450 per ounce of gold and \$3.75 per pound of copper used for Upper Beaver; \$2,000 per ounce of gold and \$27.00 per ounce of silver used for Pinos Altos; and \$1,300 per ounce of gold, \$20.00 per ounce of silver, \$3.00 per pound of copper and \$1.10 per pound of zinc used for San Nicolás.			
Exchange Rates*			
C\$ per US\$1.00	MXN per US\$1.00	A\$ per US\$1.00	€ per US\$1.00
C\$1.34	MXP18.00	A\$1.52	€0.91
*Exceptions: exchange rate of C\$1.25 per US\$1.00 used for Holt complex and Detour Lake Zone 58N; US\$1.15 per €1.00 used for Barsele; C\$1.30 per US\$1.00 used for Detour Lake open pit, Detour Lake underground, Hammond Reef and Anoki-McBean; and A\$1.45 per US\$1.00 used for Northern Territory.			

Metal Price for Mineral Resource Estimation*			
Gold (\$/oz)	Silver (\$/oz)	Copper (\$/lb)	Zinc (\$/lb)
\$2,000	\$25.00	\$4.00	\$1.30
*Exceptions: \$1,200 per ounce of gold used for Holt complex; \$1,300 per ounce of gold used for Detour Lake Zone 58N; \$1,500 per ounce of gold used for Northern Territory; \$1,533 per ounce of gold used for Barsele; \$1,600 per ounce of gold used for Canadian Malartic; \$1,650 per ounce of gold used for La India; \$1,688 per ounce of gold used for Hammond Reef, Anoki-McBean and Tarachi; \$1,750 per ounce of gold used for Upper Beaver, Wasamac and Aquarius; \$1,800 per ounce of gold used for Marban; \$1,900 per ounce of gold used for Marban Regional and Akasaba Regional; \$2,400 per ounce of gold used for Amaruq; \$1,688 per ounce of gold and \$25.00 per ounce of silver used for Santa Gertrudis; \$1,300 per ounce of gold, \$20.00 per ounce of silver, \$3.00 per pound of copper and \$1.10 per pound of zinc used for San Nicolás; \$2,400 per ounce of gold and \$28.00 per ounce of silver used for Pinos Altos.			

Notes to Investors Regarding the Use of Mineral Resources

NI 43-101 requires mining companies to disclose mineral reserves and mineral resources using the subcategories of "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources". Mineral resources that are not mineral reserves do not have demonstrated economic viability.

A mineral reserve is the economically mineable part of a measured and/or indicated mineral resource. It includes diluting materials and allowances for losses, which may occur when the material is mined or extracted and is defined by studies at prefeasibility or feasibility level as appropriate that include application of modifying factors. Such studies demonstrate that, at the time of reporting, extraction could reasonably be justified. The mineral reserves presented in this presentation are separate from and not a portion of the mineral resources.

Modifying factors are considerations used to convert mineral resources to mineral reserves. These include, but are not restricted to, mining, processing, metallurgical, infrastructure, economic, marketing, legal, environmental, social and governmental factors.

A proven mineral reserve is the economically mineable part of a measured mineral resource. A proven mineral reserve implies a high degree of confidence in the modifying factors. A probable mineral reserve is the economically mineable part of an indicated and, in some circumstances, a measured mineral resource. The confidence in the modifying factors applied to a probable mineral reserve is lower than that applied to a proven mineral reserve.

A mineral resource is a concentration or occurrence of solid material of economic interest in or on the Earth's crust in such form, grade or quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade or quality, continuity and other geological characteristics of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge, including sampling.

A measured mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics are estimated with confidence sufficient to allow the application of modifying factors to support detailed mine planning and final evaluation of the economic viability of the deposit. Geological evidence is derived from detailed and reliable exploration, sampling and testing and is sufficient to confirm geological and grade or quality continuity between points of observation. An indicated mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics are estimated with sufficient confidence to allow the application of modifying factors in sufficient detail to support mine planning and evaluation of the economic viability of the deposit. Geological evidence is derived from adequately detailed and reliable exploration, sampling and testing and is sufficient to assume geological and grade or quality continuity between points of observation. An inferred mineral resource is that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity.

Investors are cautioned not to assume that part or all of an inferred mineral resource exists, or is economically or legally mineable.

A feasibility study is a comprehensive technical and economic study of the selected development option for a mineral project that includes appropriately detailed assessments of applicable modifying factors, together with any other relevant operational factors and detailed financial analysis that are necessary to demonstrate, at the time of reporting, that extraction is reasonably justified (economically mineable). The results of the study may reasonably serve as the basis for a final decision by a proponent or financial institution to proceed with, or finance, the development of the project. The confidence level of the study will be higher than that of a pre-feasibility study.

Additional Information

Additional information about each of the Company's material mineral projects as at December 31, 2025, including information regarding data verification, key assumptions, parameters and methods used to estimate mineral reserves and mineral resources and the risks that could materially affect the development of the mineral reserves and mineral resources required by sections 3.2 and 3.3 and paragraphs 3.4(a), (c) and (d) of NI 43-101 can be found in the Company's AIF and 2025 MD&A filed on SEDAR+ and with the SEC on EDGAR and in the following technical reports filed on SEDAR+ in respect of the Company's material mineral properties: Detour Lake Operation, Ontario, Canada, NI 43-101 Technical Report (September 20, 2024); NI 43-101 Technical Report of the LaRonde complex in Quebec, Canada (March 24, 2023); NI 43-101 Technical Report Canadian Malartic Mine, Quebec, Canada (March 25, 2021); Technical Report on the Mineral Resources and Mineral Reserves at Meadowbank Gold complex including the Amaruq Satellite Mine Development, Nunavut, Canada as at December 31, 2017 (February 14, 2018); and the Updated Technical Report on the Meliadine Gold Project, Nunavut, Canada (February 11, 2015).

Notes to Investors

Forward-Looking Non-GAAP Measures

This presentation contains information regarding estimated future total cash costs per ounce, minesite costs per tonne and AISC per ounce. The estimates are based upon the total cash costs per ounce, minesite costs per tonne and AISC per ounce that the Company expects to incur to mine gold at its mining operations and do not include certain costs that will vary over time as each project is developed and mined. It is therefore not practicable to reconcile these forward-looking non-GAAP financial measures to the most comparable IFRS Accounting Standards measure.

Notes to Investors Regarding Production Guidance

The gold production guidance is based on the Company's mineral reserves but includes contingencies and assumes metal prices and foreign exchange rates that are different from those used in the mineral reserve estimates. These factors and others mean that the gold production guidance presented in this presentation does not reconcile exactly with the production models used to support these mineral reserves.

Notes to Investors Regarding Certain Measures of Performance

This presentation discloses certain financial performance measures, including "total cash costs per ounce", "all-in sustaining costs per ounce" (or "AISC per ounce"), "adjusted net income", "EBITDA" which means earnings before interest, taxes, depreciation and amortization, "adjusted EBITDA", "free cash flow" and "net cash", as well as, for certain of these measures their related per share ratios that are not standardized measures under IFRS Accounting Standards. These measures and ratios may not be comparable to similar measures and ratios reported by other gold producers and should be considered together with other data prepared in accordance with IFRS Accounting Standards. See AEM Management's Discussion and Analysis ("MD&A") dated July 29, 2026 under the caption "Non-GAAP Financial Performance Measures" for a reconciliation of these measures to the most directly comparable financial information reported in the consolidated financial statements prepared in accordance with IFRS Accounting Standards, which is incorporated by reference herein.

Operating Margin – Operating margin is calculated by deducting production costs from revenue from mining operations. In order to reconcile operating margin to net income as recorded in the First Quarter Financial Statements, the Company adds the following items to the operating margin: amortization of property, plant and mine development; exploration and corporate development expenses; general and administrative expenses; finance costs; gain (loss) on derivative financial instruments; foreign currency translation (gain) loss; care and maintenance expenses; other income and expenses; income and mining taxes expense; revaluation gain and impairment losses (reversals). The Company believes that operating margin is a helpful measure to investors as it reflects the operating performance of its individual mines associated with the ongoing production and sale of gold and by-product metals without allocating Company-wide overhead, such as amortization of property, plant and mine development, exploration and corporate development expenses, general and administrative expenses, finance costs, gains and losses on derivative financial instruments, foreign currency translation gains and losses, care and maintenance expenses, other income and expenses and income and mining taxes expense. Management uses this measure internally to plan and forecast future operating results. Management believes this measure is helpful to investors as it provides them with additional information about the Company's underlying operating results, though it should be evaluated in conjunction with other data prepared in accordance with IFRS Accounting Standards.
