Modine Unveils New Stylish, Infrared Patio Heater

Cutting-edge HVAC manufacturer releases latest addition to infrared heater line designed for residential and commercial outdoor patio spaces

RACINE, Wis., Oct. 4, 2016 /PRNewswire/ -- [Modine Manufacturing Company](#) (NYSE: MOD), a leader in technology in the HVAC industry, has unveiled their latest infrared model - the [OHP Series Patio Heater](#) - a stylish, high intensity patio heater designed to provide outdoor comfort heating for dining, entertainment and work areas.

Unlike traditional outdoor heaters that direct energy toward the air, the Modine OHP Series Patio Heater uses energy efficient, infrared technology to instantly provide warmth to surrounding objects. This equates to higher efficiency usage and a quicker, more even heat distribution.

"Traditional heaters take time to warm up the air," said Kimberly Raduenz, marketing communications manager for Modine. "This wait time is completely eliminated with our new infrared patio heater, meaning you get instant heat for your outdoor areas with much more efficiency. It really is a perfect solution to extend the outdoor season for restaurants, shopping areas, your business or your home."

The OHP Series Patio Heater connects directly to a gas line, can be ceiling or wall mounted, and comes in either a black-coated aluminized or brushed 430 stainless steel housing.

"Heaters should be an extension of your outdoor area, not an eye sore," said Raduenz. "We wanted to offer an infrared heater that doesn't have to have a bulky propane tank and that can blend in with the environment. The OHP Series Patio Heater is all about style, comfort and reliability wrapped into an easy to install unit. With cold weather in the forecast, now is a great time to check out the OHP Series Patio Heater and see how it can improve your outdoor space."
