Q2 Introduces Q2 Treasury Fulfillment to Transform How Financial Institutions Onboard and Activate Commercial Clients

2026-04-28

New solution addresses a critical industry gap by automating treasury implementation, enabling banks and credit unions to scale growth and accelerate time to revenue

AUSTIN, Texas--(BUSINESS WIRE)-- **Q2 Holdings, Inc.** (NYSE:QTWO), a leading provider of digital transformation solutions for financial services, today announced Q2 Treasury Fulfillment, a solution designed to modernize and streamline how banks and credit unions onboard and implement treasury services for commercial clients.

As financial institutions face increasing pressure to grow deposits and deepen commercial relationships, the treasury onboarding experience has become a critical point of differentiation, yet many institutions still rely on fragmented, manual processes that slow implementation, introduce risk, and limit their ability to scale. Unlike traditional onboarding solutions that focus primarily on workflow management, Q2 Treasury Fulfillment automates the actual fulfillment of treasury services. By connecting front-office intake with back-office systems, the solution eliminates redundant data entry, reduces errors, and enables a seamless flow of information across systems.

"Q2 Treasury Fulfillment represents a meaningful step forward for institutions looking to compete more effectively in the commercial banking space," said Encore Bank EVP and Chief Operations Officer Erin Simpson. "By streamlining implementation and reducing operational friction, it allows us to focus more on serving clients and growing relationships."

"Financial institutions don't just need better onboarding workflows, they need a better way to deliver treasury services end to end," said Q2 VP of Product Management Anthony Ianniciello. "Q2 Treasury Fulfillment closes that gap by automating the most complex and time-consuming parts of the process, enabling banks and credit unions to move faster and operate more efficiently."

Because the solution is embedded within the Q2 Digital Banking Platform, financial institutions benefit from a unified experience that connects onboarding, fulfillment, and ongoing servicing, reducing fragmentation and accelerating adoption.

Q2 Treasury Fulfillment is a key component of **Q2 Catalyst**, a suite of best-in-class commercial banking solutions designed to help banks and credit unions win more deals, onboard clients faster, serve them better, and grow profitable relationships.
