

# INTERFACE CARBON OFFSETS

**Interface used carbon offsets to support our historical Carbon Neutral Floors program which was discontinued in April 2024. The list below represents projects applied to Carbon Neutral Floors from January 2024 – April 2024 as well as for all customer flooring purchases through the end of 2024.**

In selecting offset projects, Interface sourced offsets only from projects that met third-party verified carbon offset standards such as the Gold Standard (GS) or the Verified Carbon Standard (VCS) with some projects having additional certifications such as the Climate, Community & Biodiversity Standard (CCB). This assured that the carbon credits we used were real (had happened), additional (beyond business-as-usual activities), measurable and permanent.

## CARBON OFFSETS RETIRED IN 2024

Project Name	ID	Supplier	Location	Registry	Removal/ Avoidance	Type	Protocol	Standard
Mordogan Wind Farm Project	1017	CFS	Turkey	Gold Standard	Avoidance	Renewable energy	ACM0002	GS
Grid connected electricity generation plant using natural gas at Jurong Island	1736	ACT Commodities	Singapore	Verra	Avoidance	Energy efficiency	AM0029	VCS
Sichuan Furong Coal Mine Methane Utilization Project	1446	CFS	China	Verra	Avoidance	Methane Utilization	ACM0008	VCS
Reducing Gas Leakages within the Titas Gas Distribution Network in Bangladesh - CER Conversion	2478	CFS	Bangladesh	Verra	Avoidance	Methane Utilization	AM0023	VCS
Keo Seima Wildlife Sanctuary REDD+ Project	1650	CFS	Cambodia	Verra	Avoidance	Forestry	VM0015	VCS + CCB
The Mai Ndombe REDD+ Project	934	CFS	DR Congo	Verra	Avoidance	Forestry	VM0009	VCS + CCB
Linshu Biogas Recovery and Power Generation Project	2402	CFS	China	Verra	Avoidance	Biogas	ACM0014	VCS
CECIC HKC Gansu Changma Wind Power Project	717	CFS	China	Verra	Avoidance	Renewable energy	ACM0002	VCS
Kasigau Corridor REDD+ Project - Phase II The Community Ranches	612	CFS	Kenya	Verra	Avoidance	Forestry	VM0009	VCS + CCB
