

INTERFACE ENVIRONMENTAL ATTRIBUTE CERTIFICATES

Interface uses Environmental Attribute Certificates (EACs), such as renewable energy credits (RECs) in the U.S., Guarantees of Origin (GOs) in Europe, I-RECs in China and Thailand, Large-scale Generation Certificates (LGCs) in Australia and biogas certificates to support our renewable energy goals and reduce our market-based Scope 1 GHG emissions (via biogas certificates) and Scope 2 Emissions (via RECs, GOs and I-RECs).

Interface only purchases EACs that are certified to a standard, ensuring that the attributes come from new projects which are audited, tracked and only sold to one purchaser.

ENVIRONMENTAL ATTRIBUTE CERTIFICATES APPLIED IN 2024
