

NEWS RELEASE

# Jacobs Partners with Atos to Deliver Powerful Predictive Maintenance Solutions

2018-02-19

Helping clients drive down operational costs and optimize performance

DALLAS--(BUSINESS WIRE)-- **Jacobs Engineering Group Inc.** (NYSE:JEC) and **Atos**, a global leader in digital transformation, have reached a non-exclusive collaboration agreement to provide predictive, condition-based maintenance and field services optimization solutions to clients across industry sectors including water, energy, transport, aviation, nuclear and the built environment. The enhanced data capture and analysis offers clients greater understanding of their assets, helping them to reduce operational and reactive maintenance costs, optimize performance, and increase return on asset investment.

“This collaboration with Atos will help us create more opportunities to leverage

disruptive technology and deliver strategic digital innovation for complex government, infrastructure and industrial programs,” said Jacobs Buildings and Infrastructure Europe Senior Vice President and General Manager Donald Morrison. “With our in-depth industry knowledge and combined digital capabilities, we are well positioned to help our clients achieve performance excellence and maximize their opportunities in this dynamic technology space.”

“All industries are undergoing huge transformation due to the maturing of the Internet of Things (IoT) and analytics services,” said Senior Vice President and Global Head of Atos IoT Services Paul Albada Jelgersma. “The digitization of

front-line operations means solutions that reduce cost through predictive and preventative maintenance are in high demand. This is a highly synergistic collaboration and our recognized expertise in end-to-end strategy covering consulting, development, advanced analytics, managed IoT and IoT security will enable us to provide integrated solutions to clients from the outset.”

Harnessing the professional technical services expertise of Jacobs with the digital and IoT capabilities of Atos, the combined offering will provide further value to clients through real-time insights that detect anomalies and performance patterns, determine critical assets and understand the root cause of asset failure. This enables clients to better anticipate potential asset failure and performance issues, and to proactively plan for timely maintenance and replacement.

The collaboration will leverage part of the **Atos Codex** portfolio of offerings, together with **Jacobs Connected Enterprise (JCE)**, a suite of integrated digital capabilities and solutions in data analytics, IoT deployment and cyber security.

The agreement will initially focus on the U.K. with the option to extend to other markets.
