# Jacobs Selected to Support Delivery of United Kingdom Nuclear Power Station

2026-01-20

Sizewell C Program and Project Delivery Framework to support new low-carbon nuclear power station in Suffolk through 2030

DALLAS, Jan. 20, 2026 /PRNewswire/ -- **Jacobs** (NYSE: J) has been selected by **Sizewell C** for its Professional Services Framework, supporting the delivery of a new nuclear power station on the Suffolk coast of England. The five-year framework will provide key program management and project delivery services for one of the United Kingdom's most significant low-carbon energy developments.

The framework forms part of Sizewell C's plan to mobilize world-class capability to support the delivery of the twin-reactor nuclear plant, planned to produce reliable, low-carbon electricity for approximately six million homes and contribute to achieving the U.K.'s net zero targets. Under the framework, Jacobs will provide strategic leadership, program integration, and design and engineering support to meet Sizewell C's highly regulated technical and delivery requirements.

**Jacobs Executive Vice President Europe Richard Sanderson said:** "Sizewell C represents a critical step in securing the U.K.'s clean energy future. Through this Framework, Jacobs will help establish the structures, systems and governance needed for safe, efficient and integrated delivery of this nationally important program. Our role will focus on enhancing collaboration, strengthening delivery capability and advancing low-carbon power generation to support economic growth and energy security."

Sizewell C estimates the project will support tens of thousands of jobs across the U.K., create 1,500 apprenticeships, and deliver billions of pounds in local, regional and national supply chain opportunities. Once operational, the

station is expected to generate around 3.2 gigawatts of electricity, supporting the decarbonization of the U.K.'s power system and reducing reliance on imported energy.

Jacobs' appointment builds on more than 60 years of experience supporting the global nuclear industry across the full asset lifecycle—from new build programs to decommissioning and waste management and disposal. The company continues to play a leading role in the U.K.'s civil nuclear industry, contributing to major programs such as **Hinkley Point C** and **Sellafield**.

At Jacobs, we're challenging today to reinvent tomorrow – delivering outcomes and solutions for the world's most complex challenges. With approximately \$12 billion in annual revenue and a team of almost 43,000, we provide end-to-end services in advanced manufacturing, cities & places, energy, environmental, life sciences, transportation and water. From advisory and consulting, feasibility, planning, design, program and lifecycle management, we're creating a more connected and sustainable world. ## About Sizewell C

Sizewell C is a new 3.2GW nuclear power station being built on the Suffolk coast. One of the biggest clean energy projects in Britain, Sizewell C will provide low-carbon electricity to six million homes for at least 60 years and save nine million tonnes of carbon dioxide from entering the atmosphere annually. The project will support thousands of jobs across the U.K., creating 1,500 apprenticeships, and will deliver 70% of its construction value to British suppliers. A British project, majority owned by the government, Sizewell C will play an important role in the transition to clean energy and in supporting the U.K.'s long-term energy independence. Certain statements contained in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not directly relate to any historical or current fact. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-looking statements on management's current estimates and expectations, as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business results to differ materially from our forward-looking statements including, but not limited to, uncertainties as to, the timing of the award of projects and funding and potential changes to the amounts provided for under the Infrastructure Investment and Jobs Act and other legislation and executive orders related to governmental spending, including any directive to federal agencies to reduce federal spending or the size of the federal

workforce, and changes in U.S. or foreign tax laws, including the tax legislation enacted in the U.S. in July 2025, statutes, rules, regulations or ordinances, including the impact of, and changes to tariffs and retaliatory tariffs or trade policies, that may adversely impact our future financial positions or results of operations, as well as general economic conditions, including inflation and the actions taken by monetary authorities in response to inflation, changes in interest rates and foreign currency exchange rates, changes in capital markets, the possibility of a recession or economic downturn, and increased uncertainty and risks, including policy risks and potential civil unrest, relating to the outcome of elections across our key markets and elevated geopolitical tension and conflicts, among others. For a description of these and additional factors that may occur that could cause actual results to differ from our forward-looking statements, see our filings with the U.S. Securities and Exchange Commission. The company is not under any duty to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
