

Jacobs and Morrison Energy Services Secure National Grid Projects

2022-05-12

Project enables UK transition to sustainable energy systems of the future

DALLAS, May 12, 2022 /PRNewswire/ -- **Jacobs** (NYSE:J)/**Morrison Energy Services** Joint Venture – J1M – was awarded three contracts to support Pembroke, Lackenby and Bramley substation projects under energy utility **National Grid's six-year Substations Engineering Procurement Construction Framework** in the U.K.

As principal designer and contractor, the Jacobs/Morrison Energy Services Joint Venture is progressing detailed design and early works on the Pembroke substation project in Wales, to connect it to Ireland's **Greenlink interconnector**, one of Europe's most important energy infrastructure projects. Work includes the design, supply, installation and commissioning of a new 400kV gas-insulated switchgear (GIS) extension in the existing substation.

J1M is also supporting the connection of the **Dogger Bank C** windfarm on the east coast at Teesside into the transmission network at Lackenby substation. When complete this will connect an installed generation capacity of 1.2GW from Dogger Bank C, providing enough clean energy to power up to two million homes.

In Hampshire, J1M will deliver National Grid's new 25kV Holly Cross substation and connect it to the Bramley 400kV substation to supply Network Rail. J1M will also support in managing rural ecological requirements and local stakeholder engagement on all projects.

"With the U.K.'s ambition to quadruple energy from offshore wind by 2030, these projects play an essential role in expanding transmission capacity to the grid," said Jacobs People & Places Solutions Senior Vice President Europe and Digital Strategies Donald Morrison. "Our integrated team combines deep technical experience and major

projects capability to drive agile solutions that challenge the norm and support a sustainable energy system for tomorrow."

"This is a great opportunity for Morrison Energy Services, as an established energy networks service provider, to help drive forward the U.K.'s essential transition to the sustainable energy systems of the future," said Morrison Energy Services Managing Director Peter Carolan. "We are proud to be part of building a sustainable future that will ensure our homes and businesses are increasingly powered by clean energy."

From technical consultancy and engineering design, to infrastructure management services and operations and maintenance, Jacobs is providing extensive end-to-end solutions for **offshore wind power development efforts** — like Germany's **SuedLink Program** — to help meet the increasing global demand for affordable clean energy. Jacobs is also looking at the feasibility of **the production and supply of green hydrogen** for renewable energy company RWE's Pembroke Power Station.

At Jacobs, we're challenging today to reinvent tomorrow by solving the world's most critical problems for thriving cities, resilient environments, mission-critical outcomes, operational advancement, scientific discovery and cutting-edge manufacturing, turning abstract ideas into realities that transform the world for good. With \$14 billion in revenue and a talent force of approximately 55,000, Jacobs provides a full spectrum of professional services including consulting, technical, scientific and project delivery for the government and private sector.

Certain statements contained in this press release constitute forward-looking statements as such term is defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and such statements are intended to be covered by the safe harbor provided by the same. Statements made in this release that are not based on historical fact are forward-looking statements. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-

looking statements on management's current estimates and expectations as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business results to differ materially from our forward-looking statements, including, but not limited to, the timing of the award of projects and funding under the Infrastructure Investment and Jobs Act as well as general economic conditions, including inflation, changes in interest rates, foreign currency exchange rates, and changes in capital markets, geopolitical events and conflicts, and the impact of the COVID-19 pandemic, including the related reaction of governments on global and regional market conditions and the company's business, among others. For a description of some additional factors that may occur that could cause actual results to differ from our forward-looking statements, see the discussions contained under Item 1 - Business; Item 1A - Risk Factors; Item 3 - Legal Proceedings; and Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations in our most recently filed Annual Report on Form 10-K, and Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations; Item 1 - Legal Proceedings; and Item 1A - Risk Factors in our most recently filed Quarterly Report on Form 10-Q, as well as the company's other filings with the Securities and Exchange Commission. The company is not under any duty to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
