

NEWS RELEASE

Jacobs and PA Consulting to Advance Intelligent Aviation Infrastructure at Dallas Fort Worth International Airport

2025-10-15

Artificial intelligence, machine learning and data analytics to enhance operational efficiency and scalability

DALLAS, Oct. 15, 2025 /PRNewswire/ -- **Jacobs** (NYSE: J), with strategic partner **PA Consulting**, has been selected by Dallas Fort Worth International Airport (DFW), one of the world's busiest airports, for a digital transformation engagement designed to set new benchmarks and best practices for intelligent, data-driven operations in North America.

The engagement brings together Jacobs' industry-leading capabilities in artificial intelligence (AI), machine learning (ML) and advanced analytics with PA Consulting's digital transformation capability, and aviation strategy and innovation, to develop a scalable, future-ready aviation model.

A key focus of the engagement is the development of proven AI-based solutions embedded with cybersecurity capabilities to support predictive decision-making and enable scalable, long-term innovation. These solutions are designed to address DFW's priority challenges and support the client across the entire asset lifecycle.

Jacobs Executive Vice President Amer Battikhi said: "As global demand for air travel increases and airport investment needs rise, DFW is creating a blueprint for the intelligent airport of the future by embedding AI, machine learning and data analytics at the core of operations. Our integrated digital delivery approach – developed in close collaboration with PA Consulting – supports large, complex environments like DFW to become more agile, responsive and efficient, unlocking lasting value for passengers, operators and the broader community."

PA Consulting's contribution reflects its global experience helping airports implement intelligent systems that drive operational excellence, digital transformation and long-term sustainability.

PA Consulting US Aviation Lead Carlos Ozoressaid: "Jacobs and PA are working together to support DFW on this forward-looking initiative. This collaboration builds on our established partnership with Jacobs and reflects PA's commitment to delivering technology-driven solutions that enable airports to harness innovation and address the evolving demands of the aviation landscape."

As the current **No. 1 ranked firm in airport design** by Engineering News-Record (ENR), Jacobs is recognized for its global experience in delivering advanced digital infrastructure solutions across aviation hubs in the U.S., Europe, Middle East, India and Australia. Jacobs' long-standing relationship with DFW and deep expertise in AI-enabled infrastructure delivery position the company to lead this next phase of intelligent transformation.

In addition to DFW, Jacobs collaborates with **major airports globally** including Heathrow in the U.K. and **Denver International** in the U.S., along with ongoing engagements at **Los Angeles, Atlanta, and Noida International**. This portfolio underscores Jacobs' proven experience in delivering intelligent, sustainable airport infrastructure across diverse regions.

This engagement reinforces Jacobs' commitment to driving digital innovation in critical infrastructure sectors. Across initiatives such as smart cities, real-time geospatial integration and digital twin implementations, Jacobs continues to help public and private clients worldwide respond to complex challenges through intelligent, connected systems.

With approximately \$12 billion in annual revenue and a team of almost 45,000, we provide end-to-end services in advanced manufacturing, cities & places, energy, environmental, life sciences, transportation and water. Certain statements contained in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not directly relate to any historical or current fact. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-looking statements on management's current estimates and expectations, as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business

results to differ materially from our forward-looking statements including, but not limited to, uncertainties as to, the timing of the award of projects and funding and potential changes to the amounts provided for under the Infrastructure Investment and Jobs Act and other legislation and executive orders related to governmental spending, including any directive to federal agencies to reduce federal spending or the size of the federal workforce, and changes in U.S. or foreign tax laws, including the new tax legislation enacted in the U.S. in July 2025, statutes, rules, regulations or ordinances, including the impact of, and changes to tariffs and retaliatory tariffs or trade policies, that may adversely impact our future financial positions or results of operations, as well as general economic conditions, including inflation and the actions taken by monetary authorities in response to inflation, changes in interest rates and foreign currency exchange rates, changes in capital markets, the possibility of a recession or economic downturn, and increased uncertainty and risks, including policy risks and potential civil unrest, relating to the outcome of elections across our key markets and elevated geopolitical tension and conflicts, among others. For a description of these and additional factors that may occur that could cause actual results to differ from our forward-looking statements, see our filings with the U.S. Securities and Exchange Commission. The company is not under any duty to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
