The Oldbury site in South Gloucestershire, U.K. Image: Great British Energy - Nuclear

Jacobs will develop environmental baseline data

across terrestrial and marine environments, along with environmental assessments, Habitats Regulations Assessment and associated activities to inform future potential planning, design and permitting decisions. Jacobs will deliver the services with **AtkinsRéalis** and **AECOM** as subconsultants, bringing together a multidisciplinary team to support environmental surveys, impact assessments and regulatory approvals.

Jacobs Executive Vice President Richard Sanderson said: “Strengthening the U.K.’s energy security and advancing lower-carbon power requires new civil nuclear development at pace. Jacobs has supported some of the most complex nuclear programs in the U.K. and globally, working across the full lifecycle from early development through delivery. We bring that experience to Great British Energy – Nuclear at Oldbury, helping lay the environmental foundations needed to support long-term project success.”

Great British Energy - Nuclear Chief Executive Simon Roddy added: "As part of our role to position Oldbury for nuclear development, it's important we continue to deepen our understanding of the site with various packages of work, such as ground investigations and archaeological surveys. I'm pleased to welcome Jacobs and their partners to the team to better our knowledge of Oldbury through environmental assessments, which will be key to informing future planning decisions."

The contract builds on initial site characterization activities and will help assess the suitability of the Oldbury site for potential nuclear development. The work will support the evidence base needed to inform planning and consenting decisions, as well as future design and construction considerations.

Jacobs' appointment builds on more than 60 years of experience delivering **global civil nuclear solutions** across the full asset lifecycle in highly regulated environments—from new build programs to decommissioning and waste management and disposal. The company continues to play a leading role in the U.K.'s civil nuclear industry, contributing to major programs such as **Sizewell C, Hinkley Point C** and **Sellafield**. This experience planning for nuclear technologies will also have increasing relevance across the globe as the energy sector looks to keep pace with demand.

At Jacobs, we're challenging today to reinvent tomorrow – delivering outcomes and solutions for the world's most complex challenges. With approximately \$12 billion in annual revenue and a talent force of approximately 47,000, we provide end-to-end services in advanced manufacturing, cities & places, energy, environmental, life sciences, transportation and water. From advisory and consulting, feasibility, planning, design, program and lifecycle management, we're creating a more connected and sustainable world. See how at **jacobs.com** and connect with us on **LinkedIn, Instagram, X** and **Facebook**.

Jacobs employs more than 6,000 people across the U.K., operating from 15 core offices and more than 35 additional sites. Working with HM Government, local authorities and the private sector, Jacobs helps shape and deliver the nation's most critical infrastructure, energy, environmental and community programs — creating social value by improving resilience, driving economic growth and enhancing quality of life.

Certain statements contained in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not directly relate to any historical or current fact. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-looking statements on management's current estimates and expectations, as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business

results to differ materially from our forward-looking statements including, but not limited to, uncertainties as to, the timing of the award of projects and funding and potential changes to the amounts provided for under the Infrastructure Investment and Jobs Act and other legislation and executive orders related to governmental spending, including any directive to federal agencies to reduce federal spending or the size of the federal workforce, and changes in U.S. or foreign tax laws, including the tax legislation enacted in the U.S. in July 2025, statutes, rules, regulations or ordinances, including the impact of, and changes to tariffs and retaliatory tariffs or trade policies, that may adversely impact our future financial positions or results of operations, as well as general economic conditions, including inflation and the actions taken by monetary authorities in response to inflation, changes in interest rates and foreign currency exchange rates, changes in capital markets, the possibility of a recession or economic downturn, and increased uncertainty and risks, including policy risks and potential civil unrest, relating to the outcome of elections across our key markets and elevated geopolitical tension and conflicts, among others. For a description of these and additional factors that may occur that could cause actual results to differ from our forward-looking statements, see our filings with the U.S. Securities and Exchange Commission. The company is not under any duty to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
