Jacobs to Design Florida Water Treatment Plant Upgrades for PFAS Removal

2025-02-06

Modernizing drinking water infrastructure for treatment of long-lasting synthetic chemicals

DALLAS, Feb. 6, 2025 /PRNewswire/ -- **Jacobs** (NYSE: J) was selected by the City of Boynton Beach in South Florida to evaluate and design upgrades at two water treatment plants to remove per- and polyfluoroalkyl substances (PFAS) from the city's groundwater supplies to comply with new U.S. federal drinking water regulations.

At a combined treatment capacity of 30 million gallons per day, the two plants provide drinking water to more than 112,000 people. In addition to addressing new PFAS regulations, the facility upgrades will replace aging infrastructure and meet the community's growing demand for water.

"Considering potential federal compliance deadlines, we're working with the City of Boynton Beach to help deliver an effective, long-term PFAS treatment and disposal solution," said Jacobs Senior Vice President Katus Watson.

"We've supported the city with their water system challenges for more than 40 years and look forward to planning and designing this next important project for the community."

Jacobs will evaluate the city's existing facilities to assess treatment capabilities for PFAS removal and develop a comprehensive facilities plan for the city's treatment plants, associated source water supply and residuals management systems. Once the facilities plan is complete, Jacobs will design the improvements and provide construction management services. The city received a loan from Florida's Drinking Water State Revolving Fund Program for project planning and design.

"We look forward to working with our long-time partner Jacobs on this once-in-a-generation project, which will

define the city's water supply system for decades to come," said City of Boynton Beach Utilities Director Poonam Kalkat.

A global leader in PFAS research, assessment and treatment across the water, environmental and advanced manufacturing sectors, Jacobs delivers **comprehensive solutions** to the PFAS challenge. We have delivered long-term PFAS solutions for many clients including the **City of Woodbury**, Minnesota, the **City of North Bay**, Ontario, the U.S. Department of Defense and Australian Department of Defense.

At Jacobs, we're challenging today to reinvent tomorrow – delivering outcomes and solutions for the world's most complex challenges. With approximately \$12 billion in annual revenue and a team of almost 45,000, we provide end-to-end services in advanced manufacturing, cities & places, energy, environmental, life sciences, transportation and water. From advisory and consulting, feasibility, planning, design, program and lifecycle management, we're creating a more connected and sustainable world. Certain statements contained in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not directly relate to any historical or current fact. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-looking statements on management's current estimates and expectations, as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business results to differ materially from our forward-looking statements including, but not limited to, uncertainties as to the impact of the recently completed separation transaction pursuant to which we spun off and merged our Critical Missions Solutions and Cyber & Intelligence government services businesses with Amentum (together, "new Amentum") on Jacobs' and new Amentum's businesses, the timing of the award of projects and funding and potential changes to the amounts provided for under the Infrastructure Investment and Jobs Act and other legislation and executive orders related to governmental spending, and changes in U.S. or foreign tax laws, statutes, rules, regulations or ordinances, including the impact of, and changes to tariffs or trade policies, that may adversely impact our future financial positions or results of operations, as well as general economic conditions, including inflation and the actions taken by monetary authorities in response to inflation, changes in interest rates and foreign currency exchange rates, changes in capital markets, the possibility of a recession or economic downturn, and increased uncertainty and risks, including policy risks and potential civil unrest, relating to the outcome of elections across our key markets and elevated geopolitical tension and conflicts, among others. For a description of these and additional factors that may occur that could cause actual results to differ from our forward-looking statements, see our filings with the U.S. Securities and Exchange Commission. The company is not under any duty

to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
