

NEWS RELEASE

# Jacobs to Support Ireland's Energy Transition Through EirGrid Framework

2025-10-28

Five-year agreement supports renewable grid development

DALLAS, Oct. 28, 2025/PRNewswire/ -- **Jacobs** (NYSE: J) has been selected by EirGrid for a five-year Engineering Design, Planning and Project Management Framework, with an option for an additional three years, to provide technical services that will help deliver **Shaping Our Electricity Future**, EirGrid's strategy to transform the electricity transmission system to achieve Ireland's renewable ambition.

Through the framework, Jacobs will form an integrated design team for the Transmission System Operator to provide end-to-end services in planning, design and project management for high-voltage transmission infrastructure. This includes both overground and underground assets, and high-voltage alternating current and high-voltage direct current technologies.

**Jacobs Executive Vice President Europe Richard Sanderson** said: "Reliable, efficient and sustainable electricity transmission systems are central to enabling Ireland's energy transition. Our integrated design team approach will ensure projects are developed holistically – from early-stage planning and design to delivery – with a focus on system reliability, regulatory compliance and environmental stewardship."

The framework scope covers engineering design, planning, project management, environmental and health and safety services.

EirGrid's Shaping Our Electricity Future sets out how the transmission grid will evolve to meet Ireland's 2030 renewable energy ambitions, including at least 80% of electricity generation from renewable sources. The new

framework is designed to help deliver that vision by supporting the long-term resilience of the grid through sustainable transmission solutions.

Across the island of Ireland, Jacobs supports key infrastructure projects including the National Transport Authority's **BusConnects Dublin** and **Cork** programs, Irish Rail's **Galway to Portarlinton rail network upgrade** and **East Coast Railway Infrastructure Protection Projects program**, and Uisce Éireann's (formerly Irish Water) strategic planning for **sustainable and resilient water services**.

Around the globe, Jacobs is advancing global energy infrastructure, shaping resilient and secure systems to form the backbone of thriving communities and economies. Projects include **Suedlink** in Europe, one of the world's largest underground high voltage power cables; as program manager and owners engineer for **Xcel Energy's** multi-billion-dollar transmission and distribution reliability program in the U.S.; and as integrated delivery partner for the **Marinus Link** Interconnector project designed to bolster Australia's renewable energy security.

At Jacobs, we're challenging today to reinvent tomorrow – delivering outcomes and solutions for the world's most complex challenges. With approximately \$12 billion in annual revenue and a team of almost 45,000, we provide end-to-end services in advanced manufacturing, cities & places, energy, environmental, life sciences, transportation and water. From advisory and consulting, feasibility, planning, design, program and lifecycle management, we're creating a more connected and sustainable world. See how at **[jacobs.com](https://www.jacobs.com)** and connect with us on **LinkedIn**, **Instagram**, **X** and **Facebook**.

Certain statements contained in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not directly relate to any historical or current fact. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-looking statements on management's current estimates and expectations, as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business results to differ materially from our forward-looking statements including, but not limited to, uncertainties as to, the timing of the award of projects and funding and potential changes to the amounts provided for under the Infrastructure Investment and Jobs Act and other legislation and executive orders related to governmental spending, including any directive to federal agencies to reduce federal spending or the size of the federal workforce, and changes in U.S. or foreign tax laws, including the new tax legislation enacted in the U.S. in July 2025, statutes, rules, regulations or ordinances, including the impact of, and changes to tariffs and retaliatory tariffs or trade policies, that may adversely impact our future financial positions or results of operations, as well as general economic conditions, including inflation and the actions taken by monetary authorities in response to inflation,

changes in interest rates and foreign currency exchange rates, changes in capital markets, the possibility of a recession or economic downturn, and increased uncertainty and risks, including policy risks and potential civil unrest, relating to the outcome of elections across our key markets and elevated geopolitical tension and conflicts, among others. For a description of these and additional factors that may occur that could cause actual results to differ from our forward-looking statements, see our filings with the U.S. Securities and Exchange Commission. The company is not under any duty to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
