

NEWS RELEASE

Jacobs to deliver \$1 billion San Francisco wastewater upgrade through joint venture

2026-10-28

Project will help reduce nitrogen discharges, contributing to improved San Francisco Bay water quality

DALLAS--(BUSINESS WIRE)-- **Jacobs** (NYSE: J) was selected by the **San Francisco Public Utilities Commission** (SFPUC) as the progressive design-build contractor for the Southeast Treatment Plant Nutrient Reduction Project, a \$1 billion investment estimated by SFPUC, supporting San Francisco Bay protection. Delivered through a joint venture with PCL Construction, Inc., Jacobs will design and construct upgrades at the Southeast Treatment Plant.

The southeast plant is San Francisco's largest wastewater facility and treats nearly 80% of the city's wastewater. The **Nutrient Reduction Project** is one of the largest investments in nutrient reduction for the Bay to date and will upgrade the facility with advanced treatment to reduce the amount of nutrients, specifically total inorganic nitrogen, discharged from the plant.

Jacobs Executive Vice President Tom Meinhart said: "Jacobs brings decades of experience delivering critical wastewater infrastructure projects for the San Francisco Public Utilities Commission, including upgrades at the Southeast Treatment Plant. Supported by our strong **California presence** and **global technical leadership**, our team understands the operational, regulatory and environmental drivers shaping treatment strategies in the region."

The project will also provide opportunities for local businesses and residents. Jacobs will support the SFPUC's Social Impact Partnership by investing in local community health, education, and workforce training and development initiatives. The investment is expected to create lasting economic and social benefits alongside environmental improvements.

SFPUC Assistant General Manager for Infrastructure Stephen Robinson said: "This is a major investment to help protect San Francisco Bay by reducing nutrients in wastewater. San Francisco is doing its part to protect the health of the bay. This project, along with our new state-of-the-art treatment plant on Treasure Island, which also removes nutrients, demonstrates that commitment. The new treatment process will meet updated state and federal environmental requirements. This ambitious project will remake the heart of San Francisco's largest treatment plant while that plant continues to operate, handling 80% of the city's wastewater. Jacobs and PCL have worked with us on major wastewater projects before, and that experience will be critical as we take on a project of this size and complexity."

A global leader in water, Jacobs has more than 25 years of **water design-build** experience and has delivered more than 150 design-build projects and programs, including award-winning modernizations at the **San José-Santa Clara Regional Wastewater Facility** and the **Donald C Tillman Advanced Water Purification Facility**, two of the largest and most advanced water reclamation facilities in the U.S.

At Jacobs, we're challenging today to reinvent tomorrow – delivering outcomes and solutions for the world's most complex challenges. With approximately \$12 billion in annual revenue and a talent force of approximately 47,000, we provide end-to-end services in advanced manufacturing, cities & places, energy, environmental, life sciences, transportation and water. From advisory and consulting, feasibility, planning, design, program and lifecycle management, we're creating a more connected and sustainable world. Certain statements contained in this press release constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that do not directly relate to any historical or current fact. When used herein, words such as "expects," "anticipates," "believes," "seeks," "estimates," "plans," "intends," "future," "will," "would," "could," "can," "may," and similar words are intended to identify forward-looking statements. We base these forward-looking statements on management's current estimates and expectations, as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business results to differ materially from our forward-looking statements including, but not limited to, uncertainties as to, the timing of the award of projects and funding and potential changes to the amounts provided for under the Infrastructure Investment and Jobs Act and other legislation and executive orders related to governmental spending, including any directive to federal agencies to reduce federal spending or the size of the federal workforce, and changes in U.S. or foreign tax laws, including the tax legislation enacted in the U.S. in July 2025, statutes, rules, regulations or ordinances, including the impact of, and changes to tariffs and retaliatory tariffs or trade policies, that may adversely impact our future financial positions or results of operations, as well as general

economic conditions, including inflation and the actions taken by monetary authorities in response to inflation, changes in interest rates and foreign currency exchange rates, changes in capital markets, the possibility of a recession or economic downturn, and increased uncertainty and risks, including policy risks and potential civil unrest, relating to the outcome of elections across our key markets and elevated geopolitical tension and conflicts, among others. For a description of these and additional factors that may occur that could cause actual results to differ from our forward-looking statements, see our filings with the U.S. Securities and Exchange Commission. The company is not under any duty to update any of the forward-looking statements after the date of this press release to conform to actual results, except as required by applicable law.
