

Minsur Selects Jacobs to Lead Pre-Feasibility and Conceptual Studies for Tin Mine Development Project

2017-10-05

DALLAS--(BUSINESS WIRE)-- **Jacobs Engineering Group Inc.** (NYSE:JEC) has been selected by **Minsur S.A.**, one of the world's largest tin producers, to perform the pre-feasibility and conceptual studies for the company's proposed tin mine development project in Peru. Both the conceptual and pre-feasibility studies are being undertaken to extend the life of Minsur's San Rafael tin processing facilities located near Puno, Peru.

The objective of the pre-feasibility study is to define the highest value option for accessing the richest tin zone in the proposed project location and will include structural geology, geotechnical services, hydrogeology and tunneling design. The conceptual study will include mine development, infrastructure, water management, metallurgical test support and upgrades to the existing concentrator to process tin ore that also contains copper and silver.

"Leveraging our 70 years of experience developing mining and metals projects, Jacobs delivers end-to-end project solutions to develop, expand and treat simple and complex ore bodies," said Jacobs Mining & Minerals and Specialty Chemicals Senior Vice President and General Manager Andrew Berryman. "The partnered facility expansion of this project will support sustainability efforts for future production."

Minsur is a Peru-based mining company engaged in the extraction, smelting and refining of tin. Additionally, the company produces ore gold and copper, lead and zinc concentrates, and is also involved in the exploration for new minerals deposits with a focus on copper, gold, silver and polymetallic ores.

Jacobs is one of the world's largest and most diverse providers of full-spectrum technical, professional and construction services for industrial, commercial and government organizations globally. The company employs over 54,000 people and operates in more than 25 countries around the world. For more information, visit
