

NEWS RELEASE

# NJDOT Appoints Jacobs for New Intelligent Transportation System on Route 18

2017-03-28

Traffic Signal System contract includes construction administration and inspection services

DALLAS--(BUSINESS WIRE)-- **Jacobs Engineering Group Inc.** (NYSE:JEC) has received a contract from the New Jersey Department of Transportation (NJDOT) to provide construction administration and inspection services for the Route 18 Traffic Signal System project in East Brunswick and New Brunswick, New Jersey. The Route 18 project consists of the installation of new Intelligent Transportation Systems (ITS) equipment and upgrades to the existing traffic signal system.

Jacobs' construction administration and inspection services include the installation of image and radar detectors, Controlled Traffic Signal System (CTSS) cameras and fiber optic cable at 23 locations along the Route 18 corridor. The project is scheduled for completion by November 2017.

Jacobs will oversee a traffic study to be conducted prior to the start of any work to determine daily volumes at each traffic signal, average corridor travel time and average intersection delay. The findings will be compared with the information obtained when the system is integrated and operational. Once the equipment is installed and integrated into the NJDOT Statewide System, a verification and validation plan will be executed and testing performed.

"Jacobs has worked alongside NJDOT on many projects over the past 60 years," said Jacobs Senior Vice President Buildings and Infrastructure Randy Pierce. "This experience, combined with our proven capability in transport engineering services including ITS, positions us well to help NJDOT meet the challenges and opportunities of this rapidly changing technological landscape."

Jacobs is one of the world's largest and most diverse providers of full-spectrum technical, professional and construction services for industrial, commercial and government organizations globally. The company employs over 54,000 people and operates in more than 25 countries around the world. For more information, visit [www.jacobs.com](http://www.jacobs.com).

Statements made in this release that are not based on historical fact are forward-looking statements. We base these forward-looking statements on management's current estimates and expectations as well as currently available competitive, financial and economic data. Forward-looking statements, however, are inherently uncertain. There are a variety of factors that could cause business results to differ materially from our forward-looking statements. For a description of some of the factors which may occur that could cause actual results to differ from our forward-looking statements please refer to our Form 10-K for the year ended September 30, 2016, and in particular the discussions contained under Items 1 - Business, 1A - Risk Factors, 3 - Legal Proceedings, and 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations. We do not undertake to update any forward-looking statements made herein.
