Intelligent Bio Solutions Expands U.S. Forensic Market Presence, Seeks FDA Clearance for Breakthrough Fingerprint Drug Testing

2025-06-11

SMARTOX has deployed over 50 of INBS' Intelligent Fingerprinting Drug Screening Readers and facilitated over 7,000 screening tests, including more than 1,500 tests in 2024 alone

Company continues to actively pursue FDA clearance in connection with planned expansion into broader U.S. markets in 2025

NEW YORK, June 11, 2025 (GLOBE NEWSWIRE) -- Intelligent Bio Solutions Inc. (Nasdaq: INBS) ("INBS" or the "Company"), a medical technology company delivering intelligent, rapid, non-invasive testing solutions, today announced an update on its growing footprint in the U.S. Forensic Use Only Market through its strategic partnership with SMARTOX, a Texas-based leader in drug and alcohol screening services.

SMARTOX supports clients across corrections, drug courts, rehabilitation centres, and other forensic environments. It has deployed over 50 Intelligent Fingerprinting Drug Screening Readers and facilitated over 7,000 screening tests, including more than 1,500 tests in 2024 alone, highlighting accelerated demand for non-invasive, rapid testing in forensic settings. INBS' drug screening technology is credited with reducing reliance on invasive methods such as urine or saliva collection, while delivering rapid and reliable results directly linked to the individual tested.

As adoption grows in the U.S. Forensic Use Only market, INBS continues to actively pursue FDA clearance for its opiate test system for codeine. This effort aims to enable expansion into broader U.S. markets this year, including workplace drug testing, using its innovative fingerprint sweat-based testing technology.

"We have partnered with SMARTOX to expand access to our fingerprint drug screening system across key

forensic settings such as criminal justice," said Doug Heath, Vice President of Global Sales at Intelligent Bio Solutions. "SMARTOX's commitment to innovation aligns with our mission to transform drug testing through intelligent, non-invasive technologies."

SMARTOX is known for its expertise, innovation, and customer-focused approach to drug testing. Its portfolio includes DOT compliance solutions, instant and lab-based testing, and advanced technologies, including INBS' Intelligent Fingerprinting Drug Screening System, which enables hygienic, non-invasive drug screening in under ten minutes using fingerprint sweat. In addition to serving clients across the U.S., SMARTOX reaches international markets through its distribution network, including Europe, Latin America, New Zealand, and Australia.

"Our clients consistently report that the Intelligent Fingerprinting Drug Screening System improves efficiency, enhances user dignity, and simplifies operations," said Duffy Nabors, Vice President of Sales and Marketing at SMARTOX. "They value its speed, ease of use, and non-invasiveness, along with the ability to eliminate gender-specific staff requirements and special facilities. These benefits help our clients reduce turnaround times, lower costs, and eliminate logistical complexities, improving the overall testing experience."

About SMARTOX

SMARTOX, founded in 2012, is a U.S.-based provider of drug and alcohol testing products and services. It offers a comprehensive portfolio supporting a wide range of settings, including healthcare, justice, corporate, and education. SMARTOX is committed to delivering advanced technology and exceptional results, providing fully integrated services encompassing design, customer service, and administrative support for its product line. The company's footprint spans the U.S. and international markets. SMARTOX is actively scaling its presence in forensic testing markets through new investments, pilot programs, and expanded jurisdictional coverage.

About Intelligent Bio Solutions Inc.

Intelligent Bio Solutions Inc. (NASDAQ: INBS) is a medical technology company delivering intelligent, rapid, non-invasive testing solutions. The Company believes that its Intelligent Fingerprinting Drug Screening System will revolutionize portable testing through fingerprint sweat analysis, which has the potential for broader applications in additional fields. Designed as a hygienic and cost-effective system, the test screens for the recent use of drugs commonly found in the workplace, including opiates, cocaine, methamphetamine, and cannabis. With sample collection in seconds and results in under ten minutes, this technology would be a valuable tool for employers in safety-critical industries. The Company's current customer segments outside the US include construction, manufacturing and engineering, transport and logistics firms, mining, drug treatment organizations, and coroners.
