Intelligent Bio Solutions Highlights Continued Expansion with Strategic Partnership in Spain and Andorra

2025-03-27

INBS set to capitalize on growing Spanish Drug Testing Market, anticipated to reach \$448 million by 2030

Major Spanish accounts currently require 1,000 drug testing cartridges per month

NEW YORK, March 27, 2025 (GLOBE NEWSWIRE) -- Intelligent Bio Solutions Inc. (Nasdaq: INBS) ("INBS" or the "Company"), a medical technology company delivering intelligent, rapid, non-invasive testing solutions, today announced it has expanded access to its fingerprint drug testing in Spain and Andorra through a strategic collaboration with Detecto, a division of Spanish distributor MTB Distribuciones Tecnológicas SL ("MTB").

MTB established Detecto following decades of experience in clinical distribution, recognizing the market's evolving needs and increasing demand for drug testing across various sectors. Detecto is now a leading provider of drug testing solutions throughout Spain and Andorra. INBS' partnership with Detecto aims to leverage the strengths of both companies and expand access to fingerprint sweat-based drug testing across various sectors, including workplace safety and transportation.

Detecto already supplies INBS' solution to major clients in these sectors, including transportation network, Metro Barcelona, and one of Spain's largest mines based out of Rio Tinto, where INBS' solution is integrated into existing security protocols to enhance workplace safety. The testing volumes of these accounts currently require a supply of 1,000 cartridges per month to Detecto, reflecting the trust and confidence these accounts place in INBS' technology. The Company's drug testing system has been well received among Detecto's clients due to its non-invasive nature, ease of collection, and increased acceptance among workers. Additionally, the system's yearly calibration reduces maintenance costs compared to other devices.

"Detecto's success in securing these large accounts in Spain is a strong indication of the wider adoption of our technology in the country," said Doug Heath, Vice President of Global Sales at Intelligent Bio Solutions. "These strategic partnerships are key to our expansion into the European market and the broader implementation of fingerprint drug screening across additional regions."

The Spanish drug testing market is anticipated to reach \$448 million by 2030¹, driven by efforts to prevent drug abuse, a growing acceptance of drug screening as a critical tool for maintaining safety, and rising illicit drug use. Detecto is broadening its focus to include law enforcement and rehabilitation while proactively engaging with the maritime sector. Additionally, Detecto sees strong growth potential in ports, mining and transportation.

About Detecto

Detecto was established as an independent business line within the company MTB Distribuciones Tecnológicas SL to provide the best possible service to professionals working in the prevention and treatment of addictive behaviors. Today, Detecto is a leading supplier in this sector in Spain, offering training and information to its clients on new drugs, technologies, and more. The Spanish labor market and the increasing emphasis on worker safety and well-being, particularly in high-risk sectors, is a key focus for Detecto which has achieved considerable success. Detecto provides consulting services to companies across Spain concerning substance abuse in the workplace, its safety implications, and prevention strategies. The company further provides advice to businesses on how to offer their employees an ethical, legal, and effective way to prevent the abuse of psychoactive substances. As part of this service, Detecto supplies cutting-edge technology to detect substance use in a way that is minimally invasive and highly effective.

About Intelligent Bio Solutions Inc.

Intelligent Bio Solutions Inc. (NASDAQ: INBS) is a medical technology company delivering intelligent, rapid, non-invasive testing solutions. The Company believes that its Intelligent Fingerprinting Drug Screening System will revolutionize portable testing through fingerprint sweat analysis, which has the potential for broader applications in additional fields. Designed as a hygienic and cost-effective system, the test screens for the recent use of drugs commonly found in the workplace, including opiates, cocaine, methamphetamine, and cannabis. With sample collection in seconds and results in under ten minutes, this technology would be a valuable tool for employers in safety-critical industries. The Company's current customer segments outside the US include construction, manufacturing and engineering, transport and logistics firms, drug treatment organizations, and coroners.
