

Intelligent Bio Solutions Launches In-House Fingerprint Drug Testing Across 20+ Sites for Major Australian Waste Operator, Accelerating APAC Expansion

2025-06-18

NEW YORK, June 18, 2025 (GLOBE NEWSWIRE) -- Intelligent Bio Solutions Inc. (Nasdaq: INBS) ("INBS" or the "Company"), a medical technology company delivering intelligent, rapid, non-invasive testing solutions, today announced that Managed Waste Service ("MWS"), a leading Australian waste management provider, plans to implement INBS' Intelligent Fingerprinting Drug Screening System across its New South Wales operations, including its land clearing and green waste processing sites.

The decision marks MWS's first move into in-house drug testing across multiple locations, with more than 20 sites simultaneously engaged in remote testing operations. MWS plans to conduct pre-employment, random, and for-cause testing on-site, giving operational teams complete control over safety processes without the disruption associated with traditional outsourced models.

"In our industry, efficiency and safety go hand-in-hand," commented Con Constantinou, Partner at Managed Waste Service. "We operate across more than 20 sites at any given time and must ensure that every team member is fit for work daily. INBS' on-site testing solution provides the visibility and speed we need to stay compliant and keep teams safe."

The Intelligent Fingerprinting Drug Screening System offers a quick, non-invasive method to screen for recent drug use through fingerprint sweat analysis, delivering results in under ten minutes. INBS' technology enables MWS to implement a scalable, portable solution that aligns with the nature of their fieldwork, whether testing at a remote clearing site or managing compliance across several waste facilities simultaneously.

"For companies like MWS, testing needs to happen where the work happens," said Doug Heath, Vice President of Global Sales at Intelligent Bio Solutions. "This is about removing complexity. Our system gives teams across a broad range of sectors the tools to act quickly and benefit from rapid, non-invasive testing that's easy to administer, requires no specialized training, and supports safer, more efficient workplaces."

This implementation reflects INBS' continued expansion into safety-critical industries, with environmental services now joining a growing portfolio of sectors adopting sweat-based drug testing. As industries seek more innovative, practical, and scalable ways to manage safety and risk, fingerprint drug testing is gaining increasing recognition as the most effective, dignified, and fastest option. INBS is transforming drug testing, with more than 450 organizations across 24 countries using its technology to streamline and simplify workplace testing.

About Managed Waste Service

Managed Waste Service is a waste and recycling company committed to landfill reduction and advancing a circular economy. It provides solutions across general waste, recycling, liquid waste, coffee grind collection, and green waste. Its zero-waste services support industries including hospitality, events, floristry, and landscaping, diverting materials like lawn clippings and coffee grinds from landfill. With a flexible fleet of hook-lift, front-loader, rear-loader, and skip trucks, the company services sites of all sizes. It also tracks waste data to support customer sustainability goals. Managed Waste Service delivers practical, sustainable business, environment, and budget outcomes. Through its innovative approach, Managed Waste Service delivers sustainable outcomes that align with business needs, environmental goals, and long-term cost efficiency.

About Intelligent Bio Solutions Inc.

Intelligent Bio Solutions Inc. (NASDAQ: INBS) is a medical technology company delivering intelligent, rapid, non-invasive testing solutions. The Company believes that its Intelligent Fingerprinting Drug Screening System will revolutionize portable testing through fingerprint sweat analysis, which has the potential for broader applications in additional fields. Designed as a hygienic and cost-effective system, the test screens for the recent use of drugs commonly found in the workplace, including opiates, cocaine, methamphetamine, and cannabis. With sample collection in seconds and results in under ten minutes, this technology would be a valuable tool for employers in safety-critical industries. The Company's current customer segments outside the US include construction, manufacturing and engineering, transport and logistics firms, mining, drug treatment organizations, and coroners.
