Intelligent Bio Solutions Showcases Rapid, Non-Invasive Drug Testing Capabilities in Remote Queensland Workforce Deployment

2025-05-19

Completion of 160 tests conducted in less than 90 minutes demonstrates a level of speed and efficiency beyond the limits of traditional testing approaches

NEW YORK, May 19, 2025 (GLOBE NEWSWIRE) -- Intelligent Bio Solutions Inc. (Nasdaq: INBS) ("INBS" or the "Company"), a medical technology company delivering intelligent, rapid, non-invasive testing solutions, today announced the successful completion of a high-volume workforce drug test for Barcaldine Regional Council in remote Queensland, Australia, (the "Council") using its Intelligent Fingerprinting Drug Screening System (the "System"). This initiative supports the Company's expansion into regional and remote workforce testing markets.

In less than 90 minutes, more than 160 employees, representing 100% of the workforce, were tested and cleared as fit for duty before the start of the workday. The speed and efficiency of the operation ensured minimal disruption to business operations.

"The level of speed and efficiency we have shown here simply isn't possible with traditional testing methods," said Doug Heath, Global Vice President of Sales at Intelligent Bio Solutions. "If the Council had relied on urine or saliva testing, the process would likely have disrupted operations for over a day. Traditional testing requires private facilities, supervised collection, and nil-by-mouth waiting periods for saliva testing. If urine testing, delays caused by 'shy bladder' procedures can extend the process by up to three hours per donor, requiring restricted water intake, constant monitoring, and multiple collection attempts to achieve a valid sample. With confirmation and chain-of-custody requirements, these methods could have extended testing across multiple shifts."

INBS delivered a comprehensive on-site collect-and-test service, demonstrating its capability to deliver testing

anywhere, anytime, including in remote locations. The System's speed and non-invasive nature enabled testing to be completed before 8:00 a.m., well ahead of the full day allocated, allowing Council staff to resume work immediately. The Council expressed satisfaction with the confirmation rate of non-negative results, validating the System's high level of accuracy.

"INBS' process was handled professionally from start to finish," said Adele Bintley, Manager of People, Culture and Organizational Performance at Barcaldine Regional Council. "We were impressed by how quickly testing was completed and how seamlessly the entire process was coordinated. It's an excellent solution for remote councils like ours."

Following the initial test, Council personnel were trained to conduct random testing in-house, with plans for complete workforce tests to continue through the Company's on-site testing model. This deployment has opened a new market for the Company, showing that a fully managed, on-location service is viable and valuable in regional settings.

"The ability to test an entire workforce in such a short window and still achieve high levels of accuracy is a key benefit of our fingerprint-based system," continued Doug Heath, Global Vice President of Sales at Intelligent Bio Solutions. "It supports safer workplaces without compromising productivity, particularly in regional and remote areas where traditional methods can be logistically and operationally challenging."

This successful rollout expands on the Company's growth efforts across the Asia-Pacific region, with further expansion expected as demand for safer, faster, and more practical workplace drug testing continues to rise. The Company's Intelligent Fingerprinting Drug Screening System is designed to detect recent drug use through fingerprint sweat analysis, providing results in under ten minutes. With over 450 accounts across 24 countries, INBS continues to lead the evolution of drug screening technology, serving industries including construction, manufacturing, transport, and logistics.

About Intelligent Bio Solutions Inc.

Intelligent Bio Solutions Inc. (NASDAQ: INBS) is a medical technology company delivering intelligent, rapid, non-invasive testing solutions. The Company believes that its Intelligent Fingerprinting Drug Screening System will revolutionize portable testing through fingerprint sweat analysis, which has the potential for broader applications in additional fields. Designed as a hygienic and cost-effective system, the test screens for the recent use of drugs commonly found in the workplace, including opiates, cocaine, methamphetamine, and cannabis. With sample collection in seconds and results in under ten minutes, this technology would be a valuable tool for employers in safety-critical industries. The Company's current customer segments outside the US include construction, manufacturing and engineering, transport and logistics firms, mining, drug treatment organizations, and coroners.
