Glossary

ACL	Allowance for credit losses
ALCO	Asset/Liability Committee
ALLL	Allowance for loan and lease losses
AOCI	Accumulated other comprehensive income (loss)
“the banks” or “our banks”	Wintrust’s fifteen wholly-owned-banking subsidiaries
Basel III	The third Basel accord developed by the Basel Committee on Banking Supervision to strengthen existing regulatory capital requirements
U.S. Basel III Rule	Final capital rules adopting the Basel III capital framework approved by U.S. federal regulators in 2013
Board	The Company’s Board of Directors
BOLI	Banked-owned life insurance
C&I	Commercial and industrial
CCB	Capital Conservation Buffer
CECL	Current expected credit losses
CET1	Common Equity Tier 1 Capital defined by Basel III capital rules
Company	Wintrust Financial Corporation
CRE	Commercial real estate
DIF	Deposit Insurance Fund
DTL	Deferred tax liability
Federal Reserve	Board of Governors of the Federal Reserve System
FDIC	Federal Deposit Insurance Corporation
FHLB	Federal Home Loan Bank
Form 10-K	Refers to the Annual Report on Form 10-K that is filed with the Securities and Exchange Commission by Wintrust Financial Corporation
Form 10-Q	Refers to the Quarterly Report on Form 10-Q that is filed with the Securities and Exchange Commission by Wintrust Financial Corporation
FR Y-9C	Refers to the Consolidated Financial Statements for Holding Companies that is filed quarterly with the Federal Reserve Board by Wintrust Financial Corporation
FRB	Federal Reserve Bank
GAAP	Generally Accepted Accounting Principles (U.S.)
HVCRE	High Volatility Commercial Real Estate Loans
MD&A	Management’s Discussion and Analysis of Financial Conditions and Results of Operations
NAICS	North American Industry Classification System
OCC	Office of the Comptroller of the Currency
PSE	Public sector entity
RWA	Risk-weighted assets
SEC	Securities and Exchange Commission
WTFC	Wintrust Financial Corporation

Background and Overview

Basel III is a set of international banking measures that established a framework to strengthen the regulation, supervision, and risk management of banks and bank holding companies. Under the Basel III Rules, Wintrust Financial Corporation, an Illinois corporation (“we,” “our,” “Wintrust” or “the Company”), is designated as a standardized approach bank holding company.

With respect to capital adequacy, the U.S. Basel III Rule includes a standardized approach for components of capital ratios including risk-weightings of assets and off-balance sheet exposures, as well as other adjustments, to derive the regulatory capital ratios. The Company is currently not subject to the market risk capital component of the U.S. Basel III Rule, which applies only to banking institutions with significant trading activity.

This document and certain of the Company’s public filings present the Regulatory Capital Disclosures in compliance with Sections 217.61-217.63 of the U.S. Basel III Rule. The Company’s 2023 Form 10-K contain management’s discussion and analysis of the overall risk profile of the Company and related management strategies. The information presented herein should be read in conjunction with our 2023 Form 10-K, as well as the Consolidated Financial Statements for Holding Companies - FR Y-9C dated December 31, 2023.

Scope of Application

General

The Company was incorporated in 1992 and is a financial holding company based in Rosemont, Illinois, with total assets of approximately \$56.3 billion as of December 31, 2023. We provide community-oriented, personal and commercial banking services to customers generally located in the Chicago metropolitan area, southern Wisconsin, and northwest Indiana (“our market area”) through our fifteen wholly-owned-banking subsidiaries (collectively, the “banks”), as well as the origination and purchase of residential mortgages for sale into the secondary market through Wintrust Mortgage, a division of Barrington Bank & Trust Company, N.A. (“Barrington Bank”).

Non-Bank Subsidiaries

In addition, we provide specialty finance services, including financing for the payment of property and casualty insurance premiums and life insurance premiums (“premium finance receivables”) on a national basis through FIRST Insurance Funding, a division of our wholly-owned subsidiary Lake Forest Bank & Trust Company, N.A. (“Lake Forest Bank”), and Wintrust Life Finance, a division of Lake Forest Bank, and in Canada through our premium finance company, First Insurance Funding of Canada (“FIFC Canada”), an indirect subsidiary of Lake Forest Bank, lease financing and other direct leasing opportunities through our wholly-owned subsidiary, Wintrust Asset Finance, Inc. (“Wintrust Asset Finance”), and short-term accounts receivable financing and outsourced administrative services through our wholly-owned subsidiary, Tricom, Inc. of Milwaukee (“Tricom”). Further, we provide a full range of wealth management services primarily to customers in our market area through four separate subsidiaries, The Chicago Trust Company, N.A. (“CTC”), Wintrust Investments, LLC (“Wintrust Investments”), Great Lakes Advisors, LLC (“Great Lakes Advisors”) and Chicago Deferred Exchange Company, LLC (“CDEC”).

Basis of Consolidation

The consolidated financial statements of the Company include the accounts of the Company and its subsidiaries. All significant intercompany accounts and transactions have been eliminated in the consolidated financial statements. The accounting and reporting policies of the Company and its subsidiaries conform to generally accepted accounting principles in the United States and prevailing practices of the banking industry. For additional information, refer to “Part II - Item 8. Financial Statements and Supplementary Data - Note 1 - Summary of Significant Accounting Policies” in the Company’s 2023 Form 10-K.

Regulation of the Company

The Company is a bank holding company under the Bank Holding Company Act of 1956, as amended (the “BHC Act”), subject to regulation, supervision, and examination by the Federal Reserve. Each nationally-chartered bank is subject to regulation, supervision and regular examination by the OCC. The deposits of all of our subsidiary banks are insured by the Deposit Insurance Fund (“DIF”) and, as such, the FDIC has additional oversight authority over the banks. The supervision, regulation and examination of banks and bank holding companies by bank regulatory agencies are intended primarily for the protection of depositors, the DIF, and the banking system as a whole, rather than shareholders of banks and bank holding companies, and in some instances may be contrary to shareholders’ interests.

We are a legal entity separate and distinct from our banking and non-banking subsidiaries. Since our consolidated net income consists largely of net income of our bank and non-bank subsidiaries, our ability to pay dividends and repurchase shares depends upon our receipt of dividends from our subsidiaries. There are various federal and state law limitations on the extent to which our banking subsidiaries can declare and pay dividends to us, including regulatory capital requirements, general regulatory oversight to prevent unsafe or unsound practices and federal and state banking law requirements concerning the payment of dividends out of net profits or surplus. Applicable banking laws also prohibit, without prior regulatory approval, insured depository institutions, such as our bank subsidiaries, from making dividend distributions if such distributions are not paid out of available earnings. In addition, our right, and the right of our shareholders and creditors, to participate in any distribution of the assets or earnings of our bank and non-bank subsidiaries is further subject to the prior claims of creditors of our subsidiaries. No assurances can be given that the banks will, in any circumstances, pay dividends to the Company.

Our ability to declare and pay dividends to our shareholders is similarly limited by federal banking law and Federal Reserve regulations and policy. Federal Reserve policy provides that a bank holding company should not pay dividends unless (1) the bank holding company’s net income over the last four quarters (net of dividends paid) is sufficient to fully fund the dividends, (2) the prospective rate of earnings retention appears consistent with the capital needs, asset quality and overall financial condition of the bank holding company and its subsidiaries and (3) the bank holding company will continue to meet minimum required capital adequacy ratios. The policy also provides that a bank holding company should inform the Federal Reserve reasonably in advance of declaring or paying a dividend that exceeds earnings for the period for which the dividend is being paid or that could result in a material adverse change to the bank holding company’s capital structure. Bank holding companies also are required to consult with the Federal Reserve before materially increasing dividends. The Federal Reserve could prohibit or limit the payment of dividends by a bank holding company if it determines that payment of the dividend would constitute an unsafe or unsound practice.

In addition, certain transactions between a bank and its holding company or other non-bank affiliates are subject to various restrictions imposed by state and federal law and regulation. Such “covered transactions” include loans and other extensions of credit by the bank to the affiliate, investments in securities issued by the affiliate and purchases of assets from the affiliate. In general, these affiliate transaction rules limit the amount of covered transactions between an institution and a single affiliate, as well as the aggregate amount of covered transactions between an institution and all of its affiliates. In addition, covered transactions that are credit transactions must be secured by acceptable collateral, and all affiliate transactions, including those that do not qualify as covered transactions, must be on terms that are at least as favorable to the bank as then-prevailing in the market for comparable transactions with unaffiliated entities. Transactions between affiliated banks may be subject to certain exemptions under applicable federal law.

Additional information relating to our business and our subsidiaries, including a detailed description of our financial results for the years ended December 31, 2021, 2022, and 2023 is contained in "Part II - Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company’s 2023 Form 10-K.

Forward Looking Statements

This document contains and the documents incorporated by reference may contain, forward-looking statements within the meaning of federal securities laws. Forward-looking information often can be identified through the use of words such as “intend,” “plan,” “project,” “expect,” “anticipate,” “believe,” “estimate,” “contemplate,” “possible,” “will,” “may,” “should,” “would” and “could.” Forward-looking statements and information are not historical facts, are premised on many factors and assumptions, and represent only management’s expectations, estimates and projections regarding future events. Similarly, these statements are not guarantees of future performance and involve certain risks and uncertainties that are difficult to predict, and which may include, but are not limited to, those listed in the Risk Factors discussed under Item 1A of the Company’s 2023 Annual Report on Form 10-K and in any of the Company’s other filings with the SEC. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of invoking these safe harbor provisions. Such forward-looking statements may be deemed to include, among other things, statements relating to the Company’s future financial performance, the performance of its loan portfolio, the expected amount of future credit reserves and charge-offs, delinquency trends, growth plans, regulatory developments, securities that the Company may offer from time to time, and plans to form additional de novo banks or branch offices, and management’s long-term performance goals, as well as statements relating to the anticipated effects on the Company’s financial condition and results of operations from expected developments or events, the Company’s business and growth strategies, including future acquisitions of banks, specialty finance or wealth management businesses, internal growth and plans to form additional de novo banks or branch offices. Actual results could differ materially from those addressed in the forward-looking statements as a result of numerous factors.

Therefore, there can be no assurances that future actual results will correspond to these forward-looking statements. The reader is cautioned not to place undue reliance on any forward-looking statement made by the Company. Any such statement speaks only as of the date the statement was made or as of such date that may be referenced within the statement. The Company undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events after the date of this report. Persons are advised, however, to consult further disclosures management makes on related subjects in its reports filed with the SEC and in its press releases.

Summary of Capital Structure

The Company and our subsidiary banks are required to maintain minimum risk-based and leverage capital ratios, as well as a capital conservation buffer (“CCB”), pursuant to regulations adopted by the Federal Reserve and the OCC to implement the Basel III capital framework.

Regulatory capital requirements apply to CET1 capital, Tier 1 capital and total capital.

- CET1 capital consists primarily of common stock and related surplus (net of treasury stock), retained earnings, and certain minority interests, subject to certain regulatory adjustments. For us and our subsidiary banks, CET1 capital does not include most elements of accumulated other comprehensive income (“AOCI”) because we exercised an opt-out election that was available to us with respect to certain changes in the capital treatment of AOCI. We made this election to avoid variations in the level of our capital depending on fluctuations in the fair value of our securities and derivatives portfolio.
- Tier 1 capital is composed of CET1 capital and Additional Tier 1 capital. Additional Tier 1 capital consists primarily of non-cumulative perpetual preferred stock and related surplus, certain minority interests and, subject to certain regulatory limits, certain grandfathered cumulative perpetual preferred stock and certain grandfathered trust preferred securities.
- Total capital is composed of Tier 1 capital and Tier 2 capital. Tier 2 capital consists primarily of capital instruments and related surplus meeting specified requirements, and may include cumulative preferred stock and long-term perpetual preferred stock, mandatory convertible securities, intermediate preferred stock, certain trust preferred securities and subordinated debt. Also included in Tier 2 capital is the allowance for credit losses limited to a maximum of 1.25% of RWAs and, for institutions that have exercised the opt-out election regarding the treatment of AOCI up to 45% of net unrealized gains on available-for-sale equity securities with readily determinable fair market values.

Certain adjustments to and deductions from capital are required for purposes of calculating these regulatory capital measures, including with respect to goodwill, intangible assets, certain deferred tax assets, AOCI and investments in the capital instruments of unconsolidated financial institutions. In July 2019, the U.S. bank regulators finalized changes to certain aspects of the U.S. Basel III Rule that simplified, for certain bank holding companies and banks, including us and our subsidiary banks, the framework for capital deductions for mortgage servicing assets, certain deferred tax assets and investments in the capital instruments of unconsolidated financial institutions, and the recognition of minority interests in regulatory capital. These amendments were effective as of April 1, 2020.

The following table presents the Company's total regulatory capital and the components of capital used in calculating CET1 capital, Tier 1 capital, and Total capital at December 31, 2023:

<u>(In thousands)</u>	<u>December 31, 2023</u>
CET1 Capital:	
Shareholders Equity	\$ 2,002,858
Retained Earnings	3,371,059
Accumulated other comprehensive income (loss), net	(361,231)
CET1 Capital Before Regulatory Adjustments	\$ 5,012,686
Regulatory Adjustments:	
Less: Goodwill, net of associated DTLs	621,571
Less: Intangible assets, net of associated DTLs	16,835
Less: AOCI-related adjustments	(313,793)
CET1 Capital	\$ 4,688,073
Preferred Stock	412,500
Tier 1 Capital	\$ 5,100,573
Tier 2 Capital	939,494
Total Capital	\$ 6,040,067

Capital Adequacy

The Company and the banks are subject to various regulatory capital requirements established by the federal banking agencies that take into account risk attributable to balance sheet and off-balance sheet activities. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the banks must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company manages the capital positions of itself and the banks to comply with these regulatory capital requirements and to meet the well-capitalized standards applicable to our bank subsidiaries.

Under the U.S. Basel III Rule, the Company and our subsidiary banks are required to maintain the following minimum capital ratios:

- Tier 1 capital to quarterly average assets (net of goodwill, certain other intangible assets and certain other deductions) ratio ("Tier 1 Leverage Ratio") of 4.0%;
- Tier 1 capital to RWAs ratio ("Tier 1 Capital Ratio") of 6.0%;
- CET1 capital to RWAs ratio ("CET1 Capital Ratio") of 4.5%; and
- Total capital to RWAs ratio ("Total Capital Ratio") of 8.0%.

To be well-capitalized, our subsidiary banks must maintain the following capital ratios:

- Tier 1 Leverage Ratio of 5.0% or greater.
- Tier 1 Capital Ratio of 8.0% or greater;
- CET1 Capital Ratio of 6.5% or greater; and
- Total Capital Ratio of 10.0% or greater.

The Federal Reserve has not yet revised the well-capitalized standard for bank holding companies to reflect the higher capital requirements imposed under the U.S. Basel III Rule. For purposes of the Federal Reserve's Regulation Y, including determining whether a bank holding company meets the requirements to be a financial holding company, bank holding companies, such as the Company, must maintain a Tier 1 Capital Ratio of 6.0% or greater and a Total Capital Ratio of 10.0% or greater to be well-capitalized. If the Federal Reserve were to apply the same or a very similar well-capitalized standard to bank holding companies as that applicable to our subsidiary banks, the Company's capital ratios as of December 31, 2023 would exceed such revised well-capitalized standard. The Federal Reserve may require bank holding companies, including us, to maintain capital ratios substantially in excess of mandated minimum levels, depending upon general economic conditions and a bank holding company's particular condition, risk profile and growth plans.

The following table presents the Company's RWAs as of December 31, 2023, by exposure type, based on the standardized approach definitions under the U.S. Basel III Rule:

	December 31, 2023	
(In thousands)	RWA Amount	
Exposure to sovereign entities	\$	1,542,131
Exposure to depository institutions and foreign banks		78,228
Exposures to PSEs		69,518
Corporate exposures		142,540
Residential mortgages exposures		2,157,894
Statutory multifamily mortgage exposures		226,572
HVCRE loans		144,813
Past due and non-accrual loans		183,419
Other loans		37,237,973
Other assets		2,607,648
Equity exposures		144,165
Trading assets		1,406
Total on-balance sheet assets	\$	44,536,307
Letters of credit		311,716
Loan commitments with original maturity within 1 year		422,845
Loan commitments with original maturity over 1 year		4,171,575
Off-balance sheet securitization exposures		176,790
Other off-balance sheet items		104,342
Total off-balance sheet items	\$	5,187,268
Total RWAs	\$	49,723,575

Capital Ratios and Capital Conservation Buffer

Under the U.S. Basel III Rule, the Company and its banking subsidiaries must maintain a minimum Capital Conservation Buffer (CCB) of 2.5% on top of the minimum required risk-based capital ratios in order to avoid specified limitations on capital distributions and discretionary bonus payments. The CCB is designed to absorb losses during periods of economic stress. Banking institutions with ratios that are above the minimum but below the CCB face constraints on dividends, equity repurchases and discretionary bonus payments to executive officers based on the amount of the shortfall. The CCB is calculated as the lowest of the (i) CET1 ratio less the CET1 stated minimum ratio requirement, (ii) Tier 1 ratio less the Tier 1 stated minimum ratio requirement, and (iii) Total capital ratio less the Total capital stated minimum ratio requirement. The Company and its banking subsidiaries surpass the CCB requirements. The Company's capital ratios were all above the minimum levels required to be considered a "well-capitalized" financial institution as of December 31, 2023, under the "prompt corrective action" regulations. For reference see Note (19) "Regulatory Matters" and the "Liquidity and Capital Resources" section of the MD&A in the Company's 2023 Form 10-K.

The maximum dollar amount that a banking organization can pay in the form of discretionary bonus payments or capital distributions during the current quarter is equal to the maximum payout ratio multiplied by the banking organization's eligible retained income. Eligible retained income is defined as the greater of a banking organization's net income (as reported in the banking organization's quarterly regulatory reports) for the four quarters preceding the current quarter, net of any capital distributions and associated tax effects not already reflected in net income or the average of the most recent four quarters' net income. The Company had \$518.2 million of eligible retained income as of December 31, 2023.

Wintrust is not subject to any limitations on its capital distributions or discretionary bonus payments to executive officers, as its capital levels exceeded defined minimums, inclusive of the CCB, at December 31, 2023.

The following table reflects the Company's reported regulatory capital ratios as of December 31, 2023 and the corresponding minimum requirement guidelines applicable to the Company.

	December 31, 2023	Minimum Capital Requirements	Minimum Ratio + CCB	Well Capitalized Threshold
Tier 1 leverage ratio	9.3 %	4.0 %	N/A	N/A
<u>Risk-based capital ratios:</u>				
Tier 1 capital ratio	10.3	6.0	8.5	6.0
CET1 capital ratio	94.0	4.5	7.0	N/A
Total capital ratio	12.1	8.0	10.5	10.0

The following table presents the reported regulatory capital ratios for each of the Company's fifteen wholly owned-banking subsidiaries as of December 31, 2023:

	December 31, 2023		
	Total Capital Ratio (to Risk Weighted Assets):	Tier 1 Capital Ratio (to Risk Weighted Assets):	CET1 Capital Ratio (to Risk Weighted Assets):
Lake Forest Bank	12.5 %	11.8 %	11.8 %
Hinsdale Bank	11.8	11.0	11.0
Wintrust Bank	11.9	10.8	10.8
Libertyville Bank	12.3	11.5	11.5
Barrington Bank	11.6	11.2	11.2
Crystal Lake Bank	12.7	11.9	11.9
Northbrook Bank	12.3	11.5	11.5
Schaumburg Bank	11.3	10.6	10.6
Village Bank	11.9	11.0	11.0
Beverly Bank	11.5	10.7	10.7
Town Bank	11.7	11.1	11.1
Wheaton Bank	11.5	10.8	10.8
State Bank of the Lakes	11.9	11.5	11.5
Old Plank Trail Bank	11.3	10.7	10.7
St. Charles Bank	11.5	10.7	10.7

Credit Risk

The allowance for credit losses represents management’s estimate of expected credit losses over the life of a financial asset carried at amortized cost. At December 31, 2023, the loan and held-to-maturity debt securities portfolios represent 82% of the total assets on the Company’s consolidated balance sheet. The Company also maintains an allowance for lending-related commitments, specifically unfunded loan commitments and letters of credit, which relates to certain amounts the Company is committed to lend (not unconditionally cancelable) but for which funds have not yet been disbursed.

In accordance with Accounting Standards Codification (“ASC”) 326, the Company is required to measure the allowance for credit losses of financial assets with similar risk characteristics on a collective or pooled basis. In considering the segmentation of financial assets measured at amortized cost into pools, the Company considered various risk characteristics in its analysis. Generally, the segmentation utilized represents the level at which the Company develops and documents its systematic methodology to determine the allowance for credit losses for the financial assets held at amortized cost, specifically the Company’s loan portfolio and debt securities classified as held-to-maturity. Descriptions of the Company’s loan portfolio segments and major debt security types are included in Note (5) “Allowance for Credit Losses” of the Company’s 2023 Form 10-K.

The Company’s policy for determining loan past due or delinquent status, for placing loans on nonaccrual, and returning loans to accrual status, identifying impaired loans, valuing and monitoring collateral, charging-off uncollectible amounts, and discussion of the Company’s policy for credit risk management are included in the “Loan Portfolio and Asset Quality” section of the MD&A and Note (5) “Allowance for Credit Losses” in the Company’s 2023 Form 10-K.

The following two tables provide the distribution of loans and related commitments by geography and industry, respectively, at December 31, 2023:

<u>(Dollars in thousands)</u>	Commercial	Commercial real estate	Home equity	Residential real estate	Premium finance receivables	Consumer and Other	Total	Percent of Total

The Company's investment securities portfolio includes U.S. Treasury securities, government agency securities, municipal securities, corporate debt securities and government agency issued mortgage-backed securities, commercial multi-family mortgage-backed securities and collateralized mortgage obligations. We evaluate the credit risk of the securities portfolio using a variety of factors. The most important feature management relies on when assessing credit risk for agency guaranteed mortgage-backed securities, collateralized mortgage obligations and agency securities is the explicit or implicit guarantee of the federal government or its agencies. Geography is typically not one of the primary factors we consider in managing our investment securities portfolio, with the exception of municipal securities. Refer to Note (3) "Investment Securities" in our December 31, 2023 Form 10-K for further information.

The following table presents the amortized cost and relative percentage of our municipal securities by geography:

(Dollars in thousands)	December 31, 2023			
	AFS	Percent of Total AFS Municipals	HTM	Percent of Total HTM Municipals
Illinois	\$ 125,313	87 %	\$ 128,493	74 %

Counterparty Credit Risk-Related Exposures

Derivative instruments have inherent risks, primarily market risk and credit risk. Market risk is associated with changes in the value of an underlying asset. Credit risk relates to the risk that the counterparty will fail to perform according to the terms of the agreement. The Company is exposed to the credit risk of its commercial borrowers who are counterparties to interest rate derivatives with the Company.

This counterparty credit risk related to the commercial borrowers is managed and monitored through the banks' standard underwriting process applicable to loans since these derivatives are secured through collateral provided by the loan agreement. The counterparty credit risk associated with the mirror-image swaps executed with third party financial institutions, is monitored and managed as par of the Company's overall asset liability management process. Except that the counterparty credit risk related to derivatives entered into with certain qualified borrowers is managed through the Company's standard loan underwriting process for commercial borrowers since these derivatives typically share in the collateral provided by the loan agreements.

When deemed necessary, appropriate types and amounts of collateral are obtained to minimize credit exposure. The Company hedges the market risk of derivatives transactions with commercial borrowers by entering into offsetting transactions with large, highly rated financial institutions. These exposures are generally secured by cash under bilateral Credit Support Annexes (CSAs), which are a component of the ISDA Master Agreements executed with counterparties.

Aggregate counterparty exposures are monitored against various types of credit limits established to contain risk within parameters. Counterparty credit risk is managed by the Counterparty Credit Risk Management team in accordance with SR 11-10, *Interagency Counterparty Credit Risk Guidance*, which was issued in 2011 in response to the financial crisis of 2008. The guidance addresses counterparty credit risk governance, measurement, management, and systems. Specifically, counterparty risk is managed through the establishment and regular review of exposure limits, formalization of limits in policy and procedure, ongoing review of models, and having a single platform to allow for the timely aggregation of exposures. The Counterparty Credit Risk Management team uses a variety of approaches to monitor counterparty financial performance, including monitoring of credit exposure vs. limits, use of early warning reports, and daily and intraday monitoring of financial developments.

The Company has agreements with certain of its interest rate derivative counterparties that contain cross-default provisions, which provide that if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations. The Company also has agreements with certain of its derivative counterparties that contain a provision allowing the counterparty to terminate the derivative positions if the Company fails to maintain its status as a well or adequately capitalized institution, which would require the Company to settle its obligations under the agreements. If the Company were to breach any of these provisions, at a time when the derivatives subject to such agreements are in a liability position, and the derivatives were to be terminated as a result, the Company would be required to settle its obligations under the agreements at the termination value and would be required to pay any additional amounts due in excess of amounts previously posted as collateral with the respective counterparty. As of December 31, 2023, there were no interest rate derivatives in a net liability position that were subject to such agreements.

The table below presents the fair value of the Company's derivative financial instruments as of December 31, 2023:

(In thousands)	Derivative Assets		Derivative Liabilities		Notional Amount
Derivatives designated as hedging instruments under ASC 815:					
Interest rate derivatives designated as Cash Flow Hedges	\$	40,116	\$	44,456	\$ 6,700,000
Interest rate derivatives designated as Fair Value Hedges		12,349		273	218,380
Total derivatives designated as hedging instruments under ASC 815	\$	52,465	\$	44,729	\$ 6,918,380
Derivatives not designated as hedging instruments under ASC 815:					
Interest rate derivatives	\$	211,490	\$	210,397	\$ 11,409,015
Interest rate lock commitments		4,511		—	129,921
Forward commitments to sell mortgage loans		—		5,212	629,859
Commodity forward contracts		888		609	8,418
Foreign exchange contracts		6,372		6,308	144,347
Total derivatives not designated as hedging instruments under ASC 815	\$	223,261	\$	222,526	\$ 12,321,560
Total Derivatives	\$	275,726	\$	267,255	\$ 19,239,940

The Company records interest rate derivatives subject to master netting agreements at their gross value and does not offset derivative assets and liabilities on the Consolidated Statements of Condition. The table below summarizes the Company's credit exposure to derivatives and offsetting positions as of December 31, 2023.

(In thousands)	Derivative Assets		Derivative Liabilities	
	Fair Value		Fair Value	
	December 31, 2023		December 31, 2023	
Gross Amounts Recognized	\$	263,955	\$	255,126
Less: Amounts offset in the Statements of Condition		—		—
Net amount presented in the Statements of Condition	\$	263,955	\$	255,126
Gross amounts not offset in the Statements of Condition				
Offsetting Derivative Positions		(76,514)		(76,514)
Collateral Posted - Cash on deposit with the Company		(144,899)		—
Net Credit Exposure	\$	42,542	\$	178,612

The Company had no credit derivatives during the quarter ended December 31, 2023.

Credit Risk Mitigation

The Company seeks to mitigate credit risk in various ways. For counterparty credit risk we use master netting arrangements. For lending-related transactions, guarantees from third parties as well as collateral such as cash, securities, accounts receivable, real estate, equipment and inventories can significantly reduce the Company's credit risk.

The U.S. Basel III Rule allows eligible financial collateral, eligible guarantees, and eligible credit derivatives to be recognized in the calculation of RWAs. When financial collateral is obtained that qualifies as eligible collateral under the U.S. Basel III Rule, the eligible collateral can be substituted for the collateralized portion of the credit

exposure in the RWA calculation. For eligible guarantees received, the risk weight applicable to the eligible guarantor would apply to the exposure covered by the guarantee.

The following table provides information regarding our credit risk exposures that are covered by eligible financial collateral, as of December 31, 2023.

(In thousands)	Collateral Type	Exposure Amount Secured by Eligible Collateral	
Loans	Cash on deposits at Banks	\$	268,646
Letters of Credit	Cash on deposits at Banks		88,936

The following table provides information regarding our credit risk exposures that are covered by eligible guarantees, as of December 31, 2023.

(In thousands)	Guarantor	Exposure Amount	RWAs
Loans	U.S. Government and agencies	\$ 362,231	\$ 70,056

Securitization

The U.S. Basel III Rule defines a securitization exposure as an exposure that meets the following criteria:

- All or a portion of the credit risk of one or more underlying exposures is transferred to one or more third parties;
- The credit risk associated with the underlying exposures has been separated into at least two tranches reflecting different levels of seniority;
- Performance of the securitization exposure depends on performance of the underlying exposures;
- All or substantially all of the underlying exposures are financial exposures;
- The underlying exposures are not owned by an operating company; and
- The underlying exposures are not owned by a small business investment company or related to a community development investment.

Securitization exposures entail various risks, including credit and seller risk. Credit risk emerges from the performance of the underlying asset pool, encompassing factors like payment rates, dilution, and write-offs/losses. Seller risk involves the risk of breach of representation or warranties regarding the underlying exposures or the failure to fulfill its obligations as per the securitization agreement.

The Company and its subsidiaries did not hold any securitizations exposures as of December 31, 2023.

Equities Not Subject to the Market Risk Rule

Equity exposure refers to a security or instrument that represents a direct or indirect ownership interest in, and is a residual claim on, the assets and income of a company. The Company's equity exposure consist exclusively of non-public equity securities, FRB common stock and FHLB common stock. As members of the Federal Reserve System and FHLB, the Company is required to purchase and hold shares of capital stock in the FRB and in the FHLB, respectively. Shares in the FRB and FHLB are recorded at amortized cost, which approximates fair value. Under regulatory rules, these equities are reported in other assets because they do not have readily determinable fair values.

Equity investments without a readily determinable fair value are carried at cost minus impairment with adjustments through earnings for observable price changes in orderly transactions for the identical or a similar investment of the same issuer. The Company accounts for all qualifying tax credit equity investments under the proportional amortization method. Under this method an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance as a component of income tax expense. Tax credit equity investments that do not qualify for the proportional amortization method are accounted

for using the equity method. Refer to Note (1) “Summary of Significant Accounting Policies” and Note (22) “Fair Values of Assets and Liabilities” in our 2023 Form 10-K for a discussion of the accounting for these investments.

The following table summarizes the balance sheet carrying value of the Company’s equity securities, as of December 31, 2023.

(In thousands)	December 31, 2023	
	Book Value	Fair Value
Non-publicly traded	\$ 426,771	\$ 404,270
Publicly Traded	N/A	N/A

The following table summarizes the capital requirements of equity investment exposures by risk-weighting as of December 31, 2023:

(Dollars in thousands)	December 31, 2023		
	Risk-Weight Category	Exposure Amount	RWA Amount
Federal Reserve Bank stock	0 %	\$ 80,605	\$ —
Federal Home Loan Bank stock	20 %	124,397	24,879
Equity Exposures ⁽¹⁾	54 %	221,769	119,286
Total		\$ 426,771	\$ 144,165

(1) Includes the weighted average risk-weight among various exposures.

Wintrust had no realized gains/(losses) due to the sale or liquidation of equity securities during the fourth quarter of 2023. There were no significant unrealized gains/(losses) included in Tier 1 or Tier 2 capital at December 31, 2023.

Interest Rate Risk for Non-Trading Activities

As an ongoing part of its financial strategy, the Company attempts to manage the impact of fluctuations in market interest rates on net interest income. This effort entails providing a reasonable balance between interest rate risk, credit risk, liquidity risk and maintenance of yield. Asset-liability management policies are established and monitored by management in conjunction with the boards of directors of the banks, subject to general oversight by the Risk Management Committee of the Board of Directors. The policies establish guidelines for acceptable limits on the sensitivity of the market value of assets and liabilities to changes in interest rates.

Interest rate risk arises when the maturity or re-pricing periods and interest rate indices of the interest-earning assets, interest-bearing liabilities, and derivative financial instruments are different. It is the risk that changes in the level of market interest rates will result in disproportionate changes in the value of, and the net earnings generated from, the Company’s interest-earning assets, interest-bearing liabilities and derivative financial instruments. The Company continuously monitors not only the organization’s current net interest margin, but also the historical trends of these margins. In addition, management attempts to identify potential adverse changes in net interest income in future years as a result of interest rate fluctuations by performing simulation analysis of various interest rate environments. If a potential adverse change in net interest margin and/or net income is identified, management would take appropriate actions with its asset-liability structure to mitigate these potentially adverse situations.

Since the Company’s primary source of interest-bearing liabilities is from customer deposits, the Company’s ability to manage the types and terms of such deposits is somewhat limited by customer preferences and local competition in the market areas in which the banks operate. The rates, terms and interest rate indices of the Company’s interest-earning assets result primarily from the Company’s strategy of investing in loans and securities that permit the

Company to limit its exposure to interest rate risk, together with credit risk, while at the same time achieving an acceptable interest rate spread.

The Company's exposure to interest rate risk is reviewed on a regular basis by management and the Risk Management Committees of the boards of directors of the banks and the Company. The objective of the review is to measure the effect on net income and to adjust balance sheet and derivative financial instruments to minimize the inherent risk while at the same time maximizing net interest income.

The following interest rate scenarios display the percentage change in net interest income over a one-year time horizon assuming increases and decreases of 100 and 200 basis points. The Static Shock Scenario results incorporate actual cash flows and repricing characteristics for balance sheet instruments following an instantaneous, parallel change in market rates based upon a static (i.e. no growth or constant) balance sheet. Conversely, the Ramp Scenario results incorporate management's projections of future volume and pricing of each of the product lines following a gradual, parallel change in market rates over twelve months. Actual results may differ from these simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies. The interest rate sensitivity for both the Static Shock and Ramp Scenarios at December 31, 2023 is as follows:

<u>Static Shock Scenarios</u>	+200 Basis Points	+100 Basis Points	-100 Basis Points	-200 Basis Points
December 31, 2023	2.6 %	1.8 %	0.4 %	(0.7)%

<u>Ramp Scenarios</u>	+200 Basis Points	+100 Basis Points	-100 Basis Points	-200 Basis Points
December 31, 2023	1.6 %	1.2 %	(0.3)%	(1.5)%
