

Illustrative Table of Comparable Sales Calculation Methodology Revision

Beginning in fiscal 2025, the Company is revising its method for determining comparable sales. Comparable sales measure the growth in sales compared to the corresponding prior year period for its recurring revenue sources, including sales at the same store location as well as its digital revenue, including eCommerce sales, omni-channel transactions which are fulfilled by its stores, GameChanger subscriptions and its DICK'S media network.

Prior to fiscal 2025, the Company expected its Warehouse Sale stores to be temporary in nature and excluded revenue from these stores from comparable sales calculations. Based upon the operating life of these stores, however, the Company has determined that they are operating longer than initially expected. As a result, beginning in fiscal 2025, the Company will include these stores as part of its comparable sales beginning in the stores' 14th full month of operations, similar to the Company's other store locations. In addition, these stores will now be included as part of the Company's disclosed store counts and related square footage.

The table below presents quarterly and full year comparable sales results for fiscal 2024 calculated in the same manner as comparable sales will be calculated beginning in fiscal 2025. Such figures will be reflected as the Company's historical comparable sales results in the future.

DICK'S Sporting Goods, Inc

Comparable Sales Revisions

Fiscal 2024	As Reported	As Revised
Quarter ended May 4, 2024	5.3 %	5.3 %
Quarter ended August 3, 2024	4.5 %	4.5 %
