

NEWS RELEASE

Credo Chairman, President and CEO Bill Brennan Joins Global Semiconductor Alliance Board of Directors

2025-07-17

SAN JOSE, Calif.--(BUSINESS WIRE)-- **Credo Technology Group Holding Ltd** (Credo) (NASDAQ: CRDO) an innovator in providing secure, high-speed connectivity solutions that deliver improved energy efficiency, is pleased to announce that its Chairman, President and CEO, Bill Brennan, has been elected to the Board of Directors of the **Global Semiconductor Alliance** (GSA), the leading industry organization uniting the worldwide semiconductor industry.

Credo is pleased to announce that its Chairman, President and CEO, Bill Brennan, has been elected to the Board of Directors of the Global Semiconductor Alliance (GSA), the leading industry organization uniting the worldwide semiconductor industry.

As a GSA Board Member, Mr. Brennan will collaborate with industry leaders to drive innovation, address key

challenges, and strengthen the semiconductor ecosystem. GSA plays a critical role as a global voice for the industry, offering leadership, fostering meaningful collaboration, and promoting entrepreneurial growth across the semiconductor value chain.

"It's an honor to join GSA's Board of Directors and work alongside distinguished leaders shaping the future of our industry," said Bill Brennan, President and CEO of Credo. "Credo is committed to advancing energy-efficient and highly-reliable connectivity solutions critical to the next generation of cloud computing, AI, and hyperscale networks. I look forward to contributing Credo's perspective and helping GSA continue to drive innovation and collaboration across the global semiconductor landscape."

"We are excited to welcome Bill Brennan to the GSA Board of Directors," said Jodi Shelton, CEO of GSA. "His

expertise in high-speed connectivity solutions and deep understanding of emerging technology trends will be invaluable as we continue to support the growth and success of the global semiconductor ecosystem.”

About Credo

Credo’s mission is to advance high-speed connectivity solutions that deliver optimized performance, reliability, energy efficiency, and security for the next generation of AI driven applications, cloud computing, and hyperscale networks. Optimized for both optical and electrical applications, our solutions support port speeds up to 1.6Tb. At the core of our technology is our proprietary Serializer/Deserializer (SerDes) IP. Our diverse solutions portfolio includes system-level products such as Active Electrical Cables (AECs), a range of Integrated Circuits, including Retimers, Optical DSPs, SerDes chipsets, and SerDes IP Licensing.
