# L3Harris Expanding Huntsville Solid Rocket Motor Facility, Poised for Further Growth

2025-08-04

HUNTSVILLE, Ala.--(BUSINESS WIRE)-- L3Harris Technologies (NYSE: LHX) hosted local and state leaders and customers today to showcase its newest Solid Rocket Motor (SRM) production facility known as Advanced Manufacturing Facility – South (AMF-South). The site, the size of more than six football fields, is designed and equipped to support surging production demands and emerging missile defense needs, including President Donald Trump’s Golden Dome.

L3Harris was joined by state, local and DOD officials today at an event showcasing the Advanced Manufacturing Facility – South, a 379,000-square-foot facility dedicated to producing inert solid rocket motor components, in Huntsville, Alabama.

“Solid rocket motors remain essential to the vast majority of critical defense programs that protect our communities,

military and allies,” said Ken Bedingfield, President, Aerojet Rocketdyne, L3Harris. “Our growth in Huntsville represents another significant investment we are making to boost production capacity of critical components, and we’re proud that they are being made in Alabama.”

AMF-South features 379,000 square feet of space and specializes in manufacturing inert SRM components like nozzles, exit cones, aft closures and cases. L3Harris invested more than \$20 million in renovations to support the facility, which is designed to be scalable, efficient and highly flexible. AMF-South features equipment like hydraulic presses, autoclaves, tape-wrap systems and composite machining that will help deliver high-quality inert components faster and with greater precision. The company’s Title III Defense Production Act cooperative

agreement with the Department of Defense helped to fund additional equipment and tooling purchases.

AMF-South is currently supporting programs such as the Standard Missile, Guided Multiple Launch Rocket System and Javelin, with plans to support additional programs. Expansion efforts have already resulted in approximately 40 new jobs for the area, and the company expects to create more than 100 additional jobs to support operations at the site over the next few years.

“L3Harris’ continued growth in Huntsville is a testament to Alabama’s leadership in defense and aerospace innovation,” said Alabama Gov. Kay Ivey. “The opening of this advanced manufacturing facility strengthens our state’s role in supporting critical national security programs and brings high-quality jobs to North Alabama. I commend L3Harris for its commitment to investing in our workforce and fueling the next chapter of growth in the Rocket City.”

“This state-of-the-art defense manufacturing facility, spanning an impressive area equivalent to 6.5 football fields, is a testament to our state’s commitment to innovation and progress to support our warfighters,” said Sen. Tommy Tuberville, R-Ala. “L3Harris’ ongoing expansion is not only creating jobs but also reinforcing Huntsville as a leader in advanced manufacturing. I look forward to the incredible opportunities this facility will bring to Huntsville and the state of Alabama.”

“I am proud to see L3Harris expanding its solid rocket motor production right here in North Alabama,” said Rep. Dale Strong, R-Ala. “This investment not only strengthens our region’s role in supporting critical defense programs but also creates high-quality jobs for our residents. I look forward to seeing this facility grow and thrive in the years ahead as it drives innovation to help keep our nation safe.”

“Huntsville’s dynamic business climate is centered on workforce and technology, and this L3Harris state-of-the-art Advanced Manufacturing Facility is at the intersection of those priorities,” said Huntsville Mayor Tommy Battle. “With this new facility, L3Harris will continue its commitment to innovation and excellence by developing the latest technologies in inert manufacturing for solid rocket motors to support critical defense programs designed to protect our nation. Congratulations, and thank you for being an excellent community partner.”

L3Harris’ expanded AMF-South facility complements the existing 136,000-square-foot Advanced Manufacturing Facility – North in Huntsville, which opened in 2019.

## About L3Harris Technologies

L3Harris Technologies is the Trusted Disruptor in the defense industry. With customers’ mission-critical needs always in mind, our employees deliver end-to-end technology solutions connecting the space, air, land, sea and

cyber domains in the interest of national security. Visit [L3Harris.com](http://L3Harris.com) for more information.

## Forward-Looking Statements

This press release contains forward-looking statements that reflect management's current expectations, assumptions and estimates of future performance and economic conditions.
