

NEWS RELEASE

Poland Selects L3Harris Electronic Warfare System for F-16 Fleet

2025-08-28

MELBOURNE, Fla.--(BUSINESS WIRE)-- The government of Poland has selected L3Harris Technologies (NYSE: LHX) to provide its Viper Shield™ electronic warfare (EW) system for the country's F-16 Viper upgrade program.

Poland will purchase the AN/ALQ-254 Viper Shield system through the U.S. government to enhance the offensive and defensive capabilities of its current F-16 Block 52+ configuration. Viper Shield will equip Poland with the same advanced EW features available to other international allies operating the new F-16 Block 70 variant.

"We are honored Poland selected us to upgrade their F-16V multirole fighters," said Ed Zoiss, President, Space and Airborne Systems, L3Harris. "**Viper Shield** is in production and will enable pilots to identify, locate and counter rapidly evolving threats faster with enhanced success."

L3Harris is offering Viper Shield in a variety of installation options, including the integration into the Block 70/72 aircraft and a retrofit version for previous F-16 blocks. Viper Shield is also available as an external pod. Designed to be software-defined, Viper Shield ensures battlefield relevance by supporting future capability upgrades.

The company is providing this advanced suite to F-16 fleets in seven countries and is actively engaged in discussions with other U.S. allies and partner nations.
