# Space Development Agency Awards L3Harris \$843 Million Contract for Tracking Layer Satellites

2025-12-19

MELBOURNE, Fla.--(BUSINESS WIRE)-- L3Harris Technologies (NYSE: LHX) has received a contract from the Space Development Agency (SDA) to build 18 infrared satellites for the Tranche 3 (T3) Tracking Layer. The contract, valued up to \$843 million, includes ground software, operations and sustainment functions.

These tracking layer satellites will enhance the SDA Proliferated Warfighter Space Architecture (PWSA) constellation, which is designed to protect the United States from advanced missile threats, such as hypersonic missiles.

"L3Harris is proud to support SDA in its mission to deliver a next generation, layered defense architecture that can track threats in real time," said Christopher Kubasik, Chair and CEO, L3Harris. "Defeating the hypersonic missile threat begins in space, and our Tranche 3 satellites will advance our proven, on-orbit tracking and targeting capability needed to protect our homeland."

The L3Harris Tranche 3 Tracking Layer solution will provide higher resolution infrared sensing, advanced on-orbit data processing and real-time detection algorithms that will enable advanced missile tracking detection. Once on orbit, the satellites will integrate with the SDA PWSA to deliver broader coverage and enhanced direct-to-warfighter connectivity.

L3Harris is supporting SDA's Tracking Layer across all existing tranches of the PWSA. The company currently has four missile tracking satellites on orbit for **Tranche 0** and another 34 satellites in development across **Tranche 1** and **Tranche 2**.

L3Harris produces a range of proven technologies that could further enable a missile shield for America, including advanced space satellites, datalinks, multi-domain ISR, precision fire-control sensing, and propulsion and control systems for interceptors.

## About L3Harris Technologies

L3Harris Technologies is the Trusted Disruptor in the defense industry. With customers' mission-critical needs always in mind, our employees deliver end-to-end technology solutions connecting the space, air, land, sea and cyber domains in the interest of national security. Visit [L3Harris.com](http://L3Harris.com) for more information.

## Forward-Looking Statements

This press release contains forward-looking statements that reflect management's current expectations, assumptions and estimates of future performance and economic conditions. Such statements are made in reliance upon the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The company cautions investors that any forward-looking statements are subject to risks and uncertainties that may cause actual results and future trends to differ materially from those matters expressed in or implied by such forward-looking statements. Statements about the value or expected value of orders, contracts or programs are forward-looking and involve risks and uncertainties. L3Harris disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.
