US Army Awards L3Harris Second Full-Scale ENVG-B Production Order

2025-01-21

LONDONDERRY, N.H.--(BUSINESS WIRE)-- L3Harris Technologies (NYSE: LHX) has received a \$263 million order from the U.S. Army for continued production of the Enhanced Night Vision Goggle – Binocular (**ENVG-B**). This is the second order under the full-scale production Indefinite Delivery, Indefinite Quantity program, following a **similar award earlier this year**.

“Our innovative fused night-vision technology provides U.S. soldiers the most sophisticated capability available to identify and engage targets in limited light before adversaries see them,” said Sam Mehta, President, Communication Systems, L3Harris. “With the ability to extend the system as a communication hub or sensor, we can increase soldiers’ situational awareness and drive connectivity with the larger Integrated Tactical Network.”

“The defense industrial base in New Hampshire contributes immensely to our national security – and this new investment in L3Harris’ ENVG-B program will continue to fuel production of cutting-edge night vision capability for the warfighter in Londonderry,” said Sen. Jeanne Shaheen, D-N.H. “I’m proud of the L3Harris workforce here in New Hampshire and the important work they are doing to enhance our national defense.”

L3Harris has delivered more than 18,000 ENVG-B systems to the Army to date, providing industry-leading Figure of Merit levels and digital overlays that augment performance. L3Harris will continue enhancing ENVG-B and similar technologies through investments in night-vision technology, artificial intelligence and open-system architecture development to expand the device’s critical capabilities for the thousands of systems the Army will deploy.

The company has also delivered more than 28,000 advanced vision goggles to warfighters worldwide, including the company's **Binocular Night Vision Device – Fused** solution, demonstrating L3Harris' commitment to resilient capabilities.
