Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of NORCAL Insurance Company (NORCAL or the Company) are presented on the basis of accounting practices prescribed or permitted by the the California Department of Insurance.

The California Department of Insurance requires insurance companies domiciled in the State to prepare statutory basis financial statements in accordance with the National Association of Insurance Commissioners Accounting Practices and Procedure manual (NAIC SAP). As of this reporting date, the Company does not use prescribed or permitted practices that affect net income, statutory surplus or risk based capital that differ from NAIC SAP.

The term “none” or “no significant change” is used in the following notes to indicate that the Company does not have any items requiring disclosure under the respective note.

B. Use of Estimates in the Preparation of the Financial Statements - No Significant Changes

C. Accounting Policy

- (1) Short-term investments - No Significant Changes
- (2) Bonds not backed by loans are reported at amortized cost or at the lower of amortized cost or fair value, if rated NAIC 3 or below, in accordance with SSAP No. 26 - Bonds, Excluding Loan-Backed and Structured Securities. Premiums and discounts on bonds are amortized or accreted, respectively, over the life of the related debt security as an adjustment to yield using the scientific method. Interest income is recognized when it is earned.
- (3) Common stocks - No Significant Changes
- (4) Preferred stocks - No Significant Changes
- (5) Mortgage loans - None
- (6) Loan-backed securities are reported at amortized cost provided that the SVO's designation is 1 or 2. If the SVO's designation is 3 or greater, the security is reported at the lower of amortized cost or fair value. The Company uses the prospective method to make valuation adjustments when necessary.
- (7) Investments in subsidiaries, controlled and affiliated entities - No Significant Changes
- (8) Investments in joint ventures, partnerships and limited liability companies - No Significant Changes
- (9) Derivatives - None
- (10) Investment income as a factor in the premium deficiency calculation - No Significant Changes
- (11) Liabilities for losses and loss/claim adjustment expenses - No Significant Changes
- (12) Changes in capitalization policy - No Significant Changes
- (13) Pharmaceutical rebate receivables - None

D. Going Concern

Management has concluded that there is no doubt regarding the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

During the June 30, 2025 reporting period, the Company identified an error in the calculation of depreciation for leasehold improvement and office equipment assets. The depreciation was calculated using useful lives that were longer than the assets expected use. This was due to an error during the conversion to a new accounting system in 2021. This error did not have an impact on net surplus as of June 30, 2025 or December 31, 2024 as the net book value of the assets were non-admitted. In the June 30, 2025 income statement, there is an adjustment to surplus of \$1.8M for the prior period adjustment offset by a \$1.8M change in non-admitted fixed assets (Statement of Income page 4 line 37 and 27). Net income in the 2024 12 month period was overstated by \$382,000 and in the judgement of management is immaterial to the reported results. This error had no effect on the ordinary dividend paid in 2024.

3. Business Combinations and Goodwill

A. Statutory Purchase Method

The Company purchased 100% of PPM Insurance Services, Inc. (PPM) on January 1, 2017. PPM is a non-insurance holding company that controlled the premium written by Preferred Physicians Medical Risk Retention Group, a Mutual Insurance Company (RRG) in 2016 and prior.

These transactions were accounted for as statutory purchases and reflect the following:

- D. Asset-Backed Securities

(1) Prepayment assumptions for single-class and multi-class mortgage-backed/asset-backed securities were obtained from broker dealer survey values or internal estimates.

(2) Asset-backed securities with a recognized other-than-temporary impairment (OTTI) - None

(3) Securities held that were other-than-temporarily impaired due to the present value of cash flows expected to be collected was less than the amortized cost of securities - None

(4) All impaired securities for which an OTTI has not been recognized in earnings as a realized loss

For all loan-backed securities held at September 30, 2025 for which fair value is less than cost, but which have had no other-than-temporary impairment recognized in earnings, the following table displays balances, according to duration of the loss position:

a. The aggregate amount of unrealized losses:

1. Less than 12 months..... \$ (274,316).

2. 12 months or longer..... (26,806,542).

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months..... \$ 46,544,277 .

2. 12 months or longer..... 174,400,282 .

(5) The Company used pricing services in determining the fair value of its loan-backed securities. In determining that a security is not other-than-temporarily impaired, securities are analyzed for future cash flows by using current and expected losses, historical and expected prepayment speeds (based on Bloomberg and broker dealer survey values), and assumptions about recoveries relative to the seniority or subordination in the capital structure. If the results indicate that the Company will be able to maintain the current book yield, no other-than-temporary impairment is warranted.

9. Income Taxes (Continued)

- F. Consolidated Federal Income Tax Return
- (1) The Company, the domestic entities listed in Schedule Y (except ProAssurance American Mutual, A Risk Retention Group), and segregated portfolio P18, a segregated portfolio cell of Inova Re Ltd., S.P.C., are included in the consolidated federal income tax return of ProAssurance Corporation, the ultimate parent. The companies entered a Consolidated Tax Agreement effective September 1, 2021, as amended for California and Texas domestic insurers effective the same date. The Agreement was filed with and approved by the CADOI.
- (2) Except for the segregated portfolio P18, the method of allocation among companies is subject to a written agreement, approved by the Board of Directors, whereby allocation is made based upon separate return calculations in proportion to the total positive separate company taxable income of the group. Segregated portfolio P18 is subject to a separate written agreement with ProAssurance Corporation whereby allocation is made based upon a calculation of its separate company taxable income and the prohibition against the consolidated group's use of the segregated portfolio cell's loss against the income of other group members.
- G. Federal or Foreign Income Tax Loss Contingencies
- The company does not have any federal or foreign tax loss contingencies.
- H. Repatriation Transition Tax (RTT) - None

- (2) Fair value measurements in Level 3 of the fair value hierarchy - None
- (3) The Company's policy is to recognize transfers between levels at the end of the reporting period.
- (4) The Company values securities in the Level 1 category using unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

The Company values securities in the Level 2 category using market data obtained from sources independent of the reporting entity (observable inputs). Level 2 inputs generally include quoted prices in markets that are not active, quoted prices for similar assets or liabilities, and results from pricing models that use observable inputs such as interest rates and yield curves that are generally available at commonly quoted intervals.

The fair values for securities included in the Level 2 category have been developed by third party, nationally recognized pricing services. These services use complex methodologies to determine values for securities and subject the values they develop to quality control reviews. Management reviews service-provided values for reasonableness by comparing data among pricing services and to available market and trade data. Values that appear inconsistent are further reviewed for appropriateness. If a value does not appear reasonable, the valuation is discussed with the service that provided the value and would be adjusted, if necessary. No such adjustments have been necessary to date.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

The Company values assets classified as Level 3 in the Fair Value Hierarchy using the Company’s own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Additional information regarding the valuation methodologies used by the pricing services by security type is included in C. *Fair values of financial instruments* below.

The following methods are used to estimate fair value for the instruments included in the above table and for fair value measurements in the financial statements in the table A1. Fair value measurements at reporting date, above.

Cash Equivalents in Level 1 are comprised of money market mutual funds that are reported at fair value using net asset value as a practical expedient as prescribed by the NAIC.

Issuer Credit Obligations in Level 1 are comprised of SVO-identified ETFs and are reported at fair value.

Level 2 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for Issuer Credit Obligations included in the Level 2 category, by security type:

U.S. Government Obligations, including treasury bills classified as cash equivalents and/or short term investments, are valued based on quoted prices for identical assets, or, in markets that are not active, quotes for similar assets, taking into consideration adjustments for variations in contractual cash flows and yields to maturity.

U.S. Government-Sponsored Enterprise Obligations are valued using pricing models that consider current and historical market data, normal trading conventions, credit ratings, and the particular structure and characteristics of the security being valued, such as yield to maturity, redemption options, and contractual cash flows. Adjustments to model inputs or model results are included in the valuation process when necessary to reflect recent events, such as regulatory, government or corporate actions or significant economic, industry or geographic events that would affect the security’s fair value.

State and Municipal Bonds are valued using a series of matrices that consider credit ratings, the structure of security, the sector in which the security falls, yields, and contractual cash flows. Valuations are further adjusted, when necessary, to reflect recent events such as significant economic or geographic events or rating changes that would affect the security’s fair value.

Corporate Debt consists primarily of corporate bonds, but also includes a small number of bank loans and certificates of deposit with original maturities greater than one year. The methodology used to value Level 2 corporate bonds is the same as the methodology previously described for U.S. Government-sponsored enterprise obligations. Bank loans are valued by an outside vendor based upon a widely distributed, loan-specific listing of average bid and ask prices published daily by an investment industry group. The publisher of the listing derives the averages from data received from multiple market-makers for bank loans.

Other Asset-Backed Securities are valued using models that consider the structure of the security, monthly payment information, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Spreads and prepayment speeds consider collateral type.

Below is a summary description of the valuation methodologies primarily used by the pricing services for Asset-Backed Securities included in the Level 2 category, by security type:

Residential and Commercial Mortgage Backed Securities. Agency pass-through securities are valued using a matrix, considering the issuer type, coupon rate and longest cash flows outstanding. The matrix is developed daily based on available market information. Agency and non-agency collateralized mortgage obligations are both valued using models that consider the structure of the security, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Evaluations of Alt-A mortgages include a review of collateral performance data, which is generally updated monthly.

Other Asset-Backed Securities are valued using models that consider the structure of the security, monthly payment information, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Spreads and prepayment speeds consider collateral type.

Evaluations of subprime mortgages are the same as the evaluation methodology previously described for Alt-A mortgages.

Preferred Stocks are securities not traded on an exchange on the valuation date. The securities are valued using the most recently available quotes for the securities.

Short Term Investments in Level 2 are evaluated using the same methodology previously described for U.S. Government-sponsored enterprise obligations.

Level 3 Valuations

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

The Company values assets and liabilities classified as Level 3 in the Fair Value Hierarchy using the Company’s own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Level 3 Valuation Processes

- Level 3 securities are priced by ProAssurance Group's Chief Investment Officer, who reports to ProAssurance Group's Chief Financial Officer.
- Level 3 valuations are computed quarterly. Prices are evaluated quarterly against prior period prices and the expected change in price.
- The Company's Level 3 valuations are not overly sensitive to changes in the unobservable inputs used. The securities noted in the disclosure are primarily investment grade debt where comparable market inputs are commonly available for evaluating the securities in question.

Level 3 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for Issuer Credit Obligations included in the Level 3 category, by security type:

Corporate Debt consists of corporate bonds. Valuations are determined using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities. Similar securities are defined as securities having like terms and payment features that are of comparable credit quality. Assessments of credit quality are based on nationally recognized statistical rating organization (NRSRO) ratings, if available, or are subjectively determined by management if not available.

Below is a summary description of the valuation methodologies primarily used by the pricing services for Asset-Backed Securities included in the Level 3 category, by security type:

Other asset-backed securities consisted of securitizations of receivables valued using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities. Similar securities are defined as securities of comparable credit quality that have like terms and payment features. Assessments of credit quality were based on NRSRO ratings, if available, or were subjectively determined by management if not available.

Below is a summary description of the valuation methodologies used for other financial instruments included in the Level 3 category, by security type:

Common stock listed in the table above includes securities for which limited observable inputs were available at September 30, 2025. The securities were valued internally based on expected cash flows, including the expected final recovery, discounted at a yield that considered the lack of liquidity and the financial status of the issuer. The estimated fair value of the FHLB common stock is based on the amount the Company would receive if its membership were canceled, as the membership cannot be sold.

Aggregate Write-Ins for Other than Invested Assets listed in the table above include Business Owned Life Insurance (BOLI). The fair value of the BOLI is the cash surrender value associated with the policies on the valuation date.
