Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of the FD Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Alabama Department of Insurance (ALDOI).

The ALDOI recognizes only statutory accounting practices prescribed or permitted by the State of Alabama for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Alabama Insurance Code. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the State of Alabama.

The Alabama Insurance Code generally requires domestic insurance companies to maintain their assets within the State of Alabama. This requirement can thereby preclude the use of out-of-state banks. The Company received a Permitted Practice from the ALDOI that allows the Company to make use of out-of-state banks. This practice is not at variance with any NAIC statutory accounting practices and procedures (SAP). The Company does not employ any accounting practices prescribed or permitted by the State of Alabama that depart from NAIC SAP, as shown in the following table:

20. Fair Value Measurements

A. Fair Value Measurement

(1) Fair value measurements at reporting date

Description for each class of asset or liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at fair value					
Cash Equivalents	\$ 4,369,220	\$	\$	\$	\$ 4,369,220
Total assets at fair value/NAV	<u>\$ 4,369,220</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$ 4,369,220</u>
b. Liabilities at fair value					
Total liabilities at fair value	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>

(2) Fair value measurements in Level 3 of the fair value hierarchy - None

(3) The Company’s policy is to recognize transfers between levels at the end of the reporting period.

(4) The Company values securities in the Level 1 category using unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

The Company values securities in the Level 2 category using market data obtained from sources independent of the reporting entity (observable inputs). Level 2 inputs generally include quoted prices in markets that are not active, quoted prices for similar assets or liabilities, and results from pricing models that use observable inputs such as interest rates and yield curves that are generally available at commonly quoted intervals.

The fair values for securities included in the Level 2 category have been developed by third party, nationally recognized pricing services. These services use complex methodologies to determine values for securities and subject the values they develop to quality control reviews. Management reviews service-provided values for reasonableness by comparing data among pricing services and to available market and trade data. Values that appear inconsistent are further reviewed for appropriateness. If a value does not appear reasonable, the valuation is discussed with the service that provided the value and would be adjusted, if necessary. No such adjustments have been necessary to date.

The Company values assets classified as Level 3 in the Fair Value Hierarchy using the Company’s own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Additional information regarding the valuation methodologies used by the pricing services by security type is included in C. *Fair values of financial instruments* below.

(5) Derivatives - None

B. Other Fair Value Disclosures - None

C. Fair Values for All Financial Instruments by Level 1, 2 and 3

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Issuer Credit Obligations	\$ 200,078	\$ 199,722	\$	\$ 200,078	\$	\$	\$
Cash Equivalents	4,369,220	4,369,220	4,369,220				

The following methods are used to estimate fair value for the instruments included in the above table and for fair value measurements in the financial statements in the table A1. *Fair value measurements at reporting date*, above.

Cash equivalents in Level 1 are comprised of money market mutual funds that are reported at fair value using net asset value as a practical expedient as prescribed by the NAIC.

Level 2 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for Issuer Credit Obligations included in the Level 2 category, by security type:

U.S. Government obligations, including treasury bills classified as cash equivalents and/or short term investments, are valued based on quoted prices for identical assets, or, in markets that are not active, quotes for similar assets, taking into consideration adjustments for variations in contractual cash flows and yields to maturity.
