A. Nature of relationships

PPM Insurance Services, Inc. ("PPM Services") (the 100% stock owner of PPMRRG as of 12/31/16) entered into an Agreement and Plan of Merger with NORCAL Insurance Company ("NORCAL") that was effective January 1, 2017, whereby NORCAL acquired PPM Services and certain assets of PPMRRG were sold to PPM Services. As part of this transaction, PPMRRG converted from a stock company to a mutual company and is now 100% owned by its members. Additionally, PPMRRG entered into both a loss portfolio transfer agreement and a 100% quota share agreement, effective January 1, 2017.

On March 19, 2025, the Company's ultimate parent, ProAssurance Corporation entered into a definitive agreement to be acquired by The Doctors Company, the nation's largest physician-owned medical malpractice insurer. Total liabilities at fair value	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>

(2) Fair value measurements in Level 3 of the fair value hierarchy - None

(3) The Company’s policy is to recognize transfers between levels at the end of the reporting period.

(4) The Company values securities in the Level 2 category using market data obtained from sources independent of the reporting entity (observable inputs). Level 2 inputs generally include quoted prices in markets that are not active, quoted prices for similar assets or liabilities, and results from pricing models that use observable inputs such as interest rates and yield curves that are generally available at commonly quoted intervals.

The fair values for securities included in the Level 2 category have been developed by third party, nationally recognized pricing services. These services use complex methodologies to determine values for securities and subject the values they develop to quality control reviews. Management reviews service-provided values for reasonableness by comparing data among pricing services and to available market and trade data. Values that appear inconsistent are further reviewed for appropriateness. If a value does not appear reasonable, the valuation is discussed with the service that provided the value and would be adjusted, if necessary. No such adjustments have been necessary to date.

The Company values assets classified as Level 3 in the Fair Value Hierarchy using the Company’s own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Additional information regarding the valuation methodologies used by the pricing services by security type is included in C. *Fair values of financial instruments* below.

(5) Derivatives - None

B. Other Fair Value Disclosures - None

C. Fair Values for All Financial Instruments by Level 1, 2 and 3

Cash Equivalents	3,211,590	3,211,590	3,211,590				

The Company values securities in the Level 1 category using unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Issuer Credit Obligations in Level 1 are comprised of Debt Fund and are reported at systematic value.

Cash equivalents in Level 1 are comprised of money market mutual funds that are reported at fair value using net asset value as a practical expedient as prescribed by the NAIC.

Level 2 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for Issuer Credit Obligations included in the Level 2 category, by security type:

U.S. Government obligations, including treasury bills classified as cash equivalents and/or short term investments, are valued based on quoted prices for identical assets, or, in markets that are not active, quotes for similar assets, taking into consideration adjustments for variations in contractual cash flows and yields to maturity.
