Tri-Continental Corporation Declares Second Quarter Distribution

2016-06-10

BOSTON--(BUSINESS WIRE)-- Tri-Continental Corporation (the "Corporation") (NYSE:TY) today declared a second quarter distribution of \$0.2201 per share of Common Stock and \$0.6250 per share of Preferred Stock. Dividends on Common Stock will be paid on June 28, 2016 to Common Stockholders of record on June 20, 2016 and dividends on Preferred Stock will be paid on July 1, 2016 to Preferred Stockholders of record on June 20, 2016. The ex-dividend date for both the Common Stock and the Preferred Stock is June 16, 2016. The \$0.2201 per share dividend on the Common Stock is in accordance with the Corporation's earned distribution policy.

The Corporation has paid dividends on its common stock for 72 consecutive years. The Corporation's investment manager is Columbia Management Investment Advisers, LLC, a wholly owned subsidiary of Ameriprise Financial, Inc.

The Corporation's distributions on common stock will vary. The Corporation's current distribution (as estimated by the Corporation based on current information) is from the earnings and profits of the Corporation. No amount of the Corporation's current distribution consists of a return of capital (i.e., a return of some or all of your original investment in the Corporation).

The net asset value of the Corporation's common shares may not always correspond to the market price of such shares. Shares of many closed-end funds frequently trade at a discount from their net asset value. An investment in the Corporation is subject to stock market risk, which is the risk that market prices for the Corporation's common shares may decline over short or long periods, adversely affecting the value of an investment in the Corporation.

Securities selected for the Corporation using quantitative methods may perform differently from the market as a whole and there can be no assurance that this methodology will enable it to achieve its objective. The Corporation's portfolio investments are subject to market risk, which may affect a single issuer, sector of the economy, industry or the market as a whole. Fixed income investments, including convertible securities, are subject to credit risk, interest rate risk, and prepayment and extension risk. These risks may be more pronounced for longer-term securities and high-yield securities ("junk bonds"). In general, bond prices rise when interest rates fall and vice versa. Convertible securities are subject to both the risks of their security type prior to conversion as well as their security type after conversion. The Corporation's use of leverage, including through its preferred stock, exposes it to greater risks due to unanticipated market movements, which may magnify losses and increase volatility of returns.

You should consider the investment objectives, risks, charges, and expenses of the Corporation carefully before investing. A prospectus containing information about the Corporation (including its investment objectives, risks, charges, expenses, and other information) may be obtained by contacting your financial advisor or Columbia Management Investment Services Corp. at 800-345-6611. The prospectus can also be found on the Securities and Exchange Commission's EDGAR database. The prospectus should be read carefully before investing in the Corporation. There is no guarantee that the Corporation's investment goals/objectives will be met or that distributions will be made, and you could lose money.
