Report from the Board of Directors

Business overview

The Board of Directors and CEO of Klarna Holding AB (publ) hereby submits the report for the period January 1 – December 31, 2024. This report presents the financial statements for Klarna Holding AB (publ) and consolidated financial statements for the company and its subsidiaries as well as the corporate governance report. The report has been prepared in millions of Swedish kronor (SEK) unless otherwise stated.

Information about the business

Klarna Holding AB (publ)'s subsidiary, Klarna Bank AB (publ) is an authorized bank and is under the supervision of the Swedish Financial Supervisory Authority (Finansinspektionen).

Klarna is a technology company building the next-generation commerce network, with a mission to reimagine how consumers spend and save in their daily lives. We help people save time, money and reduce financial worry.

We have built one of the largest commerce networks in the world, measured by the number of consumers and merchants, serving approximately 93 million active Klarna consumers and more than 675,000 merchants in 26 countries as of December 31, 2024, and facilitating \$105 billion of GMV in 2024.

Our flexible and personalized products, trusted consumer brand, global distribution and proprietary scalable infrastructure are the foundations enabling us to become our consumers' everyday spending and saving partner, available everywhere and for everything. Through our history, we have consistently innovated and challenged the status quo, evolving our network from a consumer-focused payments tool to a global commerce network that enables merchant success.

Business results

Net operating income

In FY24, Klarna's GMV¹ grew by 15% year-over-year (YoY) after adjusting for the sale of KCO and the impact of foreign currency fluctuations². On a total basis, GMV increased by 13% YoY to SEK 1,111b (FY23: SEK 981b). Total net operating income increased 25% YoY to SEK 25.7b in FY24 (FY23: SEK 20.6b) as we accelerate commerce for merchants while helping consumers save time and money, and worry less about their finances.

Commission income, primarily the fees merchants pay Klarna to boost conversion, AOV³, and retention, increased 21% to SEK 20.3b (FY23: SEK 16.8b). This is driven by higher consumer adoption and the expansion of global merchant partnerships, now exceeding 675k.

¹ GMV is the total monetary value of products and services sold through the Klarna network over a given period of time.

² Year-over-year change is calculated by adjusting GMV for (1) the sale of KCO and (2) the impact of foreign currency fluctuations. The impact of foreign currency fluctuations is calculated by translating the reported amounts in the current period using the exchange rates in use during the comparative prior period.

³ "AOV" means average order value, measured by dividing our GMV for a period by the number of transactions conducted on our network in that period.

Interest income rose 26% YoY to SEK 7.2b (FY23: 5.7b), driven by growth in our Fair financing solutions and higher returns on liquid assets held with other credit institutions. Interest expenses accounted for 17% of total operating expenses, increasing to SEK 4.3b at the end of the period (FY23: SEK 2.9b). The increase was driven by a rise in deposits from the public to SEK 106.8b (FY23: SEK 97.1b), supported by strong consumer demand for savings accounts in Germany and Sweden.

Operating expenses

Total operating expenses before credit losses have remained flat at SEK 19.8b, as Klarna leveraged generative AI to drive productivity and efficiency gains while simultaneously growing GMV by 15% when adjusted for the divestment of Klarna Checkout.

Credit losses as a percentage of GMV remained stable at less than half a percent of GMV, rising by 8bps from 0.41% to 0.49%, partly due to US growth outpacing more established markets. In 2024, credit losses rose by 35% YoY to SEK 5.4b (FY23: SEK 4.0b) whilst GMV grew 13% YoY. Credit losses in the income statement reflect provisions for future losses and realized losses associated with Klarna's operating activities during the period, including consumer credit losses, merchant counterparty losses, and other related credit losses.

Klarna Holding AB operating result for the period was SEK 0.4b (FY23: SEK -3.2b) improving SEK 3.6b. Net result for the period grew to SEK 0.3b (FY23: SEK -2.5b) improving by SEK 2.8b.

Balance sheet

Loans to the public at December 31, 2024, increased 9% YoY to SEK 94.0b (FY23: SEK 86.1b) as a result of GMV growth across key markets. It's important to note this does not represent all loans originated in FY24, this is because the average duration of our loans is approximately 40 days and 85% of our loans were three months or less in duration. Outstanding loans at December 31 represent only those loans yet to be repaid. This rapid turnover rate is a key factor in our efficient use of capital to generate revenues, ensuring an asset-light balance sheet, setting us apart from more traditional banks whose longer loan durations tie up capital for extended periods. It also allows us to quickly react to market changes. The CET1 ratio for Klarna Holding AB is 16.8% (FY23: 16.2%).

Branches abroad

Klarna Bank AB (publ) operates Klarna Bank AB Danish Branch, Klarna Bank AB French Branch, Klarna Bank AB Irish Branch, Klarna Bank AB German Branch, and Klarna Bank AB UK Branch.

Interactions with regulators

In the US, the CFPB extended credit card regulations to BNPL products in May, aligning many of these regulations with Klarna's existing protections, such as rights to disputes and returns. We worked closely with the CFPB, receiving positive feedback as the only BNPL company granted a pre-effective-date meeting. The CFPB announced leniency for enforcement, provided companies are making compliance efforts. Additionally, we engaged with Congressional leaders to highlight BNPL's positive impact on consumers and collaborated with New York State policymakers on potential BNPL legislation. While this legislation was not passed, we expect to continue discussions in 2025.

In Sweden, we supported efforts to address consumer over-indebtedness by responding to public consultations on tapered interest deductions and licenses for fast-loan providers. These proposals aim to increase scrutiny on risky credit providers, which Klarna supports. We participated in a Riksdag Civil Committee hearing, hosted a roundtable discussion during Almedalen Week, and shared insights with the Swedish AI Commission to inform their final report to the government. As part of our regulatory dialogue, we continue engaging with the SFSA, which recently issued Klarna Bank AB a remark (Sw. anmärkning) and a SEK 500m fine for AML/CFT compliance. While no violations were found in our transactions, the SFSA at the time deemed aspects of our KYC, CDD, and risk management insufficient under the Swedish AML Act.

In Germany, we engaged with national policymakers, including the German Bundesbank, on topics such as the EU Consumer Credit Directive (CCD), the EU Payments Package, and amendments to the Federal Data Protection Act on credit scoring. Klarna also collaborated with the national government and OECD on financial education, contributing to workshops and consultations for Germany's financial literacy strategy.

In the EU, we worked with national lawmakers on the two-year transposition of the 2nd Consumer Credit Directive (CCD), supporting its proportionate approach to BNPL. Klarna also responded to consultations on the Payment Services Directive 3, Payment Regulation 1, and Financial Data Access initiatives. Ongoing discussions aim to promote faster, safer payments, with further negotiations expected under the new political mandate in 2025 and implementation by 2026.

In the UK, we engaged with stakeholders on BNPL regulation, supporting the Government's October 2024 proposals. These thoughtful proposals marked significant progress, and we provided detailed feedback through consultations. Looking ahead to 2025, we will work closely with the Government and Financial Conduct Authority to finalize regulations.

Significant events during the year

- On 23 May 2024, the Klarna Holding AB (publ) completed a reorganization which resulted in Klarna Group plc becoming the new ultimate parent company of the Group. Through a series of share for share exchange steps, the previous shareholders of Klarna Holding AB (publ) exchanged their shares for shares in Klarna Group plc.
- On 23 May 2024, Klarna Holding AB (publ) subscribed for 5,727,931 newly issued shares in Klarna Bank AB (publ) as part of an internal allocation of funds.
- On 27 June 2024, Klarna Holding AB (publ) subscribed for 4,101,638 newly issued shares in Klarna Bank AB (publ) as part of an internal allocation of funds.
- During August and November 2024, 133,183 shares of Klarna Holding AB (publ) were issued in relation to incentive program conversions.
- On 01 October 2024, Klarna completed the divestment of its Klarna Checkout ("KCO") operation to a consortium of investors. This transaction allows Klarna to focus on its flexible payment methods and partner more closely with payment service providers. See note 39 for more information.
- On 16 October 2024, Klarna announced a multi-year forward flow agreement to offload substantially all of its short-term, interest-free product receivables in the UK.
- On 17 October 2024, Klarna Holding AB (publ) restructured its board to reflect its internal subsidiary role within Klarna Group plc, the main holding company since May 2024. David Fock was appointed Chairperson, joining Camilla Giesecke and Sebastian Siemiatkowski. This change did not affect the boards of Klarna Group plc or Klarna Bank AB.

Future development

Our mission is to reimagine how consumers spend and save in their daily lives. We help people save time, money and reduce financial worry. We envision a world where Klarna empowers everyone, everywhere, through seamless commerce experiences—as a personalized, trusted assistant making financial empowerment effortless. We will continue to invest in our products and services including the Klarna app, Card, bank accounts, open banking and our marketing services to create a strong platform for future growth.

Proposed treatment of unappropriated earnings

The Board and the CEO propose to the Annual General Meeting that the non-restricted equity of SEK 43,159,283,586 on Klarna Holding (publ)'s balance sheet at the disposal of the Annual General Meeting to be carried forward. A detailed proposed treatment of unappropriated earnings is shown in the parent company note 7.

Sustainability report

The ESG report have been published at Klarna's website: www.klarna.com.

Corporate Governance Report

About Klarna

Klarna Holding AB (corporate registration no. 556676-2356) ("Klarna") is a Swedish public limited liability company. Its subsidiary, Klarna Bank AB, is licensed to carry out banking activities under the supervision of the Swedish Financial Supervisory Authority (SFSA). Klarna is categorized by the SFSA as a category 2 institution¹.

Klarna Bank AB provides its financial services in other EEA countries through passporting its license in accordance with EU directive 2013/36/EU and by establishing local branches. Klarna also offers its financial services outside the EEA through the establishment of local subsidiaries in certain jurisdictions. Klarna's corporate governance framework and approach apply to Klarna Holding AB, Klarna Bank AB and all branches and subsidiaries. Therefore this report includes relevant information for both Klarna Holding AB and Klarna Bank AB.

Up until 23 May 2024, Klarna Holding AB was the ultimate parent company of the Klarna Group. Klarna Holding AB remains the parent entity of Klarna Bank AB. Since 23 May 2024, Klarna Group Plc serves as the ultimate parent company of the Klarna Group, which refers to the consolidated structure of Klarna's various entities, organized under different groups for financial and regulatory purposes and which includes Klarna Holding AB. For the purposes of this report, Klarna Holding AB and its subsidiaries are collectively referred to as the "Banking Group". Klarna Group Plc, as a UK based entity, is not required to be included in the scope of this specific Corporate Governance Report. As such, its mention is limited to essential instances for clarity and context.

The Corporate Governance Report is produced according to the Swedish Annual Accounts Act (SFS 1995:1554). Klarna is not obliged to comply with and does not apply the Swedish Corporate Governance Code (SCGC).

When signing the annual accounts on April 24, 2025, the board of directors of Klarna Holding AB (the "Board") also approved the Corporate Governance Report.

Governance and Oversight

Framework for corporate governance

External framework

In addition to general laws, rules and industry practices, Klarna must also comply with the detailed regulations specific to banks and payment service providers. These include the Swedish Banking and Financing Business Act (SFS 2004:297) and rules and recommendations issued by the SFSA with regard to, among other things, capital and liquidity requirements as well as rules on internal governance and control. As Klarna has corporate bonds listed at Nasdaq Stockholm, Klarna is also subject to Nasdaq Stockholm's Rule Book for Issuers of Fixed Income Instruments.

¹ The categorization aims to reflect Klarna's systematic importance and is based on its size, complexity and scope of activities.

Internal framework

In order to ensure compliance with external regulations Klarna operates an internal framework which incorporates the external requirements on corporate governance.

Of primary importance are the Rules of Procedure of the Board (which include how to address conflicts of interest for board members, and the instruction for the CEO). The Policy for Suitability, Training and Diversity of the Board, Management and Key Function Holders, and the Policy for Klarna Bank AB Board Committees have been adopted by Klarna Bank AB's board of directors. The Policy for Klarna Bank AB Board Committees includes instructions for the operation of the board's committees. Additionally, Klarna's Code of Conduct provides an ethical framework for the conduct of all members of governing bodies and employees.

Klarna has a framework of approved policies and instructions. These are important tools for the Board and the CEO in their governing and controlling roles, as well as defining the roles, requirements and expectations of the second and third lines of defense within risk ownership and all employees in the fulfillment of their roles. These policies include, for example, the AML & CTF Policy, Compliance Policy, Conduct Risk Policy, Conflict of Interest Policy, Credit Policy, Data Privacy Policy, the Global Work Environment Policy, Remuneration Policy, and the Risk Management Policy.

These mechanisms, together with the articles of association, constitute the internal framework that regulates corporate governance at Klarna.

Articles of Association

The articles of association are the overall set of rules for the company which are decided by the shareholders at the general meeting. The Swedish Companies Act sets certain minimum demands on what information they should contain. The articles of association are available at the Swedish Companies Registration Office and on Klarna's website. Amendments to the articles of association are resolved by the general meeting pursuant to Swedish law and, for Klarna Bank AB, are subject to the approval of the Swedish Financial Supervisory Authority.

Klarna's articles of association can be found at: <https://investors.klarna.com/resources/faq/default.aspx>

General meeting

The general meeting is Klarna's highest decision-making body where shareholders exercise their voting rights. At the general meeting decisions are taken regarding matters including the annual report, the income statement and balance sheet, dividend, election of the board of directors and auditors, and remuneration for board members and auditors.

Voting rights

All shareholders, registered in the Shareholders' Register and having notified their attendance properly, have the right to participate in the General Meeting and to vote for the full number of their respective shares.

Mandate to repurchase and convey own shares

The annual general meeting 2024 neither decided on authorization to acquire nor convey own shares in Klarna. Consequently, the board of directors did not have such authorizations in 2024.

Mandate to issue shares and warrants

On December 23, 2024, the Klarna Holding AB general meeting authorized the Board to issue 5,594,090 shares.

Klarna's qualified shareholders

Klarna Holding AB (publ) shareholders $\geq 10\%$ are as follows:

Shareholder	Shareholding	% of votes/ ownership
Klarna Group Holdco Ltd	Direct	99.9 %
Klarna Group plc	Indirect	99.9 %
Aktieselskabet Af 20.3.2020 (a subsidiary of Heartland A/S)	Indirect	10.1 %

Klarna Bank AB is 95.1% directly and 99.7% indirectly owned by Klarna Holding AB.

Klarna Bank AB operating entity corporate governance structure

Composition of administrative, management, and supervisory bodies Klarna Bank AB

Klarna's governance structure for the entity Klarna Bank AB is anchored by its board of directors, Group Management Team, Audit, Compliance & Risk Committee (ACRC), and Remuneration Committee (RemCo). These bodies collectively ensure effective oversight and strategic direction aligned with Klarna's commitment to sustainability, transparency, and long-term growth.

The board of directors

The Board is the highest decision-making body in Klarna's structure for management and control. The Board is responsible for the company's strategy, organization and for the management of the company's operations. The Board also holds the ultimate responsibility for ensuring that Klarna's corporate governance arrangements meet expectations, and are implemented effectively throughout the organization.

The board members are elected by the shareholders at the annual general meeting for a one-year term of office extending through to the next annual general meeting. Klarna is not required to have a nomination committee and as such the Board has not adopted a nomination policy.

The Board has adopted rules of procedure that regulate the Board's role and ways of working. The board of Klarna Bank AB has also adopted the Policy for Klarna Bank AB Board Committees. The Board has overall responsibility for the activities carried out within Klarna and has the following duties, among others:

- deciding on the nature, direction and strategy of the business as well as the framework and objectives of the activities.
- evaluating the effectiveness of operations in relation to the agreed strategy, framework and objectives on a regular basis.
- ensuring that the business is organized in such a way that the accounting, treasury management and financial conditions in all other respects are controlled in a satisfactory manner and that the risks inherent in the business are identified, defined, measured, monitored and controlled in accordance with external and internal framework, including the articles of association. The Board is also responsible for setting Klarna's risk appetite and policies establishing the principles for risk management.
- deciding on major acquisitions and divestments as well as other major investments,
- selecting, monitoring and planning the succession of the board members,
- appointment or dismissal of the CEO, the Chief Risk Officer, the Chief Compliance Officer and the Chief Information Security Officer.
- deciding on appointment and dismissal of the Internal Auditor (outsourcing partner and/or individual).
- deciding on remuneration of the CEO, the members of the CXO team, and the heads of the control functions (Risk Control and Compliance).

The Chairperson

The Chairperson of the Board organizes and leads the work of the Board. According to the Rules of Procedure of the Board, the Chairperson will maintain regular contact with the CEO, ensuring that the Board receives sufficient information and documentation to effectively assess Klarna's current position, financial plans, risks and risk management and future development, and deliberate with the CEO on strategic issues.

Chief Executive Officer

Klarna's Chief Executive Officer (CEO) is responsible for the day-to-day management of Klarna's activities in accordance with the external and internal frameworks. The CEO reports to the Board.

Klarna's CEO is also a board member and participates in all board meetings, except on matters in which the CEO has an interest that may be in conflict with the interests of Klarna, such as when the CEO's work is evaluated. Other members of the Group Management Team participate as required by invitation from the Board or CEO.

As part of the Rules of Procedure of the Board, the Board has adopted an instruction for the CEO's work and duties which also regulates the division of responsibilities and the interaction between the CEO and the board. The CEO appoints the heads of corporate functions (CXOs). The Board appoints the heads of the control functions. The CEO is Sebastian Siemiatkowski.

Composition of the boards of directors

The board of directors of Klarna Holding AB consists of:

Director	Role
David Fock	Chief Product and Design Officer (Chairperson)
Sebastian Siemiatkowski	Chief Executive Officer
Camilla Giesecke	Chief Operating Officer

The board of directors for Klarna Bank AB, comprising both executive and non-executive members, is responsible for the company's strategy, organization, and operational management, holding significant responsibilities in ensuring adherence to business conduct standards.

Director	Executive / Non-executive
Michael Moritz	Non-executive (Chairperson)
Sebastian Siemiatkowski	Executive, Chief Executive Officer
Sarah Smith	Non-executive
Lise Kaae	Non-executive
Omid Kordestani	Non-executive
Roger W. Ferguson Jr.	Non-executive
Andrew Reed	Non-executive

David Fock, Chairman of the Klarna Holding AB board, Chief Product and Design Officer

David Fock became a member and the Chairperson of the Klarna Holding AB board of directors in October 2024. He has served as Klarna's Chief Product and Design Officer since February 2015. Mr. Fock joined Klarna in August 2010 and prior to his current role held various positions in design and sales, most recently as Klarna's Vice President of Product, Commerce. Prior to that, from January 2008 to May 2010, Mr. Fock founded and operated HML Systems AB, an online retailer, and served as the Chief Executive Officer of Clarion Bilstereo AB, a distributor of electronic products, from January 2006 to December 2007.

Camilla Giesecke, Klarna Holding AB board member, Chief Operating Officer

Camilla Giesecke became a member of the Klarna Holding AB board of directors in October 2024. She has served as Klarna's Chief Operating Officer since August 2022. Ms. Giesecke joined Klarna in February 2017 and held various leadership positions prior to her current role, most recently as Klarna's Chief Expansion Officer. From August 2006 through January 2017, Ms. Giesecke served as an investment professional at Investor AB, a Swedish investment firm, and in various leadership roles at its portfolio companies, such as Permobil AB, a medical equipment manufacturer, and Saab AB, a Swedish aerospace and defense company. Prior to that, Ms. Giesecke worked as an M&A analyst at J.P. Morgan Chase & Co. in London, United Kingdom. She holds a M.Sc. in Economics and Business Administration from the Stockholm School of Economics.

Sebastian Siemiatkowski, Klarna Bank AB and Klarna Holding AB board member, CEO

Sebastian Siemiatkowski co-founded Klarna in 2005 and has served as a member of the board of directors and as Klarna's Chief Executive Officer since February 2005. Under his leadership, Klarna has grown from a Stockholm-based startup into one of the world's leading fintech companies, redefining the shopping and payments experience for millions of consumers and hundreds of thousands of merchants globally. Mr. Siemiatkowski has played a key role in shaping Klarna's strategic vision, product innovation, and international expansion.

Beyond Klarna, he served as an advisory board member of SSE Business Lab, the startup incubator of the Stockholm School of Economics, from May 2015 to June 2019. He is a frequent speaker on financial technology, entrepreneurship, and the future of commerce. Mr. Siemiatkowski holds an M.Sc. in Economics and Business from the Stockholm School of Economics.

Michael Moritz, Chairman of the Klarna Bank AB Board

Sir Michael J. Moritz KBE has served as a member of our board of directors since July 2010 and as the Chairperson of our board of directors since December 2020. He currently serves as senior advisor and member of the board of directors of Sequoia Heritage, a private investment partnership, and from 1986 to July 2023, he served as a partner at Sequoia Capital, a venture capital firm. In addition to our board of directors, Mr. Moritz currently serves on the boards of directors of Maplebear Inc. (doing business as Instacart), a delivery company, and several private companies, including TrialSpark, Inc., a pharmaceutical company. He previously served on the boards of directors of, among others, LinkedIn Corporation, a professional networking company, Green Dot Corporation, a financial technology company, PayPal Holdings, Inc., a digital payments company, Alphabet Inc., a multinational technology conglomerate, and Yahoo!, Inc., a web services provider. Mr. Moritz also serves as chairman of Crankstart. He holds a bachelor's degree in History from Christ Church, University of Oxford, and an MBA from the Wharton School at the University of Pennsylvania..

Lise Kaae, Klarna Bank AB board member

Lise Kaae has served as a member of our board of directors since December 2020. She has served as the chief executive officer of Heartland A/S, a holding and investment company, since August 2017. Ms. Kaae previously served as the chief financial officer of Bestseller A/S, a fashion company, from May 2008 to July 2017. Prior to that, she worked in various roles at entities affiliated with PricewaterhouseCoopers International Limited, an accounting firm, from August 1992 to April 2008, most recently as a partner. In addition to our board of directors, Ms. Kaae has served as a member of the boards of directors of Novonesis A/S, an international biotechnology company, since March 2024, of Bestseller A/S, since November 2017, of Normal A/S, a Danish retail chain, since October 2014, and of VKR Holding A/S, a holding company, since March 2020, and currently serves as a managing director and/or member of the board of directors of several subsidiaries within, and affiliates of, the Heartland group. She holds an MSc in Business Economics and Auditing from the Aarhus School of Business.

Sarah Smith, Klarna Bank AB board member

Sarah Smith has served as a member of our board of directors since December 2020. She previously worked at The Goldman Sachs Group, Inc. ("Goldman Sachs"), a global financial firm. Ms. Smith joined Goldman Sachs in 1996 and was named a managing director in 1998 and a partner in 2002. During her tenure, Ms. Smith served as the controller and chief accounting officer of the firm until 2017 and subsequently as the chief compliance officer from 2017 to 2020. She then served as a senior advisor to Goldman Sachs from 2020 until her retirement in 2021. In addition to our board of directors, Ms. Smith has served as a member of the board of directors of Aon plc, a global insurance company, since April 2023, and several private companies, including Via Transportation, Inc., a re-engineering public transit company, since June 2021, and 98point6 Inc., a healthcare software company, from February 2021 to March 2024. She has also served as a member of the board of trustees of the Financial Accounting Foundation, the parent organization of the Financial Accounting Standards Board and the Governmental Accounting Standards Board, since January 2021, and has served as a trustee of the Nuveen Churchill Private Capital Income Fund since April 2022. Ms. Smith holds a Dip. in Accounting from the City of London University and is a fellow of the Institute of Chartered Accountants in England and Wales.

Andrew Reed, Klarna Bank AB board member

Andrew Reed has served as a member of our board of directors since March 2024. Mr. Reed is a Partner at Sequoia Capital, a venture capital firm, which he joined in February 2014. In addition to our board of directors, Mr. Reed has served as a member of the board of directors of several private companies, including Vanta Inc., a security and compliance automation company, since April 2021, Bolt Technology OÜ, a mobility and delivery company, since January 2022, Figma, Inc., a design platform, since February 2024, and Strava, Inc., a social networking company for athletes, since November 2023. He holds a B.A. in Economics and Classics from Amherst College.

Omid Kordestani, Klarna Bank AB board member

Omid R. Kordestani has served as a member of our board of directors since December 2020. He previously served as the executive chairman of Twitter, Inc. (now X Corp.), a social networking company, from October 2015 to June 2020, and as a member of its board of directors until October 2022. Prior to that, he worked in various leadership roles at Alphabet Inc., a multinational technology conglomerate, from May 1999 to April 2009 and then again from August 2014 to October 2015, most recently as a special advisor to the chief executive officer and the company's founders. In addition to our board of directors, Mr. Kordestani has served as a member of the board of directors of Pearson, plc, a learning company, since April 2022, and as its chairman since May 2022. He holds a B.S. from San Jose State University and an M.B.A. with a focus on Organizational Leadership from Stanford University.

Roger W. Ferguson Jr., Klarna Bank AB board member

Roger W. Ferguson, Jr. has served as a member of our board of directors since May 2021. He has been a partner and the chief investment officer and chairman of the Investment Committee of Red Cell Partners, an incubation and venture capital enterprise focused on the healthcare and defense sectors, since August 2022. Mr. Ferguson served as the president and chief executive officer of TIAA, a financial services company, from April 2008 to April 2021. From 2006 to 2008, he served as the chairman of Swiss Re America Holding Corporation, head of financial services and a member of the executive committee of Swiss Re, a global reinsurance company. Prior to that, Mr. Ferguson was a member of the Board of Governors of the U.S. Federal Reserve System from 1997 to 2006 and served as its vice chairman from 1999 to 2006. He also worked as an associate and partner at McKinsey & Company, a global management consulting firm, from 1984 to 1997. Mr. Ferguson began his career as an attorney at the New York City office of Davis Polk & Wardwell LLP. In addition to our board of directors, Mr. Ferguson has served as a member of the boards of directors of Alphabet Inc., a multinational technology conglomerate, since June 2016, where he serves as chair of the audit committee, International Flavors & Fragrances, Inc., a creator of flavors and fragrances, since April 2010, where he serves as chair of the board of directors, and Corning Incorporated, a manufacturing company, since April 2021, where he serves as chair of the compensation committee. Mr. Ferguson currently serves on the boards of the Institute for Advanced Study and the Memorial Sloan Kettering Cancer Center. He is a fellow of the American Philosophical Society and the American Academy of Arts & Sciences and is a member of the Smithsonian Institution's Board of Regents, the Economic Club of New York, the Council on Foreign Relations and the Group of Thirty. Mr. Ferguson holds a B.A in Economics, a J.D., and a Ph.D. in Economics, all from Harvard University.

Board committees

The overall responsibility of the Board cannot be delegated. The Klarna Bank AB board of directors has established two separate working committees, the Remuneration Committee and the Audit, Compliance & Risk Committee, to assist the board in fulfilling the responsibilities outlined above. The duties of the board committees, as well as working procedures, are defined in the Policy for Klarna Bank AB Board committees. Each committee regularly reports on its work to the Klarna Bank AB board of directors. Committee members are appointed by the Klarna Bank AB board of directors for a period of one year at a time.

Audit, Compliance & Risk Committee

The Audit, Compliance & Risk Committee (ACRC) is responsible for oversight and preparation of all matters related to audit (both internal and external), compliance, risk and financial reporting and related internal control arrangements. ACRC held 9 meetings in 2024 and provided regular updates to the Klarna Bank AB board of directors on matters pertaining to its responsibilities.

Committee member	Role
Sarah Smith	Non-executive (Chairperson)
Lise Kaae	Non-executive
Roger W. Ferguson Jr.	Non-executive (appointed on September 18, 2024)
Mikael Walther	Non-executive (appointment ended on October 24, 2024)

Remuneration Committee

The Remuneration Committee (RemCo) is responsible for preparing and presenting proposals to the Klarna Bank AB board of directors on remuneration issues. This duty includes proposals regarding Klarna's Remuneration Policy and on remuneration to members of the Group Management Team. The Klarna Bank AB board of directors has adopted a Remuneration Policy which creates standardized remuneration structures throughout the organization. This is revised when necessary and at least annually.

The RemCo makes a competent and independent evaluation of the Remuneration Policy and Klarna's remuneration system, and presents it to the Klarna Bank AB board of directors on at least an annual basis. The RemCo handles matters within its responsibility on an ongoing basis through correspondence between the committee members. Any formal decisions not covered by its delegation authority are reported to and documented by the Klarna Bank AB board of directors at the closest following board meeting.

Committee member	Role
Omid Kordestani	Non-executive (Chairperson)
Michael Moritz	Non-executive
Sarah Smith	Non-executive
Andrew Reed	Non-executive (appointed on December 10, 2024)

Meetings and attendance

The table shows the number of meetings held in 2024 by the board of directors and its committees¹ as well as the attendance of the individual board members:

2024	Klarna Holding AB board of directors ²	Klarna Bank AB board of directors	Audit Compliance and Risk Committee	Remuneration Committee	Independence in relation to the Company	Independence in relation to significant shareholders
Number of meetings	7	8	9	3		
(of which were held per capsulam)	2	3	—	1		
David Fock ³	1	—	—	—	No	No
Sebastian Siemiatkowski	7	8	—	—	No	No
Camilla Giesecke ⁴	1	—	—	—	No	No
Michael Moritz	6	8	—	3	Yes	Yes
Sarah Smith	6	8	9	3	Yes	Yes
Lise Kaae	6	8	9	—	Yes	No
Andrew Reed ⁵	4	7	—	—	Yes	Yes ⁶
Omid Kordestani	6	8	—	3	Yes	Yes
Roger W. Ferguson Jr. ⁷	6	8	3	—	Yes	Yes
Mikael Walther ⁸	6	7	6	—	Yes	No
Matt Miller ⁹	1	1	—	—	Yes	No

¹ The committees in the table are committees of the Klarna Bank AB board of directors.

² On October 17, 2024, the appointments of Michael Moritz, Sarah Smith, Lise Kaae, Andrew Reed, Omid Kordestani and Roger W. Ferguson Jr., on the Klarna Holding AB board of directors ended. Camilla Giesecke and David Fock (Chair) were appointed as new board members along with Sebastian Siemiatkowski who remained on the board.

³ David Fock was appointed to the Klarna Holding AB board of directors on October 17, 2024, and only one (1) meeting has taken place since his appointment.

⁴ Camilla Giesecke was appointed to the Klarna Holding AB board of directors on October 17, 2024, and only one (1) meeting has taken place since her appointment.

⁵ Andrew Reed was appointed to the Klarna Holding AB and Klarna Bank AB boards of directors on March 12, 2024. He was appointed as an additional member of the RemCo on December 10, 2024.

⁶ Andrew Reed is a Managing Member in Sequoia Capital and serves as a board member of Klarna Group Plc. Sequoia Capital is a shareholder in Klarna Group Plc, a UK-based entity. Within the framework of the Swedish regulated Banking Group, Sequoia Capital is not regarded as a qualified shareholder; therefore, we have documented Andrew Reed's independence concerning significant shareholders.

⁷ Roger W. Ferguson Jr. was appointed to the ACRC on September 18, 2024 and has attended three (3) ACRC meetings since his appointment.

⁸ Mikael Walther's appointment on the Klarna Holding AB board ended on October 17, 2024. His appointment on the Klarna Bank AB board ended on October 24, 2024.

⁹ Matt Miller's appointments on the Klarna Holding AB board and on the Klarna Bank AB board ended on March 12, 2024.

Group Management Team

The Group Management Team is responsible for matters of common concern across corporate functions, strategic issues, business plans, financial forecasts, and reports. CXO meetings are held weekly or as convened by the CEO.

Members of the Group Management Team:

Group management	Role
Sebastian Siemiatkowski	Chief Executive Officer (CEO)
David Fock	Chief Product and Design Officer (CPDO)
Camilla Giesecke	Chief Operating Officer (COO)
Niclas Neglén	Chief Financial Officer (CFO)
David Sandström	Chief Marketing Officer (CMO)
Yaron Shaer	Chief Technology Officer (CTO)
David Sykes	Chief Commercial Officer (CCO)
Joachim Reuss	Chief Risk Officer (CRO)
Harjyot Lidher	Chief Information Security Officer (CISO)
Joaquín Calderón	Chief Compliance Officer
Arvind Varadhan	Chief Credit Risk Officer
Boudien Moerman	Chief Legal Officer (CLO)

Group management committees

The CEO has, besides the Group Management Team, three separate committees at his disposal for the purpose of managing operations. Group Management Committee meetings are held monthly.

Executive Credit and Fraud Committee, which is responsible for reviewing credit risk results and trends as well as steering the company's overall generation of credit risk.

Capital and Liquidity Committee, which is responsible for assessment and decision within the internal capital assessment process.

Audit, Compliance and Operational Risk Committee, which is responsible for providing oversight and retaining executive responsibility for all Audit, Compliance and Operational Risk related matters.

Representation of employees and other workers

Klarna engages directly with its workforce and through workers' representatives to ensure a comprehensive understanding of employee needs and perspectives. Engagement occurs during onboarding, feedback sessions, and significant organizational changes. Additionally, continuous communication is fostered through management chats, business updates, and company wide All-Hands meetings, ensuring direct and transparent information flow between management and employees. Additionally, team and domain leads provide weekly updates on challenges and progress, enhancing the efficiency of information sharing. Klarna's Chief Operating Officer oversees all employee engagement processes, ensuring the integration of employee feedback into company strategies and operations.

Experience and training

Members of Klarna's administrative, management, and supervisory bodies are assessed for both theoretical and practical experience relevant to banking, financial markets, legal requirements, strategic planning, risk management, accounting, auditing, and other areas critical to Klarna's business. This assessment includes evaluating their past positions, length of service, and the complexity of businesses they have managed. Additionally, Klarna's leadership team brings extensive global experience, having worked with companies across various sectors and geographic locations worldwide, which strengthens Klarna's capacity to navigate diverse markets and regulatory landscapes.

To ensure that the board of directors, the CEO, and key function holders have the right skills, knowledge, and experience, the Board has adopted the Policy for Suitability, Training and Diversity of the Board, Management and Key Function Holders. This policy assesses the individual's experience and reputation to ensure they are a good fit for the company. It also evaluates their ability to commit the time and effort needed to perform their duties effectively.

The COO is responsible for the assessment at appointment of members of the Group Management Team (excluding the CEO) and key function holders and subsequently at least every two years, or sooner if events observed through ongoing monitoring suggest a review would be prudent. When a new board member or a new CEO assumes their duties, they are also externally assessed by the Swedish Financial Supervisory Authority.

The CEO's performance and qualifications are evaluated in the same manner as board members. According to the Rules of Procedure of the Board, the Board ensures that the CEO fulfills his duties. The Board is responsible for appointing and retains the authority to dismiss the CEO.

The board of Klarna Bank AB sets an annual training plan, and the Compliance Function is responsible for its implementation. The training plan includes an orientation program for new board members and ongoing training on important topics for individual members and the Board as a whole. This ensures that the Board is continuously informed and updated on relevant matters that affect the company.

Diversity

Klarna recognizes that having a diverse Board is crucial to ensuring the Board can perform its duties effectively and has the knowledge and experience needed to navigate the various social, business, and cultural conditions of the markets in which Klarna operates. The Policy for Suitability, Training and Diversity of the Board, Management and Key Function Holders emphasizes that all Board assignments should be made based on merit, with the goal of maintaining and enhancing the Board's overall effectiveness. In order to achieve this, Klarna seeks a wide range of qualifications and competencies, and places a strong emphasis on diversity in terms of age, gender, geographical background, and educational and professional experience. Klarna strives to ensure that board members complement each other to cover expertise vital for Klarna.

Risk management, risk reporting, and control functions

Risk management is central to Klarna's operating model and underpins all activities conducted throughout the organization. The purpose of risk management is to safeguard Klarna's long-term viability, mitigate volatility in financial performance, enhance operational resilience and performance, and facilitate informed decision-making.

Klarna's risk management governance model encourages a risk-aware culture combined with control structures which are monitored and enforced by independent control functions. Key controls are documented and assessed on a regular basis, with assessments considering both effectiveness of design and operation. The risk strategy is a natural extension of the business model that focuses on identification, assessment, management and monitoring of the material risks that Klarna is exposed to.

Risk governance

Klarna operates a financial services industry standard three lines of defense model for risk management and control. The model allocates responsibilities of activities among teams or functions in three independent lines as outlined below:

The ultimate responsibility for risk management rests with the Board, which sets Klarna's risk appetite and policies establishing the principles for risk management. It also oversees and promotes a sound risk culture of risk awareness and understanding across the organization to encourage informed decision making. The board of Klarna Bank AB is supported by the Audit, Compliance, and Risk Committee (ACRC) in performing its duties regarding risk management.

The Group Management Team is responsible for implementing the risk strategy. They are also accountable for the management of risks within each of their areas of responsibility, and to promote a sound and effective risk culture across their teams and the Banking Group as a whole.

In the **first line of defense**, business line management are responsible for the risks, and the management of these, within their respective area of responsibility. They are responsible for ensuring that the appropriate organization, procedures and support systems are implemented to ensure a sufficient system of internal controls.

The **second line of defense**, consisting of the functions Risk Control and Compliance, oversees risk. These control functions set the principles and framework for risk management, facilitate and challenge risk assessments, perform independent control testing, and report on adherence to risk appetites, limits and frameworks.

The control functions are independent of business line management and report directly to the CEO. They also attend and report to the Audit, Compliance and Risk Committee (ACRC) and the Board.

As the **third line of defense**, internal audit provides risk assurance through independent periodic reviews of governance structures and control systems. This includes regular evaluations of Klarna's risk management framework and an annual review of the second line of defense's control functions. Internal Audit reports directly to the board of Klarna Bank AB, offering reliable and objective assurance to both the board and the CEO on the effectiveness of controls, risk management, and governance processes.

The board of Klarna Bank AB has decided to outsource Klarna's Internal Audit Function to Deloitte and has adopted a Policy on Group Internal Audit. The Internal Audit Function regularly reports audit results, identified risks, and improvement suggestions to the board and ACRC. It also informs the CEO, Group Management Team, and relevant departments on internal audit matters. The board of Klarna Bank AB annually establishes a plan for internal audit work.

External Audit

Klarna's external auditors are formally elected at the General Meeting on an annual basis in line with Swedish Company law. Ernst & Young AB was re-elected at the 2024 annual general meeting AGM as external auditor for the period up to the 2025 annual general meeting.

The ACRC receives reports from the auditor, which include details of significant internal control matters that they have identified, and meets with the auditor on a regular basis.

The ACRC oversees appropriate procedures to maintain the independence of the external auditor, this includes Klarna's Policy on Non-Audit Services Provided by External Auditors which sets out those services that the auditor is permitted to provide and the requirements for pre-approval by ACRC in advance of provision of non-audit services.

Risk strategy and appetite

Klarna's risk strategy is set by the Board and outlines the nature of risks that the business is exposed to, its willingness to take these risks and how they are managed. It is formed through Klarna's business plan, established by the Group Management Team and approved by the Board; the Risk Management Policy, which forms the basis of Klarna's risk management framework; the Credit Policy, which sets out Klarna's credit strategy; and the Internal Capital and Liquidity Adequacy Assessment Process.

The risk appetite framework outlined in the Risk Management Policy reflects Klarna's willingness to take and limit risk. The appetite is set by the Board and reviewed and updated regularly, at least on an annual basis. This annual review is an integral part of the annual business planning process, ensuring alignment of the business strategy, planned business activities and Klarna's risk exposures.

The Board and Group Management Team also issue specific written policies and instructions for managing risks, which are complemented by detailed routine descriptions within the organization. The second line functions provide an independent assessment of Klarna's risk profile to the Group Management Team and the Klarna Bank AB board on at least a quarterly basis.

Risks

Klarna categorizes the key risks it is exposed to into six types. These categories are subsequently further refined and managed within the organization. These risk categories form the basis of how Klarna identifies, assesses, manages, and reports against risk.

Credit risk is defined as: the risk of loss due to a counterparty failing to meet its contractual obligations or concentrations in exposures.

Credit risk is fundamental to Klarna's mission of providing consumers a smooth payment experience, better financial management and supporting partners' growth. It is a risk that Klarna takes to achieve its business objectives.

Klarna ensures that the consumer credit portfolio is resilient to volatile economic conditions by offering short duration credits and low average order value. Klarna limits the concentration of non-performing loans and large single exposures in the consumer credit portfolio. This, together with the dispersion of millions of customers across multiple countries and continents and low average order value, ensures that the consumer portfolio is diversified. Klarna takes precautions to ensure that approved consumers have the ability to pay their obligations.

Exposures and losses stemming from partners, payment and bank counterparties are managed by limiting single exposures based on the risk class of the counterparty as well as the exposure concentration to individual partner segments. Exposures to partners are managed using mitigation tools to increase Klarna's collateral, such as payment delays, rolling reserves, insurances and withholding payments.

Klarna uses financial guarantees to provide protection for part of its portfolio of consumer exposures. The guarantee can reduce the regulatory capital the bank is required to hold for unexpected losses and the guarantee is fully funded with eligible collateral.

Market risk is defined as: the risk of movements in market prices impacting Klarna's earnings or capital position.

Klarna does not actively take market risk but due to its multi-currency business and different duration of its assets and liabilities market risk is an inherent risk of the business. Interest rate risk specifically arises via a mismatch of terms in assets and liabilities where duration of funding is longer compared to the duration of credits granted to consumers.

Klarna seeks to match lending in foreign currencies with a financial liability in the same currency and any mismatches may be hedged to minimize the impact changes in currency rates may have on Klarna's realized earnings. Similarly, Klarna seeks to match changes in interest rate on borrowings with interest rates on lending and, where needed, hedge mismatches.

Klarna does not invest in financial instruments other than for liquidity, interest rate and currency risk management purposes. From time to time Klarna makes strategic investments in other companies to accelerate innovation and/or expand and improve its product offering. Equity risk, the risk that the value of these investments may increase or decrease, is a natural consequence of this activity. The risk of losses arises due to the potential for adverse price changes of an investment. This exposure is limited through Board mandates.

Liquidity risk is defined as: the risk of being unable to meet financial obligations as they fall due, or unable to fund operational needs without incurring unacceptable costs.

Klarna is dependent upon the effective management of liquidity risk to realize the company's strategy. The risk of insufficient funding being available would have implications on future growth, the company's ability to meet financial obligations, and in an extreme scenario, the breach of regulatory limits.

Klarna is primarily exposed to liquidity risk due to the potential for unexpected increased demand for credits. There is a risk that Klarna does not have a sufficient capacity to acquire additional funding at a reasonable cost in a timely manner, or does not have sufficient levels of liquid assets to convert to cash during such times. Klarna therefore keeps sufficient levels of liquidity at hand at all times, ensuring that funds are available to support the business and that regulatory requirements are adhered to.

Klarna actively manages its liquidity risk exposure and sources of liquidity by calculating, forecasting and managing the size of the High Quality Liquid Assets (HQLA) portfolio and the funding needs to ensure that Klarna always has the ability to fulfill its commitments as they fall due and meet regulatory requirements. Klarna invests in financial instruments for liquidity management purposes, and mostly in high credit quality sovereign and municipal government securities.

Operational risk is defined as: the risk of inadequate or failed processes, personnel, products or third parties.

Operational Risk exists across all of Klarna's business processes. The continued delivery of Klarna's services to customers (partners and consumers) relies on resilience and stability in how processes, personnel, products and third parties are managed. To manage these inherent risks Klarna operates a robust operational risk management framework.

Klarna maintains an operational risk management framework as outlined in the Operational Risk Policy. This is supported by more detailed risk specific approaches. On an annual basis, business critical products and services are identified and a risk assessment completed, including review of internal controls and identification of any additional mitigation activities required. This includes maintaining a business continuity plan to ensure continuation of services in the event of disruption.

To sustain operational delivery, outside of business continuity, a mandatory Incident management process provides a structured approach for continuous learning and improvement through analysis of past incidents.

A driver of operational risk is major change. Klarna operates a change management approval process (the NPA process) to ensure a sound understanding of the business change and capture associated risks. All major changes undergo a risk assessment led by the owner of the change to identify and assess the risks associated with the change, and to implement adequate controls and/or mitigation actions.

Klarna has zero tolerance for entering into or maintaining business relationships where there is knowledge or suspicion that Klarna's products or services are being used for money laundering or

terrorist financing. In such cases, Klarna will immediately terminate the relationship and take appropriate action in accordance with regulatory requirements.

ICT and Security risk is defined as: the risk of failures or breaches in information or communication systems including system outages, software failures, data breaches, physical security breaches or cyber-attacks.

Klarna is subject to ICT and security risk as a consequence of its business and operational processes. This risk can occur in several ways that can impact on one or more of the confidentiality, integrity or availability of data and systems such as stemming from human actions, system or technology failures or processes not operating as expected as well as adjusting to the continuously evolving cyber threat landscape.

Klarna uses many automated and standardized security measures in a layered approach to protect systems. To manage ICT and security risks, Klarna maintains a specific ICT and security management framework. This includes frequent IT security/vulnerability assessments and testing, ongoing system monitoring, software change management controls, strict access management controls and regular training, including security awareness training and exercises. ICT and Security risk controls are tested and measured continuously.

Business risk is defined as: the risk of suboptimal strategy selection or sustainability factors impacting the achievement of Klarna's business objectives or altering the long term valuation or viability of the business.

Klarna's strategy is delivered through its business plan, which enables an informed decision-making process for assessing business risks. The business plan defines Klarna's objectives and the steps needed to reach those objectives and is designed to be resilient to changes in external economic and competitive conditions. Klarna aims for a sustainable strategy and business model and therefore expects to achieve the business plan with minimal variation.

As a part of the business planning cycle, Klarna assesses the up and down-side risks of the plan and considers the impact of competitor and market conditions to test the plans achievability under different circumstances. The achievement of the business plan is then reviewed monthly by the Group Management Team with updates on key financial and business metrics, including exposure against Board risk appetite limits. Where Klarna sees opportunities or risks, it adjusts approaches as appropriate to preserve achievement of the plan.

Sustainability risks are identified through a periodic double materiality assessment to determine key prudential and non-prudential themes that could impact Klarna. For prudential regulation, sustainability risk, including ESG factors, is integrated into risk management practices such as the Credit Policy and stress testing scenarios. Non-prudential regulation involves collaboration across Klarna to assess external data and communications, including ESG reports and voluntary reporting initiatives.

To deliver its sustainable, global growth strategy in an efficient and responsible way, Klarna starts small with lower risk products that it can quickly test, iterate and scale. Launches of new products or markets go through a structured assessment and decision making process to ensure risks have been captured and appropriately managed.

Risk reporting

In the Risk Management Policy, the Board has established how and when it shall receive information about Klarna's risks and risk management. The periodic, recurring risk reporting in Klarna provides reliable, current, complete, and timely information, reflecting the nature of different risk types as well as market developments. The Board, the ACRC, the CEO, and the Group Management Team, as well as other functions that require such information, receive regular reports on the status of risks and risk management to ensure they are aware of material risks and control weaknesses.

Internal control and financial reporting

Klarna maintains risk management processes and internal controls relating to financial reporting which are designed to ensure accuracy of financial records, appropriate application of accounting policies and compliance with relevant regulations and provide management with accurate and timely financial reporting in order to accurately view the Banking Group's performance and make informed decisions.

Insider administration

As Klarna's equity shares are not admitted to trading on a regulated market, Klarna's obligations under the EU Market Abuse Regulation No 596/2014 (MAR) relate only to its corporate bonds listed on Nasdaq Stockholm.

Insider administration is organized according to the applicable EU and national level laws and regulations. The Klarna Bank AB board has approved Banking Group-wide policies and instructions to provide clear instructions for employees to ensure inside information is identified and handled appropriately.

Klarna does not maintain a permanent insider register under EU Market Abuse Regulation No 596/2014 (MAR). Insiders are identified on a case-by-case basis whenever inside information is detected and are subsequently registered in a related insider register and notified of their insider status. All identified insiders are then prohibited from dealing in the financial instrument(s) to which the inside information relates until that information is made public or otherwise no longer deemed to be inside information, and the insider register is closed.

The responsibilities of Klarna's insider administration include evaluating whether information is inside information or not, training of and providing information to employees who are exposed to inside information to make sure that they are aware of the restrictions and obligations placed on insiders, setting up and maintaining insider registers as well as monitoring compliance with the insider rules. The rules are put in place to mitigate the risk of insider dealing and other forms of market abuse, and the overall responsibility for making sure that a high level of knowledge of and compliance with these rules is maintained lies with Klarna's Governance and Corporate Secretariat team reporting to the Chief Legal Officer.

¹ Amounts in other equity instruments column consist of issued instruments, while amounts in retained earnings column consist of interest and cost of issuance of these issued instruments. Equity instruments issued in Klarna Bank AB have been re-presented in 2024 as non-controlling interests.

² RSU expenses, previously presented part of non-controlling interest, with an offsetting impact in non-controlling interest - profit for the period, have in 2024 changed presentation to share based payments. The change in presentation have had no impact on any opening or closing non-controlling interests.

Cash Flow Statement, Group

¹ Specific lines within operating and financing activities have been represented as a result of showing a more granular breakdown of the cash flows for the periods.

² Changes in assets and liabilities of operating activities are included within the cash flow statement based on the average exchange rate translation, and are therefore not a reflection of the balance sheet movements which reflect the exchange rate at each period end.

Notes with accounting principles

Note 1 Corporate information

Klarna Holding AB (publ), corp. ID 556676-2356, maintains its registered office in Stockholm at the address Sveavägen 46, 111 34 Stockholm, Sweden. The consolidated financial report per December 31, 2024 includes Klarna Holding AB (publ) along with its subsidiaries, collectively referred to as the Group in the financial statements. The Group's business is described in the Business overview.

In this report, the parent company refers to Klarna Holding AB (publ) and group refers to Klarna Holding AB (publ) including its subsidiaries.

The parent company of Klarna Holding AB (publ) is Klarna Group Holdco Ltd, Corp. ID 146108, which has its registered office in Jersey at the address 47 Esplanade, St. Helier, Jersey, JE1 OBD, Jersey. The ultimate parent company of Klarna Holding AB (publ) is Klarna Group plc, Corp. ID 14467769, that has its registered office at 10 York Road, London, England, SE1 7ND.

The consolidated financial statements and the Annual Report for Klarna Holding AB (publ) for the financial year 2024 were approved by the Board of Directors and the Chief Executive Officer (CEO) on March 26, 2025. They will ultimately be adopted by Klarna Holding AB (publ)'s Annual General Meeting.

Group reorganization

Prior to a group reorganization on May 23, 2024, Klarna Holding AB (publ) was the ultimate parent company of the Group for which consolidated financial statements were produced. On 23 May 2024, the Group completed a reorganization which resulted in Klarna Group plc becoming the new ultimate parent company of the Group. Through a series of share for share exchange steps, the previous shareholders of Klarna Holding AB (publ) exchanged their shares for shares in Klarna Group plc.

Following this reorganization, the immediate parent company of Klarna Holding AB (publ) is Klarna Group Holdco Ltd, an entity incorporated in Jersey and UK tax resident. There was no change in the legal ownership of any of the assets of Klarna Holding AB (publ) nor any change in the ultimate beneficial ownership of Klarna Holding AB (publ) or Klarna Group plc.

Klarna Holding AB (publ) continues to prepare consolidated financial statements. The group reorganization had no impact on the consolidated statement of financial position, consolidated income statement, and consolidated cash flow statement of Klarna Holding AB (publ).

Note 2 Accounting principles

1) Basis for the preparation of the reports

Group

The consolidated financial statements are prepared in accordance with IFRS Accounting Standards as adopted by the EU and have been prepared on a historical cost basis, except for other shares and participations, receivables held for trading, derivatives and convertible notes which have been measured at fair value, and lease liabilities, which are measured at present value. In addition, the Swedish Financial Supervisory Authority regulations (FFFS 2008:25), the Annual Accounts Act for Credit Institutions and Securities Companies (ÅRKL, 1995:1559) and the recommendation RFR 1 Supplementary Accounting Rules for Groups issued by the Swedish Financial Reporting Board have been applied.

Parent Company

The Parent Company, Klarna Holding AB (publ), prepares the annual accounts in accordance with the Annual Accounts Act (ÅRL, 1995:1554). The accounting recommendation for legal entities RFR 2 amended by the Swedish Financial Reporting Board has also been applied. The Group's accounting principles are also applicable for the Parent Company unless otherwise described in this note or the notes for the parent.

The preparation of reports in accordance with IFRS requires the use of a number of estimates for accounting purposes. The areas which involve a high degree of assessment or complexity and which are of considerable importance for the annual accounts are presented in section the section below Significant accounting judgements, estimates and assumptions.

The financial statements are prepared on the basis that it will continue to operate as a going concern. All amounts in the notes to the consolidated financial statements are stated in millions of Swedish kronor ("SEK"), unless otherwise stated.

2) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Parent company and its subsidiaries as at December 31, 2024. Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed, or has right to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The consolidated subsidiaries of Klarna are consolidated as from the date when control is transferred to Klarna and deconsolidated from the date that control ceases. All intercompany accounts and transactions between members of the Group have been eliminated on consolidation.

3) New and amended standards and interpretations

Standards and amendments effective for the year

No significant new IFRS standards, amendments, or interpretations applicable to the Group became effective during the period.

New standards and amendments issued but not yet effective

In April 2024, the IASB issued IFRS 18 "Presentation and Disclosure in Financial Statements" that replaces IAS 1 "Presentation of Financial Statements". IFRS 18 introduces new requirements for information presented in the primary financial statements and disclosed in the notes. IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027, but earlier adoption is permitted. The Group is currently evaluating the impact of this standard.

In May 2024, the IASB issued amendments to IFRS 9 "Financial Instruments" and IFRS 7 "Financial Instruments: Disclosures", clarifying recognition and derecognition principles and introducing an

exception for the early derecognition of certain financial liabilities settled electronically. The amendments also provide guidance on assessing contractual cash flow characteristics and introduce new disclosure requirements. These amendments are effective for annual reporting periods beginning on or after January 1, 2026, with earlier adoption permitted. The Group is currently evaluating their impact.

The Group has not early adopted any issued standards, interpretations, or amendments that are not yet effective.

4) Significant accounting judgements, estimates and assumptions

The preparation of the consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. On an ongoing basis, Klarna evaluates the estimates, including those related to provisions for credit losses, revenue recognition (see more in below section revenue recognition), income taxes, the evaluation for impairment of intangible assets and goodwill, contingent liabilities, securitization, convertible notes, leases, business combinations and share-based compensation, including the fair value of restricted share units, options and warrants issued. Klarna bases the estimates on historical experience and various other assumptions which we believe to be reasonable under the circumstances. Actual results could materially differ from these estimates.

5) Foreign currency translation

Presentation currency and functional currency

The financial statements are prepared in SEK. Each entity within the Group uses the currency of its primary economic environment as its functional currency. For Klarna Bank AB (publ), the functional currency is the Swedish Krona (SEK).

The assets and liabilities of the Group and its subsidiaries are translated from the functional currency of the operations to SEK using the exchange rates at the reporting date. The revenues and expenses are translated to SEK using the average exchange rates for the period, which approximate the exchange rates at the date of the transaction. All resulting foreign exchange differences are recognized in other comprehensive income (loss) and included in foreign exchange translation reserve in equity.

Foreign currency transactions

Transactions denominated in currencies other than the functional currency of the respective entity are translated into the functional currency at the exchange rate on the date of the transaction. Monetary assets and liabilities denominated in currencies other than the functional currency are remeasured using the exchange rates prevailing at the end of the reporting period. Any foreign exchange gains or losses arising from the remeasurement of these monetary assets and liabilities are recognized in net result from financial transactions in the consolidated statement of profit or loss.

6) Cash and balances with central banks

Cash comprises legal tender and bank notes in local and foreign currencies. Balances with central banks consist of deposits in accounts with central banks under government authority where the following conditions are fulfilled:

- The central bank is domiciled, and
- The balance is readily available at any time.

7) Treasury bills chargeable at central banks

Treasury bills chargeable at central banks are classified as financial assets measured at amortized cost. These assets have a maturity of both greater than three months, and less. Treasury bills with a maturity less than three months is classified as cash and cash equivalents in the cash flow statement. Interest is recognized as interest income in the income statement.

8) Loans to credit institutions

Loans to credit institutions consist of loans and advances to credit institutions in local and foreign currencies, cash collateral for securities borrowing and other lending arrangements with banks and financial institutions. Balances relating to banks are classified as cash and cash equivalents in the cash flow statement.

9) Loans to the public

Lending to the public cover loans and advances to customers that are not credit institutions. Klarna's lending to the public can be divided into two categories;

Consumer receivables, representing unsecured amounts due from consumers that elect to pay over time either through pay later or fair financing options as well as receivables related to other consumer fees as discussed in the Group's revenue recognition accounting principles. Consumer receivables that Klarna has the objective of holding to collect contractual cash flows are measured at amortized cost, including outstanding principal balances, accrued interest and net of allowances for expected credit losses.

The other category relates to receivables from payment solution providers ("PSPs"), amounts due from merchants for services and receivables from third-party debt collection agencies. These are reported at amortized cost net of an allowance for expected credit losses.

10) Allowance for expected credit losses

Klarna estimates allowances for expected credit losses ("ECL") for treasury bills chargeable at central banks and loans to the public. The ECL allowance is based on either 12-month expected credit losses ("12m ECL") or on lifetime expected credit losses ("Lifetime ECL"). The ECL allowance is based on the latter if the simplified approach, as defined by IFRS 9, is applicable or if there has been a significant increase in credit risk since initial recognition.

Lifetime ECL and 12m ECL are calculated on a collective basis at an asset class level. The asset class is defined by shared credit risk characteristics, which are generally by market and geography.

Treasury bills chargeable at central banks

Klarna invests in treasury bills issued by central banks, loans to highly rated financial institutions and bonds issued by highly rated government entities. The credit rating status of issuing entities is monitored throughout the investment holding period. The high credit quality of the issuers results in a low probability of default, loss given default and exposure at default resulting in an immaterial ECL estimate for these assets.

Loans to the public

Consumer receivables

To measure the ECL for consumer receivables, the Group assigns outstanding loans to one of three stages with the stage corresponding to the individual loan's estimated repayment performance. The estimated repayment performance is informed by the Group's records, including the customer's history with Klarna and purchase behavior from active Klarna consumers, merchant data, credit bureau reports and open banking data. Klarna defines the stages as follows:

Stage 1: New loan origination that is not credit impaired at origination. A loan remains in stage 1 unless there is a significant increase in credit risk ("SICR"), such as when a loan becomes 30 days or more past due or if the consumer has other loans that are in stage 2 or 3. While a consumer could have a loan that did not experience SICR, if they have a loan in stage 2 or 3, Klarna applies a more prudent approach to all loans for the consumer as part of its risk management practices. A loan may also be transferred back to stage 1 if credit risk has significantly improved and it is not delinquent 30 or more days. For stage 1 loans, the allowance is calculated based on 12-month ECL.

Stage 2: Loan with an observed significant increase in credit risk since origination. Klarna defines significant increase in credit risk as a loan with an outstanding balance more than 30 days overdue. The allowance for these loans is calculated based on Lifetime ECL. Stage 2 also includes loans that are reclassified from stage 3 because they are no longer considered credit impaired.

Stage 3: Loan considered credit impaired. A loan is defined as credit impaired if it is 90 days past due or is classified as fraudulent. The allowance for stage 3 loans is calculated based on lifetime ECL. A loan may be reclassified from stage 3 if it is no longer considered credit impaired.

PSP receivables, merchant receivables and receivables from third-party debt collection agencies

Klarna estimates credit losses using the lifetime ECL model. Each counterparty is subject to a credit risk assessment at onboarding and periodically throughout its relationship with Klarna. Based on the credit risk assessment, a counterparty is assigned a risk classification that correlates to a probability of default. For higher risk counterparties, Klarna extends settlement windows for payments to the counterparties to serve as collateral for their non-performance if a consumer returns products.

When a this category of receivable is determined to be uncollectible, the gross amount is written off through the allowance for expected credit losses in the credit losses, net on the income statement. Recoveries of the receivables that were previously written off are recognized when received in the credit losses, net in the income statement.

See more information in Note 14 on credit losses, net and Note 20 for loans to the public.

Significant inputs

Klarna utilizes a series of models to calculate allowance estimates, which depend on certain significant inputs.

Definition of default:

An asset is considered to be in default when it is 90 days or more past due on any payments, has entered debt collection or is classified as fraudulent.

Probability of Default (PD):

Historical balances as well as the proportion of those balances that have defaulted over time are used as a basis to determine the PD. This approach provides values for 12-month and lifetime PDs applied over different vintages for different countries and for days since origination. In cases where the maturity of the loans is very short (i.e., less than 12 months), which is common for Klarna's products, the 12-month PD and lifetime PD have equal values.

Loss Given Default (LGD):

LGD is the magnitude of the likely loss if there is a default. The LGD is dependent on geographical region, days past due, and, in some cases, recoveries from the sale of non-performing portfolios. The loss given default is calculated using the historical balances over different vintages as a basis. Furthermore, the LGD component is determined based on days past due.

Exposure at default (EAD):

EAD represents the estimate of the exposure at a future default date, taking into account expected changes in the exposure as of each reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise.

Measurement of ECL:

Expected credit loss estimates are based on these key inputs: PD, LGD and the EAD, which are derived from internal statistics and other external data. PD and LGD estimates are an accumulation of segmentation, such as product and geography, within each asset class, which are used to calculate the ECL on a collective basis. For unsecured assets, there is no collateral factored into the ECL calculations. For quantitative information on the reported ECL amounts see Note 20.

Write-off of financial assets

Loans to the public are written off when either the entire outstanding amount or a proportion thereof are considered uncollectible, which is generally when an outstanding balance is 180 days past due. For loans to the public, Klarna monitors significant counterparty relationships for current information and events to assess if there is a risk the counterparty is experiencing financial difficulty or is in breach of contract.

If a loan or receivable is determined to be uncollectible, the gross amount will be charged off through the allowance for expected credit losses. Charged-off balances may still be subject to enforcement activities to attempt to recover the amounts due. When enforcement activities are exhausted or the loan or receivable is sold to an external party, the loan or receivable is formally written off in Klarna's systems.

For information on the written-off loans to the public, including those subject to enforcement activities, see Note 20.

Sale of uncollectible consumer receivables:

Klarna enters into agreements to sell certain uncollectible receivables to debt collection agencies to maximize recovery and manage credit risk. These uncollectible receivables are sold on a non-recourse basis, with the Group transferring substantially all risks and rewards of ownership to the debt collection agencies meeting the derecognition criteria on the date of sale. When a receivable is deemed to be uncollectible it is written down to the recoverable amount.

Recoveries

Recoveries for consumer receivables that were previously written off are recognized when received in net credit losses in the income statement.

11) Commitments

In the normal course of business, Klarna is a party to the following non-cancelable commitments:

Loan funding commitments

Klarna has a commitment to purchase certain consumer loans by originating bank partners in the United States. Upon purchase of these consumer loans, Klarna recognizes them on the consolidated balance sheet. Beginning in 2024, Klarna is required to communicate credit limits to its Norwegian customers, for which Klarna has a commitment to fund. Upon a customer drawing on the commitment, Klarna recognizes it on the consolidated balance sheet.

Consumer refund commitment

Klarna offers a buyer protection policy that serves as a commitment, obligating the Company, under certain circumstances, to reimburse consumers if a merchant does not adequately resolve a purchase return for purchases made using a Klarna payment method. These commitments are accounted for through a provision. The measurement of the provision begins with the credit risk rating of merchants for which Klarna is providing the commitment. The risk rating correlates to a PD which is multiplied by the estimated gross exposure to estimate the provision. It is calculated based on historically observed return rates and included in provisions, see Note 31. The commitment is disclosed in Note 33.

Synthetic Securitization

Klarna enters into synthetic securitization transactions with unconsolidated securitization vehicles ("SPV"), where it economically transfers a portion of credit risk for certain pools of consumer receivables (the "referenced pools") with the primary objective to lower the regulatory capital risk weights of the underlying assets. Credit risk for each referenced pool is separated into three tranches: junior, mezzanine and senior. The Company retains the risk for the junior and senior tranches and transfers risk for the mezzanine tranche to the SPV. The SPV then issues credit-linked notes to investors.

Klarna pays a fee to the SPV for the transfer of credit risk that is recorded as incurred in commission expense, see Note 37. This fee provides for a guarantee from the SPV to reimburse the Company for any credit losses incurred in the mezzanine tranche.

Klarna retains contractual rights to receive the cash flows of the referenced pools and does not derecognize these consumer receivables (within loans to the public) from its consolidated balance sheet. In accordance with IFRS 9 Financial Instruments, the Company estimates the expected credit losses for these consumer receivables for each period presented, in line with the Company's accounting policy for allowance for expected credit losses. The Company's estimated credit losses for the referenced pools was below the range of the mezzanine tranche for the periods presented. As a result, the Company has not made a claim against the guarantees issued by the SPVs. Should the Company experience credit losses within the mezzanine tranche, the Company's policy is to record recoveries from the SPV guarantees in net credit losses.

Forward flow Securitization

During 2024, Klarna entered into a forward flow loan sale arrangement with an unconsolidated securitization vehicle (the "SPV") whereby specified pools of consumer receivables ("eligible receivables") are transferred to the SPV. Klarna derecognizes these receivables upon transferring the contractual rights to the cash flows and substantially all associated risks and rewards. The transfers are deemed to occur on the sale date, at which point, the derecognition criteria are satisfied.

The specified pool of eligible receivables are classified as held for sale and measured at fair value through profit and loss (FVP&L) in "other assets" on the balance sheet, with changes in fair value recognized under net result from financial transactions in the income statement.

Under these transactions, Klarna continues to service the sold receivables on behalf of the SPV. Servicing income includes contractual fees specified in servicing agreements with these SPVs, earned from providing professional services such as cash flow collection and credit risk management in the event of customer defaults. The servicing fee is calculated daily by applying a fixed percentage to the outstanding loan principal balance, with revenue recognized on a monthly basis. As the servicing fee is deemed to represent a fair market fee, no servicing asset or liability is recognized in the financial statements. The servicing income is recorded under other operating income in the income statement.

12) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which Klarna has access at that date.

When available, Klarna measures fair value using the quoted price in an active market. If a quoted price in an active market is not available, the Group uses valuation methods that maximize the use of relevant observable inputs and minimize the use of unobservable inputs to determine fair value.

The fair value of a financial instrument on initial recognition is generally best evidenced by its transaction price (i.e., the fair value of consideration paid or received). If Klarna determines that the transaction price differs from the fair value and the fair value is not evidenced by a quoted price in an active market for an identical asset or liability nor based on a valuation method where unobservable inputs are considered to be insignificant in relation to the difference, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognized in the income statement on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is settled.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1

Level 1 in the fair value hierarchy consists of assets and liabilities where the inputs used in the valuation are unadjusted quoted prices from active markets for identical assets or liabilities.

Level 2

Level 2 consists of assets and liabilities where the significant inputs used for valuation are derived from directly or indirectly observable market data available over the entire period of the instrument's life. Such inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical instruments in inactive markets and observable inputs other than quoted prices such as interest rates and yield curves, implied volatilities and credit spreads.

Level 3

Level 3 includes estimated values based on assumptions and assessments where one or more significant inputs are not based on observable market information.

Klarna recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

13) Repurchase agreements

Repurchase agreement liabilities are used to obtain liquidity and fluctuate over time based on many factors, including market conditions, loans to the public and deposits growth and balance sheet management activities.

Treasury bills chargeable at central banks and bonds and other interest-bearing securities are sold under agreements to repurchase at a specified future date are not derecognized from the balance sheet as Klarna retains substantially all of the risks and rewards of ownership. Assets under repurchase agreements are transferred to the counterparty and the counterparty has the right to sell or re-pledge the assets. Such securities are kept on the balance sheet and pledged as collateral when the securities have been transferred and cash consideration has been received. Payment received is recognized under liabilities to credit institutions. The difference between the sale and repurchase price is accrued over the life of the agreement using the effective interest rate and recognized within net result from financial transactions.

14) Derivative instruments and hedge accounting

Derivative instruments are reported in the balance sheet on their trade date and are measured at fair value, both initially and in subsequent periods. Derivative instruments are presented as other assets or other liabilities. Changes in the fair value of derivative instruments are included in the income statement in the item net result from financial transactions.

The Group uses hedge accounting for fair value hedges to manage the interest rate risk of liabilities.

Changes in the fair value of derivatives that are designated and qualify as fair value hedging instruments are recorded in net result from financial transactions, together with any changes in the fair value of the hedged liability that are attributable to the hedged risk. Any residual mismatch between the hedging instrument and the hedged item is recognized as ineffective.

When hedging interest rate risk, any interest accrued or paid on both the hedging derivative and the hedged item is reported in interest expense. If the hedge no longer meets the criteria for hedge accounting the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortized to the income statement over the period for which the item was hedged. If the hedged item is sold or repaid, the unamortized fair value adjustment is recognized immediately in net results from financial transactions.

15) Borrowing

Financial liabilities with regard to borrowing are categorized as liabilities which are initially recorded at fair value, net of transaction costs incurred and then at amortized cost and with application of the effective interest method. This category comprises liabilities to credit institutions, deposits from the public, debt securities in issue and subordinated liabilities. Where a borrowing is in a qualifying fair value hedge relationship, its carrying value is adjusted for changes in fair value attributable to the hedged risk.

Payables to merchants are recorded within other liabilities in the balance sheet. Payables to merchants arise when Klarna facilitates payment transactions for merchants and holds the corresponding funds on their behalf. The settlement cycle is dependent on the counterparty, but is usually within a few working days of the transaction. As a result, Klarna records a liability towards the merchant, representing the money owed to them. Payables to merchants are recognized at amortized cost. On settlement, the Group derecognizes these amounts from the balance sheet.

16) Leasing

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The length of a lease term includes options to extend or terminate the lease when it is reasonably certain that the Group will exercise those options. The Group applies judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. For most leases, Klarna has judged that the lease term does not include additional periods after the initial period.

A right-of-use asset and a lease liability are recognized at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for initial costs, incentive payments, restoration costs and lease payments before the commencement date. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term.

The lease liability is initially measured at the present value of the remaining lease payments that are not paid at the commencement date. As most leases do not provide an implicit interest rate, the Group uses the incremental borrowing rate based on the information available at the lease commencement date in determining the present value of lease payments.

The lease liability is remeasured when there is any change in future lease payments arising, for example, from a change in an index, assessment or estimations on the usage of extension, termination or purchase options or the amount expected to be payable under a residual value guarantee. If a remeasurement of the lease liability occurs, a corresponding adjustment to the carrying amount of the right-of-use asset is made. Lease payments included in the measurement of the lease liability are fixed payments, variable lease payments that depend on an index or rate, amounts expected to be payable under a residual value guarantee and the exercise price under a purchase option, if applicable. The Group excludes payments for related services and other components of a lease. Klarna presents right-of-use assets in property and equipment and lease liabilities in other liabilities in the balance sheet.

Klarna has elected not to recognize right-of-use assets and liabilities for short-term leases and leases of low-value assets, mainly consisting of IT equipment and short-term rental of offices. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

17) Business combinations

Business combinations are accounted for using the acquisition method. Identifiable assets acquired and liabilities assumed are measured initially at their fair values at the acquisition date. The excess of the consideration transferred and the acquisition-date fair value of any previous equity interest in the acquiree, over the fair value of the identifiable net assets acquired is recognized as goodwill. Acquisition-related costs, other than those incurred for the issuance of debt or equity instruments, are charged to the consolidated income statement as they are incurred.

18) Divestitures

Non-current assets or disposal groups are classified as held for sale when their carrying amount is expected to be recovered principally through a sale transaction rather than through continuing use. The classification is made when the asset or disposal group is available for immediate sale in its present condition, and the sale is highly probable within one year. Upon such classification, the assets or disposal group is measured at the lower of their carrying amount and fair value less costs to sell.

The gain or loss on divestment is determined as the difference between the consideration received, net of transaction costs, and the carrying value of the net assets disposed of. The gain or loss is recognized within other income or general and administrative expenses in the income statement. Where goodwill has been allocated to the disposed operation, typically measured based on the relative values of the disposed operation, such goodwill is included in the carrying amount of the operation when determining the gain or loss on disposal.

An operation is classified as discontinued when it represents a separate major line of business or geographical area of operations that either has been disposed of or is classified as held for sale. Refer to Note 39 for further details.

For foreign operations, cumulative foreign currency translation differences previously recognized in other comprehensive income are reclassified to the income statement upon divestment. This reclassification is included as part of the gain or loss on disposal.

19) Intangible assets

Goodwill

Goodwill represents the excess of consideration paid over the fair value of the identifiable net assets acquired in a business combination. Goodwill is not amortized but is reviewed for impairment annually and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. Impairment of goodwill is not reversed. The Group monitors goodwill for impairment considerations at the operating segment level. In the event of a disposal that qualifies as a business, or where there is a significant organization of the business, goodwill is allocated based upon relative fair values.

Trademarks, tradenames, licenses and other customer-related intangible assets

Identifiable intangible assets following business combinations include trademarks, tradenames, licenses, developed technology and customer relationships. Acquired intangible assets are recorded at fair value on the date of acquisition and amortized over their estimated useful lives, generally 3-20 years. The Group reviews the carrying amounts of intangible assets for impairment at the asset group level whenever events or changes in circumstances indicate that the carrying amount of the asset group may not be recoverable.

Capitalized development costs and licenses

Costs associated with IT systems and software, whether developed internally or acquired, are recognized as intangible assets when the following criteria are met:

- It is technically feasible to complete the intangible asset so that the asset will be available for use or sale;
- Adequate resources are available to complete the development;
- There is an intention to complete and use the intangible asset for the provision of services;
- Use of the intangible asset will generate probable future economic benefits; and
- Expenditures attributable to the intangible asset can be measured reliably.

Depreciation is computed using the straight-line method over the estimated useful lives of the depreciable capitalized development costs and licenses (generally, 3-5 years) and reported within depreciation, amortization and impairments in the income statement. Costs related to development activities that do not satisfy the above criteria, including for maintenance, are expensed as incurred.

Impairment

Goodwill and intangible assets with indefinite useful lives are tested for impairment annually. This is tested by estimating the recoverable amount, which is the higher of the fair value less costs to sell and the value in use. If the recoverable amount is lower than the carrying amount, the asset is written down. See Note 21 for further information on the measurement of goodwill and significant assumptions used in the annual impairment test.

Intangible assets with finite useful lives undergo impairment testing whenever events or changes in circumstances suggest that the carrying amount might not be recoverable.

20) Tangible assets

Tangible assets are stated at historical cost less accumulated depreciation and impairment. Depreciation is computed using the straight-line method over the estimated useful lives of the depreciable assets, generally, applying the following useful lives to each tangible asset class:

Asset class	Useful life
Equipment, tools, and fixtures and fittings	5 years
Computers and other machinery	3 years
Leasehold improvements	The shorter of lease term and useful life

If there is an indication that the recoverable value is less than the carrying amount, an impairment review is completed and any impairment loss is recognized within depreciation, amortization and impairments in the income statement. The cost and accumulated depreciation for an tangible asset that is sold, retired or otherwise disposed of are derecognized and the resulting gains or losses are recorded in the income statement.

21) Revenue recognition

Revenue is recognized when control of the promised goods or services is transferred to customers, in an amount that reflects the consideration the Group expects to be entitled to in exchange for those goods or services. The product offerings from which revenues are recognized do not differ in any significant way between geographical markets. Revenue at Klarna relates to interest income, commission income and other operating income which is defined below.

Interest income

Interest income includes the interest consumers pay to spread the cost of transactions over longer time with one of the Group's fairer financing products or when they delay the settlement of transactions with the Group's payment flexibility feature. The group also recognize interest income related to incremental fees earned from certain merchants for the provision of interest-free promotional loans to their consumers.

Interest income on financial assets measured at amortized cost, and certain fees charged for payment flexibility features, are recognized in the income statement using the effective interest method.

Interest income also includes interest from treasury bills issued by central banks. See Note 5.

From time to time, Klarna may enter into contracts with merchants for which Klarna pay a fee for their role as intermediary in arranging a consumer financing facility. Klarna recognize such fees as a reduction of interest income.

Commission income

Revenues for different types of services are reported as commission income or commission expenses.

Merchant revenue

Merchant revenue refers to fees paid by the merchants, generated when consumers transact on Klarna's network. It includes merchant fees, interchange revenue and fees for settling disputes. Merchant revenue is derived from the volume of transactions Klarna process multiplied by the fees charged, which vary among the Group's geographies. The pricing is a combination of value-based and fixed pricing, charged either ad valorem (proportional to the estimated value of goods and services purchased on Klarna's network) or fixed fees on each transaction, or a mix of both. Where consumers return merchandise or goods and merchants process a refund, merchant fees charged for the original transaction are not returned to the merchant.

The Group's contracts with merchants consist of a master agreement including terms, conditions and pricing. Klarna is not obligated to perform under the contract until a transaction occurs and thus each transaction represents a separate performance obligation to the merchant as the customer. The Group's service offering comprises a single performance obligation to merchants to facilitate transactions with consumers. The transaction price is recognized at the point in time when the merchant successfully confirms the transaction, which is when the terms of the contract are fulfilled. The Group provide a reduction of merchant fees to certain merchants based on performance measures, including volume of processed transactions. Such fee rebates are recorded as a reduction of merchant revenue. Klarna also enter into contracts with certain merchants to expand the user base and market presence, and for brand promotion through co-marketing activities, as detailed in section *Promotional and marketing arrangements below*.

Consumer revenue

Consumer revenue refers to revenue the Group earn from consumer fees, primarily consisting of reminder fees and Klarna card ownership fees. The consumer may be charged a fee, being a fixed amount that constitutes the transaction price. Reminder fees are a tool to incentivize repayment and cover our costs. We keep them low relative to the overall purchase amount and only apply them to missed payments once the consumer has been given the chance to catch up. The transaction price is

recognized at the point in time the performance obligation is satisfied based on the terms of the executed consumer agreement.

The Group's contracts with Klarna card consumers as the customer are defined by terms and conditions at the outset of the customer relationship. Each transaction represents an individual and separate performance obligation. The Group's contracts with consumers not using Klarna card are defined by the terms and conditions at the transaction level and each transaction represents a separate contract with the consumer as Klarna's customer.

Distribution partner referral arrangements

Klarna enter into contracts with third-party partners to distribute Klarna's payment solutions to the merchants. For these contracts, the Group evaluate who the customer is and if Klarna is acting as the principal or agent in the specific arrangement. Generally, the Group's customer is considered to be the merchant and Klarna are considered to be the principal in these arrangements, while third-party partners are determined to be an agent in the transaction. The Group recognize incremental costs of obtaining a contract in accordance with IFRS 15 "Revenue from Contract with Customers" for the commission paid to these third party partners. These expenses are classified within commission expenses in the income statement.

Promotional and marketing arrangements

Klarna also enter into contracts with certain merchants to expand the Group's user base and market presence, and for brand promotion through co-marketing activities in exchange for cash and/or share warrants provided to the selected partners, including merchants. The Group evaluate if the consideration payable is in exchange for a distinct good or service. Where Klarna conclude the payment is for a distinct good or service, it is recognized as general administrative expenses. If a payment is assessed to be other than for a distinct good or service, it is recognized as a reduction to the transaction price. The Group recognize commercial agreement assets where the consideration represents a probable future economic benefit to be realized over the expected benefit period. These costs are amortized over the useful life of the contract, which is typically between 3-5 years.

From time to time the Group may offer promotions to consumers (that are not Klarna's customers in the merchant fee transaction) with the purpose of acquiring new consumers, promoting the Klarna brand, and use of the Klarna app and payment options. These promotions represent a reduction on the total amount collected from consumers. Where the Group assess there is no explicit or implicit expectation for promotions to be provided, Klarna recognize within general administrative expenses. Where the Group assess there is an expectation, the cost of the promotion is recognized as a reduction in the revenue earned from the transaction, with any excess of the cost of the promotion above the revenue recognized within general administrative expenses.

Other operating income

Advertising revenue is earned from merchants who place advertisements on Klarna's network, including sponsored search, affiliate programs and brand ads. Klarna enter into contracts for advertising either directly with merchants or through other third parties. The transaction price is determined based on the advertising model, with fees that may be fixed or variable, typically based on the number of impressions delivered or actions taken by users, such as clicks or purchases. Revenue from impression-based ads is recognized in the period when an ad is displayed to users. For action-based ads, revenue is generally recognized at a point in time, when a specified action, such as a click or purchase, occurs.

The Group's contracts for advertising services are separate from other merchant contracts and include a single performance obligation. For advertising revenue generated through other third parties, the Group recognize revenue on a gross basis if Klarna is the principal and on a net basis if Klarna is the agent. This assessment is based on whether Klarna control the service before it is delivered to the customer.

22) Interest expenses

Interest expenses are the costs associated with funding Klarna's consumer financing solutions and include interest that Klarna pay on the deposits from the public, calculated using the effective interest method, and fair value adjustments on receivables held for trading in connection with forward flow agreements.

23) Commission expenses

Expenses for different types of services are reported as commission expenses, such as partner commissions. Partner commission is an expense Klarna has towards its distribution partners, the expense is dependent on the specific contract.

24) Net result from financial transactions

The net result from financial transactions comprises the net profit or loss on the trading or disposal of financial instruments, value changes of financial instruments that are measured at fair value through profit or loss, net profit or loss on currency exchange activities or other recognized changes in the value of assets or liabilities, to the extent they can be attributed to exchange rate changes and other financial income and expenses not directly attributable to a financial instrument.

25) Credit losses, net

Impairment losses from loans to the public are reported as credit losses, net.

Credit losses, net for the period consist of realized credit losses, recovered amounts from debt sales and provisions for credit losses for granted credit with a deduction for the reversal of provisions for credit losses made previously. Realized credit losses are losses whose amount is, for example, determined via bankruptcy, a composition arrangement, a statement by an enforcement authority or the sale of receivables.

26) Income taxes

Income taxes consist of current tax and deferred tax. Income taxes are reported directly in the income statement except when the underlying transaction is reported directly against equity or other comprehensive income, in which case also the accompanying tax is reported in equity or other comprehensive income. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Deferred tax is reported according to the balance sheet method for all temporary differences between an asset's or a liability's tax base and its carrying amount in the balance sheet. Deferred tax assets are reported for deductible temporary differences to the extent it is probable that the taxable profit will be available against which the deductible temporary difference can be utilized. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Group assesses on an ongoing basis as well as at the end of the year the possibility of recognizing deferred tax assets related to tax losses carried-forward. Deferred tax assets attributable to tax losses carried forward are reported only if it is probable that they will be used towards taxable profits in the foreseeable future. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the probability of taxable profits being available in the future and the quantum of taxable profits that are forecasted to arise. These judgments include management's expectations of the growth of profit before tax in different jurisdictions, forecasted revenues and expenses, and the timing of the reversal of taxable temporary differences.

Uncertain tax positions are measured on an ongoing basis and the method is determined by taking all known facts and circumstances into account.

27) Share-based payments

Klarna offers equity-based programs to employees and certain third-party contributors, including merchants, partners and service providers.

Employee Restricted Share Unit Program and Individual Contributor Share Warrants and Share options

Restricted share units ("RSU") granted to employees vest on a graded vesting schedule over a four-year period. For share warrants granted to certain individual contributors, including employees as well as executive officers and directors, the services rendered are measured with reference to the grant-date fair value of the equity instruments using a Black-Scholes model. The cost of the share-based payments granted to employees is recognized over the vesting period, which represents the period the service conditions are fulfilled. The expense is presented under general administrative expenses in the income statement. The employment vesting condition is a non-market based condition and a forfeiture estimate is factored into the assumption of how many equity instruments are expected to vest.

Any related social security charges relating to share-based payments are recognized as an expense during the corresponding period based on the fair value that serves as the basis for a payment of social security charges. The expense is presented under general administrative expenses in the income statement. In many jurisdictions, tax authorities levy taxes on share-based compensation transactions with employees that give rise to a personal tax liability for the employee. In some cases, Klarna is required to withhold the tax due and to settle it with the tax authority on behalf of the employees. To fulfill this obligation, the terms of Klarna's restricted share unit arrangements permit the Group to withhold the number of shares that are equal to the monetary value of the employee's tax.

Partner Share Warrants

Klarna has granted share warrants to certain partners, including merchants and other service providers, in return for services. Share-based payments to partners are generally measured at the fair value of the goods or services received, and measured at the time when such goods and services are received. If the fair value of goods and services cannot be reliably measured, the fair value of the equity instruments is used. The Group recognize commercial agreement assets where the consideration paid represents a future economic benefit, and these assets are amortized over the contract period, and recognized within general administrative expenses where the payment is in exchange for a distinct service, or as a reduction to transaction prices if in exchange for no distinct service.

Further information relating to share-based payment transactions is presented in Note 37.

28) Provisions

The Group recognizes provisions for present obligations arising for past events when payment of the obligations is probable and can be reliably estimated. Provisions primarily consists of consumer refund commitment, and pending legal and tax litigation.

Refer to commitments policy above and Note 31 for information regarding the Group's provisions for consumer refund commitment.

Klarna operates in a regulatory and legal environment that, by nature, involves an element of litigation risk inherent to its operations and from time to time Klarna may be party to litigation, arbitration and regulatory investigations and proceedings arising during the ordinary course of business. When Klarna can reliably measure the outflow of economic benefits in relation to a specific case and considers such outflows to be probable, a provision is recorded. Given the subjectivity and uncertainty of determining the probability and amount, a number of factors are assessed, including legal advice, the stage of the matter and historical evidence from similar incidents. Judgment is required in concluding such assessments.

29) Employee Benefits

Employee benefits include all forms of consideration provided by the Group in exchange for services rendered by employees, including post-employment pension plans. The Group's pension plans are defined contribution plans, which means that contributions are made to an independent legal entity according to a fixed pension plan. These contributions are recognized as personnel costs in the period they apply to. After the contributions are made, the Group has no legal or other obligations.

30) Group contribution

Group contribution is recognized in the parent company according to its financial nature. Group contribution received from a subsidiary is reported according to the same principles as dividend received. For parent companies this means that group contribution received is reported as revenue in the income statement. Group contribution paid by a parent company to a subsidiary is to be reported as increased participation in the group company. For subsidiaries that pay or receive group contribution, this is to be reported together with the accompanying tax in equity among retained earnings.

31) Reclassifications of comparatives

During the current period, ended December 31, 2024, Klarna refined revenue recognition policies relating to specific items within commission income and interest income and reclassified the 2023 presentation accordingly:

- Certain administrative fees earned were reclassified to interest income from commission income. The fees reclassified for the period ended December 31, 2023 amounted to SEK 1,021m.
- Certain fees paid to merchants, for their role as intermediary in arranging a consumer financing facility, were reclassified as a reduction of interest income from commission expense. The fees reclassified for the period ended December 31, 2023 amounted to SEK 141m.

Note 3 Risk management

Klarna's objectives when managing capital are to safeguard the Group's ability to continue as a going concern and to comply with regulatory capital requirements.

Regulatory requirements

Within the Group, Klarna Holding AB and its subsidiary, Klarna Bank AB, are subject to the regulatory capital requirements imposed by the SFSA. The regulatory capital framework requires Klarna to maintain a minimum level of capital to cover its operational, credit, and market risks. Klarna's regulatory capital is composed of Tier 1 and Tier 2 capital, which include common equity, retained earnings, and subordinated debt.

Capital adequacy

Klarna monitors its capital adequacy ratio and Internal Liquidity Adequacy Assessment Process ("ICLAAP") in accordance with the regulatory definition of these measures. As of December 31, 2024 and December 31, 2023, respectively, Klarna was in compliance with these requirements. More information regarding capital adequacy is disclosed in Note 38.

Capital structure

Klarna's capital structure is regularly reviewed by the board of directors. The review involves assessing the cost of capital and ensuring compliance with regulatory capital requirements. The key components of Klarna's capital structure include:

Equity: Common shares, additional paid-in capital, and retained earnings.

Debt: Debt obligations, including subordinated debt.

Risk descriptions

The Group categorizes the key risks it is exposed to in the sections below. These risk categories form the basis of how Klarna identifies, assesses, manages and monitors risk.

Credit risk

Definition

Credit risk is the risk of financial loss due to a counterparty failing to meet its contractual obligations or concentrations in exposure. To manage the Group's credit risk, cash and securities held are placed with financial institutions that management believes are of high credit quality, and the quality of the Group's lending is closely monitored through our underwriting process. Klarna makes real-time underwriting decisions for each transaction, leveraging its records, including the customer's history with Klarna and purchase behavior from active Klarna consumers, merchant data, credit reports and open banking data to understand the financial position of the consumer at that point in time. For further details on credit risk, refer to Note 2.

Risk Measurement and Exposure

Credit risk	31 Dec 2024	31 Dec 2023
Loan receivables, gross	106,446	94,690
Allowance for credit losses	(3,859)	(3,498)
Loan receivables, net carrying amount	102,587	91,192
of which: Loans to credit institutions	7,752	4,502
of which: Loans to the public	93,970	86,108
of which: Accrued income	865	582

See more information of stage allocation and movements in Loans to the public in Note 19.

Credit quality of debt securities	31 Dec 2024	31 Dec 2023
Treasury bills chargeable at central banks, etc., and bonds and other interest-bearing securities		
AAA	6,650	5,643
AA+	101	746
AA	—	1,066
AA-	782	318
Total	7,533	7,773

Market Risk

Definition

Market risk is the risk of movements in market prices impacting Klarna's earnings or capital position.

Risk Measurement and Exposure

Currency exposure¹

The table below shows the net average currency exposure and the effects of a 10% change in foreign exchange rates on the exposure as of the end of the period.

	EUR	USD	GBP	Other	Total exposure
Dec 31, 2024					
Net average currency exposure	189	145	107	229	670
Effect of 10% change	(19)	(14)	(11)	(23)	(67)
Dec 31, 2023					
Net average currency exposure	293	114	45	277	729
Effect of 10% change	(29)	(11)	(5)	(28)	(73)

Economic value accounts for changes to discounted values of future cash flows. In accordance with regulatory guidelines, Klarna apply different stress tests to account for both parallel shifts and a rotation of the yield curve. The tables below summarize the worst possible outcome based on these stress tests.

Interest rate risk exposure¹

As a bank, Klarna is required to monitor exposures toward interest rate risks using the Economic Value of Equity (EVE) approach according to the relevant EBA regulations and SFSA methodologies. The EVE approach measures interest rate driven changes to the net present value of future cash flows generated by balance sheet items. The change to EVE is measured using various interest rate scenarios and including parallel shifts.

The table below shows the change in the EVE after applying a parallel shift to the yield curve.

	SEK	EUR	USD	GBP	Other	Total Exposure
December 31, 2024						
-200 bps parallel shift in interest rates	43	(376)	29	70	—	(233)
+200 bps parallel shift in interest rates	(42)	350	(26)	(65)	—	217
December 31, 2023						
-200 bps parallel shift in interest rates	53	(432)	55	40	4	(280)
+200 bps parallel shift in interest rates	(51)	411	(53)	(38)	(3)	266

¹ The amounts are presented in SEKm.

Liquidity Risk

Definition

The risk of the Group being unable to meet its financial obligations, as they fall due, or unable to fund its operational needs without incurring unacceptable costs.

Risk Measurement and Exposure

The Group complies with all liquidity regulatory requirements, including Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR), and monitoring and management of Klarna's liquidity survival horizon.

Funding obligations

Below table summarizes the undiscounted contractual cash flows related to financial liabilities, prior year figures have been updated. Interest is included in the amounts disclosed to contractual maturity date.

Dec 31, 2024	Payable on demand	up to 3 months	>3 to 12 months	>1-5 years	>5 years	Total
Financial liabilities						
Liabilities to credit institutions	—	524	951	—	—	1,475
Deposits from the public	28,527	22,137	35,950	23,256	—	109,870
Debt securities in issue	—	168	56	1,554	—	1,778
Other liabilities	—	9,749	316	740	98	10,903
<i>of which: relates to lease liabilities</i>	—	66	185	677	98	1,026
Accrued expenses	—	2,875	630	545	—	4,050
Subordinated liabilities	—	53	158	849	2,707	3,767
Total	28,527	35,506	38,061	26,944	2,805	131,843

Dec 31, 2023	Payable on demand	up to 3 months	>3 to 12 months	>1-5 years	>5 years	Total
Financial liabilities						
Liabilities to credit institutions	363	372	901	—	—	1,636
Deposits from the public	18,692	13,879	51,990	14,166	—	98,727
Debt securities in issue	—	570	4	85	—	659
Other liabilities	—	10,201	289	1,075	129	11,694
<i>of which: relates to lease liabilities</i>	—	90	211	894	151	1,346
Accrued expenses	—	2,723	806	66	—	3,595
Subordinated liabilities	—	11	—	—	740	751
Total	19,055	27,756	53,990	15,392	869	117,062

The Group's commitments for loan funding are disclosed in Note 33. Obligations related to the Group's securitization transactions had contractual maturities of less than 12 months and are disclosed in Note 38.

Operational Risk

Definition

The risk of inadequate or failed processes, personnel, products or third parties.

Risk Measurement and Exposure

Risks are assessed by impact and likelihood that together generate a risk level. Impact is evaluated through; financial, operational, regulatory, reputational, internal and strategic aspects. The risk exposure is monitored frequently, and reported to Executive Management and the Board at least quarterly, in addition to the risk appetite escalation process.

ICT and Security Risk

Definition

The risk of failures or breaches in information or communication systems including system outages, software failures, data breaches, physical security breaches or cyber-attacks.

Risk Measurement and Exposure

Risks are assessed by impact and the likelihood that together generate the risk level. Impact is evaluated through: financial, operational, regulatory, reputational, internal and strategic aspects, as well as confidentiality, integrity and availability loss. The risk exposure is monitored frequently and reported to Executive Management and the Board at least quarterly in addition to the risk appetite escalation process.

Business Risk

Definition

The risk of suboptimal strategy selection or sustainability factors impacting the achievement of Klarna's business objectives or altering the long term valuation or viability of the business.

Risk Measurement and Exposure

New Business plans are developed and reviewed yearly. Achievement against the plan is reviewed monthly by the group management team, via detailed updates on key financial and business metrics.

Note 4 Operating segments and income by geographical area

Klarna determines operating segments based on how our Chief Operating Decision Maker ("CODM") manages the business, makes operating decisions around the allocation of resources, and evaluates Klarna's operating performance.

Klarna's CODM role is fulfilled by the executive officers as a group, who collaboratively assess financial performance and make resource allocation decisions on a consolidated basis. Klarna operates as one operating segment and has one reportable segment.

Geographic information

Net operating income less net result from financial transactions are presented by major geographic regions based upon the billing address of the consumer. Interest income derived from the banking activities of the Group is based on the geographic location of the financial institution for which financial instruments have been purchased.

Group ¹	2024	2023
United States	7,869	6,041
Germany	6,498	5,754
Sweden ²	4,065	2,337
United Kingdom	3,245	2,615
Other countries	4,759	4,033
Total net operating income less net result from financial transactions	26,436	20,780

Total net operating income is net of commission expense, interest expense and net result from financial transactions. These items impact larger markets proportionally more and thus comparing growth in total net operating income may not accurately reflect underlying market growth.

No individual country within other countries contributed more than 10% of revenues.

¹ 2023 geographical split have been re-presented following specific allocation keys to mirror internal reporting.

² 2024 net operating income allocated to Sweden includes the recognized gain from sale of KCO of SEK 1,810m, see Note 39.

The following table presents Klarna's net operating income, less net result from financial transactions disaggregated by category:

Group	2024	2023
Income from merchants and partners	17,944	15,369
Consumer income	3,633	2,517
Net interest income	2,851	2,865
Other income ¹	2,008	29
Total net operating income less net result from financial transactions	26,436	20,780

Income from merchants and partners

Income from merchants and partners consists of merchant revenue and advertising revenue, which are presented as commission income and other operating income, net of commission expenses which amounted to SEK 1,202m (552m). Merchant revenue refers to fees paid by Klarna's merchants, generated when consumers transact on our network. It includes merchant fees, interchange revenue and fees for settling disputes. Advertising revenue is earned from merchants who place advertisements on Klarna's network, including sponsored search, affiliate programs and brand ads.

Klarna's non-current assets, comprised of tangible, intangible assets, and other assets that are expected to be recovered more than twelve months after the reporting period:

Group	2024	2023
Non-current assets		
Sweden	4,502	10,162
Germany	2,117	2,349
United Kingdom	1,843	1,517
United States	1,112	1,558
Other countries	3,665	2,054
Total non-current assets	13,239	17,640

No individual country within other countries made up more than 10% of non-current assets.

¹ Other revenue in 2024 included gain from sale of subsidiaries primarily driven by the divestment of KCO. See more information in Note 39.

Note 5 Interest income

	2024	2023
Loans to the public ¹	5,629	4,587
Loans to credit institutions	1,201	506
Group companies	4	—
Other interest income	319	632
Total	7,153	5,725

Interest income includes the interest consumers pay to spread the cost of transactions over longer time with one of the Group's fairer financing products or when they delay the settlement of transactions with the Group's payment flexibility feature. The group also recognize interest income related to incremental fees earned from certain merchants for the provision of interest-free promotional loans to their consumers.

Interest income from loans to the public for 2023 is updated following a reclassification of SEK 880m. Refer to section *Reclassifications of comparatives* in Note 2.

Note 6 Interest expenses

	2024	2023
Deposits from the public	(3,624)	(2,356)
Interest-bearing securities and chargeable treasury bills etc.	(199)	(202)
Liabilities to credit institutions	(182)	(140)
Debt securities issued	(70)	(49)
Subordinated liabilities	(180)	(59)
Other interest expenses	(47)	(54)
Total	(4,302)	(2,860)

¹ Items within loans to the public have been reclassified as detailed in Note 2.

Note 7 Leases

Klarna's leases are primarily comprised of office facilities and IT office equipment with various expiration dates through December 2031. We have the option to renew or extend our leases, and certain agreements also provide the option to terminate with prior written notice. As of December 31, 2024 and December 31, 2023, we have not included these provisions in determining the lease term, as it is not reasonably certain that these options will be exercised.

During 2024 and 2023, Klarna recognized impairment loss of SEK 58m and SEK 341m respectively, related to the early termination of certain lease agreements for office space. Refer to Note 22 for additional information regarding right-of-use assets.

The following table presents lease expenses and expenses for short-term and low-value leases recognized in 2024, and 2023:

	2024	2023
Depreciation of right-of-use assets	(174)	(295)
of which: buildings	(174)	(292)
of which: cars	—	(1)
of which: other	—	(2)
Impairments of right-of-use assets	(58)	(341)
Interest expense for lease liabilities	(30)	(43)
Total right-of-use lease cost	(262)	(679)
Expenses relating to short-term leases	(109)	(72)
Expenses relating to low-value assets	(5)	—
Income of sub-leasing right-of-use assets	6	—
Total short-term and low value leases	(108)	(72)

Note 8 Commission income

	2024	2023
► Merchant	16,578	14,023
► Consumer ¹	3,566	2,620
► Other	198	162
► Total	20,342	16,805

Commission income for 2023 is updated following a reclassification of certain fees, see section *Reclassifications of comparatives* in Note 2, resulting in a decrease in commission income of SEK 1,021m, within the line "consumer".

¹ Items within commission income have been reclassified as detailed in Note 2.

Note 9 Commission expenses

	► 2024	► 2023
► Commission to partners ¹	(860)	(630)
► Other commissions	(342)	(232)
► Total	(1,202)	(862)

Commission expenses for 2023 is updated following a reclassification, see *Reclassifications of comparatives* in Note 2, resulting in a decrease in commission expenses of SEK 141m, within the line "commission to partners".

Note 10 Net result from financial transactions

	► 2024	► 2023
► Realized and unrealized movements in exchange rates	(58)	216
► Gains from financial instruments	35	253
► Losses from financial instruments	(726)	(603)
► Realized and unrealized gains (losses) on shares held in listed and unlisted companies	24	(16)
► Total	(725)	(150)

As of December 31, 2024, Klarna Bank AB (publ) had entered into derivatives with the gross nominal amount of SEK 81,511m (60,960m), see Note 24.

¹ Items within commission expenses have been reclassified as detailed in Note 2.

Certain employees in senior management of Klarna Holding AB and its subsidiaries are employed by Klarna Group Holdco Ltd, the parent company of Klarna Holding AB. As the substance of the arrangement is that these persons constitute management also of Klarna Holding AB, their remuneration is included in this report as members of management although their remuneration is accounted for in other group companies.

On 17 October 2024, Klarna Holding AB (publ) restructured its board to reflect its internal subsidiary role within Klarna Group plc, the main holding company since May 2024. David Fock was appointed Chairperson, joining Camilla Giesecke and Sebastian Siemiatkowski.

¹ As part of the Group efforts to align compensation with global standards and peers, the Group introduced a new incentive scheme granting options to certain individual contributors, including employees, executive officers, and directors.

² Served on the board until October 17, 2024 when Klarna Holding AB (publ) restructured its board to reflect its internal subsidiary role within Klarna Group plc, the main holding company since May 2024.

³ On October 17, 2024, David Fock and Camilla Giesecke were appointed to the Board. Their total remuneration is presented on separate lines from when they became members of the board, remuneration before October 17, 2024 is presented under the line "Other members of group management team".

⁴ Served on the board until March 12, 2024.

⁵ Variable remuneration includes SEK 17.8m related to an award from prior years that is accounted for as an expense in 2024 in accordance with IFRS 2.

Remuneration

The rules on remuneration are found in the Swedish Banking and Financing Act (2004:297) and the Swedish Financial Supervisory Authority's regulations (FFFS 2011:1 and FFFS 2020:30) regarding remuneration systems in credit institutions, securities companies and fund management companies licensed to conduct discretionary portfolio management (below "the remuneration rules").

In accordance with part eight of regulation (EU) No 575/2013, commonly referred to as the Capital Requirements Regulation (CRR), and the regulations and general guidelines of the Swedish Financial Supervisory Authority (FFFS 2014:12) regarding the disclosure of information on capital adequacy and risk management (below "disclosure rules"), the Group shall at least annually in its annual report and on its website give information on its Remuneration Policy and remuneration systems.

The information below follows the provisions of the disclosure rules.

Remuneration program

The Group has a remuneration structure that recognizes the importance of well-balanced but differentiated remuneration structures, based on business and local market needs, as well as the importance of being consistent with and promoting sound and efficient risk management not encouraging excessive risk-taking and short-term profits or counteracting the Group's long term interests.

The aim with the remuneration structure is to both support the ability to attract and retain talents in every position as well as support equal and fair treatment, but also to ensure that remuneration in the Group is aligned with efficient risk management and compliant with existing regulations.

Remuneration, nomination and governance committee

The Board of Directors has established a remuneration, nomination and governance committee, which supports the board of directors in establishing and reviewing the compensation and benefits strategy and guidelines as well as in preparing the proposals to the annual general meeting of shareholders regarding the compensation of the members of the Group's board of directors and the Group's executive officers. The committee may submit proposals to the board of directors on other compensation-related matters. The remuneration, nomination and governance committee consists of three members.

¹ On December 29, 2023, the company appointed Matthew Miller to the Board.

² Variable remuneration includes SEK 2.4m related to an award for 2022.

Remuneration policy and risk analysis

The Board has adopted a Remuneration Policy that is designed to be compatible with and promote sound and effective risk management, avoid exaggerated risk-taking and be in line with the Group's long-term interests. The Remuneration Policy shall be revised when it is necessary, at least annually.

The Remuneration Policy, remuneration system and list of those staff members whose professional activities have a material impact on the Group's risk profile (Identified staff) are assessed annually. The assessment includes an analysis of all key risks the Group is or might be exposed to, including the risks associated with its Remuneration Policy and remuneration structure. In general, the Group's remuneration system involves low risk compared with large banks and other credit institutions with comprehensive trading and other businesses covered by the remuneration rules. The risk cycle in the Group's credit business is assessed to be short, which means that any risks materialize within a few months.

Remuneration structure

The Group applies the following general principles on remuneration:

- remuneration shall be set on an individual basis, based on experience, competence and performance
- remuneration shall not be discriminating
- remuneration shall be competitive, but not counterproductive to the Group's long term goals and ability to operate successfully throughout a full economic cycle.

The remuneration structure within the Group comprises fixed remuneration and variable remuneration. As stipulated in the remuneration rules, the Group ensures that the fixed and variable components are appropriately balanced by ensuring that the fixed remuneration represents a sufficiently large proportion of the employee's total remuneration allowing the Group the possibility to pay no variable remuneration. This means that the Group can decide that the variable remuneration, including deferred payment, can be canceled in part or in whole under certain circumstances, as described below.

Variable remuneration shall amount to a maximum 100% of an employee's total fixed remuneration for Identified staff and 200% of an employee's total fixed remuneration for other employees, unless otherwise decided by the Board of Directors in exceptional cases.

Variable remuneration should not only take into consideration the employee's and his/her team's result but preferably also the Group's total result as well as qualitative criteria such as the employee's compliance with internal rules. It should be based on results that are adjusted for current and future risks. The Group shall ensure that it is entitled to unilaterally decrease or withdraw all or parts of the variable remuneration if the criteria are not met or if the Group's financial situation deteriorates substantially.

If an Identified staff member receives variable remuneration exceeding the amount stipulated in the remuneration rules such remuneration would be subject to deferral and retention.

Executive Officer Agreements

The Group have entered into written employment agreements with each of the Group's executive officers. These agreements generally provide for notice periods of 12 months (although some include a shorter notice period or no notice period) for termination of the agreement by Klarna or by the relevant executive officer, generally during which time the executive officer will continue to receive base salary and benefits. These agreements also contain customary provisions regarding non-competition, non-solicitation, non-disparagement, confidentiality of information and/or assignment of inventions. However, the non-competition and non-solicitation provisions may be unenforceable or otherwise limited under applicable law.

Remuneration to Group management team and Identified staff

Total remuneration awarded and paid to the group management team of 12 persons¹ (10) amounts to SEK 729.4m (197.1m) and for Identified staff, 58 persons¹ (46), this sum amounts to SEK 189.9m (132.8m), which aggregates to SEK 919.2m (329.9m). Variable remuneration accounts for SEK 620.6m (97.6m) of the group management team figure related to 11 (10) of its members and SEK 90.4m (44.4m) of the Identified staff figure, related to 58 (46) beneficiaries.

The tables below present both variable remuneration awarded and paid:

2024	Value of variable remuneration			Number of beneficiaries		
	Group management team	Identified staff	Total	Group management team	Identified staff	Total
Type of variable remuneration						
Paid as one off cash payments (relating to referral bonuses / gratuities / sales commission)	(11.5)	(1.4)	(12.9)	4	9	13
Paid in the form of shares, share-related instruments, financial instruments or non-cash benefits	(543.6)	(37.3)	(580.9)	11	58	69
Deferred remuneration awarded	(65.5)	(50.2)	(115.7)	11	50	61
Severance payments paid	—	(1.5)	(1.5)	—	2	2
Total	(620.6)	(90.4)	(711.0)	11	58	69

During 2024, eight employees have been remunerated more than EUR 1m (six between EUR 1m and EUR 1.5m, one between EUR 1.5m and EUR 2m, one between 2m and EUR 2.5m).

2023	Value of variable remuneration			Number of beneficiaries		
	Group management team	Identified staff	Total	Group management team	Identified staff	Total
Type of variable remuneration						
Paid as one off cash payments (relating to referral bonuses / gratuities / sales commission)	(10.5)	(0.9)	(11.4)	6	9	15
Paid in the form of shares, share-related instruments, financial instruments or non-cash benefits	(26.7)	(27.1)	(53.8)	10	46	56
Deferred remuneration awarded	(60.4)	(16.4)	(76.8)	10	36	46
Total	(97.6)	(44.4)	(142.0)	10	46	56

During 2023, seven employees have been remunerated more than EUR 1m (three between EUR 1m and EUR 1.5m, two between 2m and EUR 2.5m, two above EUR 2.5m)

As at December 2024, total outstanding deferred remuneration² to the Group management team of 12 persons³ (10) amounts to SEK 314.1m (50.5m) and for Identified staff, 53 persons (38), this sum amounts to SEK 72.6m (35.7m), which aggregates to SEK 386.7m (86.2m).

¹ The number within parentheses refers to the number of positions that have received salaries and remuneration during the year, and not necessarily to the number of individuals.

² There has been no risk adjustment reduction made to deferred remuneration awards during 2024 or 2023.

³ The number within parentheses refers to the number of positions that have received salaries and remuneration during the year, and not necessarily to the number of individuals.

Other	166	86
Total	360	277

Deferred tax assets attributable to carryforward of unused tax losses or other deductible temporary differences are recognized only to the extent that it is probable that future taxable profits will be available against which the unused tax losses and unused tax credits can be utilized.

¹ Last year, deferred taxes were presented including netting of deferred tax assets and liabilities. In 2024, there has been a change of presentation as these are now presented gross, before netting.

During 2024, deferred tax assets and liabilities have been recognized resulting in a SEK 59m (808m) tax benefit in the income statement. Deferred tax assets have been recognized where the recognition criteria are met, of which SEK 64m (710m) is in respect of tax losses. The gross deferred tax assets and liabilities have been set off on the balance sheet to the extent the requirements for netting are met.

Tax losses carried forward in the Group for which tax assets are not recognized in the balance sheet amount to SEK 14,820m (19,964m) gross. Other deductible temporary differences which have not been recognized amount to SEK 1,457m (504m) gross. Deferred tax assets have not been recognized in respect of these temporary differences as they have not been assessed as likely to offset taxable profits elsewhere in the Group under the IAS 12 recognition criteria.

The following table illustrates in respect of what item, deferred tax assets have not been recognized:

Tax attributes not represented by a deferred tax asset - 2024	Tax losses		Deductible temporary differences

Impairment testing of Goodwill and Intangible assets

The Group conducted its annual goodwill impairment test as of October 1, 2024. No impairment losses were identified, as the recoverable amount, measured as value in use, exceeded the carrying amount.

The impairment test is performed at the operating segment level, which is the lowest level at which goodwill is monitored and assessed for internal management purposes, by comparing the carrying amount of the net assets, including goodwill, with the recoverable amount.

In 2024 and 2023, the Group assessed impairment by calculating value in use, based on estimated future financials from the operating segment. The Group uses a five-year forecast based on its business plan which is extrapolated out to a ten year time frame. Inputs include discount rate, growth rate and profitability. The discount rate used in 2024 and 2023 was 12.5% and 15.7%, respectively.

In 2024, the Group recognized an impairment charge of SEK 511m related to intangible assets, consisting of SEK 370m on certain capitalized development costs and SEK 141m from prior acquisitions.

On October 1, 2024, the Group completed the divestment of its Klarna Checkout ("KCO") operation to a consortium of investors, to which goodwill of SEK 211m was allocated using a relative value approach. See Note 39.

In 2023, the Group discontinued certain initiatives, resulting in an impairment charge of SEK 332m, consisting of SEK 130m related to goodwill and SEK 202m related to intangible assets from prior acquisitions and internally generated projects.

Note 24 Derivatives

The Group enters into derivative financial instruments to manage its interest rate and foreign exchange risk. Derivative instruments are initially and subsequently measured at fair value with changes to fair value recognized immediately within net result from financial transactions in the consolidated statement income statement. When the fair value of derivative instruments is positive, they are carried as assets and carried as liabilities when their fair value is negative.

31 Dec 2024			
	Fair value		Nominal amount
	Positive	Negative	
Derivatives designated in a hedged relationship			
Interest rate swaps	47	(15)	41,954

Total	533	(202)	38,158

Foreign exchange derivatives

Foreign exchange derivatives are not designated in a hedge accounting relationship and all have contractual maturities within four months of December 31, 2024 and 2023.

Derivatives designated in a hedge relationship

Fair value hedges

The Group holds short and medium term deposits from the public which are subject to changes in fair value due to fluctuations in the underlying interest rate benchmark, which is typically the most significant component of the overall fair value change. These short and medium term deposits are the hedged item. The Group uses interest rate swaps as the hedging instrument to reduce the impact of fair value changes in the hedged item due to changes in the underlying interest rate benchmark.

For hedges of interest rate risk, ineffectiveness arises due to mismatches of critical terms and / or the use of different curves to discount the hedged item and instrument, for example, a mismatch between the reset frequency of the swap and the benchmark frequency.

Fair value hedges: Hedging instrument and ineffectiveness	Nominal amount	Carrying amount		Change in fair value used to calculate hedge ineffectiveness	Ineffectiveness recognized in Net result from financial transactions
		Positive	Negative

Note 32 Subordinated liabilities

	31 Dec 2024	31 Dec 2023
Subordinated note, nominal value	1,853	750
Transaction expenses	(10)	(10)
Accrued interest	37	11
Total	1,880	751

On May 16, 2023, Klarna Holding AB (publ) issued SEK 500m of subordinated notes due 2033. The notes have a floating coupon rate corresponding to STIBOR 3M plus 7.5% per annum. The interest is paid on a quarterly basis. The notes were allocated to a limited number of large Nordic investors and has a first call date of May 16, 2028.

On August 16 2023, Klarna Holding AB (publ) issued SEK 250m of subordinated notes due 2033. The notes have a floating coupon rate corresponding to STIBOR 3M plus 7.5% per annum. The interest is paid on a quarterly basis. The notes were issued as a private placement and has a first call date of August 16, 2028.

On April 19, 2024, Klarna Holding AB (publ) issued USD 100m of subordinated notes due 2034. The notes have a floating coupon rate corresponding to SOFR 3M plus 7% per annum. The interest is paid on a quarterly basis. The notes were issued as a private placement and has a first call date of August 16, 2028.

For maturity analysis of financial liabilities, see Note 3 .

Note 33 Pledged assets and contingent liabilities

	31 Dec 2024	31 Dec 2023
Pledged assets		
<i>Assets pledged for own liabilities</i>		
Pledged loans to the public and credit institutions	—	2,775
Pledged treasury bills chargeable at central banks, etc., and pledged bonds and other interest-bearing securities	17	—
<i>Other pledged assets</i>	36	32
Total	53	2,807
Contingent liabilities and commitments		
<i>Commitments</i>		
Commitments for loan funding	18,256	677
Consumer refund commitment	8,574	14,747
Total	26,830	15,424

The Group's commitments for loan funding increased in 2024 compared with 2023 following a change in regulation in Norway where Klarna is required to set and communicate credit limits to Norwegian customers.

Note 34 Fair value of financial assets and liabilities

The following table shows the Group's financial assets and liabilities measured at fair value on a recurring basis and identifies which of the three valuation levels the assets and liabilities have been classified into as of December 31, 2024 and 2023. For description of the fair value levels, see Note 2. No transfers between levels have been made during 2024 or 2023.

Group 31 Dec 2024	Level 1	Level 2	Level 3	Total

Other shares and participations	—	—	172	172
Other assets (derivatives)	—	112	—	112
Other assets (receivables held for trading)	—	—	24	24
Total	—	112	196	308
Liabilities				
Other liabilities (derivatives)	—	675	—	675
Total	—	675	—	675

Group 31 Dec 2023	Level 1	Level 2	Level 3	Total
Assets				
Other shares and participations	81	—	265	345
Other assets (derivatives)	—	585	—	585
Total	81	585	265	930
Liabilities				
Other liabilities (derivatives)	—	268	—	268
Total	—	268	—	268

The Group's methodology to measure fair value of these financial assets and liabilities is presented below.

Derivatives

Derivatives fair value is estimated using third-party pricing models, which contain input parameters based on readily observable market data sources when available.

Other shares and participations

The fair value for other shares and participations is based on quoted market prices where available or valuation techniques using unobservable data.

Other shares and participations comprise investments in listed and unlisted companies. Other shares and participations fair value is based on quoted market prices where available or valuation techniques using unobservable data. Level 3 Other shares and participations represented investment in unlisted shares for which limited information was available. For these unlisted shares, the fair value is generally estimated based on cost basis unless there is an observable indicator of a difference in cost and fair value.

Other assets

Receivables held for trading refer to unsold receivables intended for offloading as part of the forward flow transaction, see Note 37 structured entities. Fair value is estimated using a discounted cash flow

model. Significant assumptions used in the valuation of the receivables held for sale include repayment rates, discount rates and loss rates.

Movements in Level 3

The following tables show a reconciliation of the opening and closing balances of Level 3 financial assets and liabilities which are recorded at fair value.

Group	Financial assets		Financial liabilities
	Other shares and participations	Other Assets	Debt securities issued
Balance as at January 1, 2023	271	—	539
Gain/loss in income statement	1	—	(211)
<i>of which: unrealized gain/loss</i>	<i>1</i>	<i>—</i>	<i>(211)</i>
Repurchase	—	—	(331)
Impact of foreign exchange movements	(8)	—	3
Balance as at December 31, 2023	265	—	—
Receivables originated as held for sale	—	34,473	—
Gain/loss in income statement	(113)	(315)	—
<i>of which: realized gain/loss</i>	<i>(113)</i>	<i>(315)</i>	<i>—</i>
Receivables held for sale sold to third parties	—	(34,135)	—
Impact of foreign exchange movements	21	1	—
Balance as at December 31, 2024	172	24	—

The other derivatives is discussed within Note 24. Fair value gains and losses recognized in the income statement are included in other income (loss).

The Group uses a range of unobservable inputs and valuation techniques such as the current interest rate, equity markets, expected future cash flows and options models to determine the fair value of Level 3 financial instruments.

Financial assets and liabilities measured at amortized cost

The following tables show the fair value of financial instruments carried at amortized cost. They do not include financial assets and financial liabilities not measured at fair value if the carrying amount approximates fair value, which includes: cash and cash equivalents, loans to credit institutions (included in debt securities), loans to credit institutions, loans to the public, other assets, prepaid expenses and accrued income, liabilities to credit institutions, other liabilities and accrued expenses and prepaid income.

Group					
31 Dec 2024	Carrying amount	Level 1	Level 2	Level 3	Fair value

Subordinated liabilities	751	—	769	—	769
Total	98,497	—	98,782	—	98,782

Treasury bills chargeable at central banks, etc., Bonds and other interest-bearing securities, and repurchase agreements within Liabilities to credit institutions are valued in terms of the active market prices.

The calculation of fair value of deposits from the public is based on Level 2 input using observable market data. Consumer deposits are grouped into maturity buckets and thereafter the net present value is calculated based on the remaining maturity and the corresponding interest rate.

Note 35 Share-based payments

This note provides an overview of the various share-based payment costs during the periods and additional information on the different equity-based programs. Certain of the equity-based instruments described below were issued by the group's subsidiaries and/or convert into ordinary shares of the group's subsidiaries.

The following table presents share-based payment costs, net of social security charges, recognized in 2024 and 2023 in the income statement.

	2024	2023
Employee restricted stock unit program	(411)	(194)
Business acquisition related awards	(13)	(40)
Share warrants and stock options	(491)	(237)
Share-based payment costs	(916)	(471)
Less: amounts recognized as reduction of commission income	14	13
Share-based payment expense	(901)	(457)

Employee restricted share unit program

Klarna's restricted share unit program (the "RSU program") was implemented in 2020. It is open to all employees as well as certain third-party contributors and entails grants of RSUs. Each participant is granted a set number of RSUs on the grant date, which generally vest over a four-year staggered vesting schedule, with 25% of the shares vesting each year. If the participant leaves Klarna, unvested RSUs are forfeited.

The number of shares distributed to employees under the RSU Program is approved by the board of directors of Klarna Holding AB (publ), and accounted for as equity-settled share-based payments. The share-based compensation expense is based on the grant-date fair value of the awards and recognized over the vesting period, in line with the graded vesting method. The fair value of the employee restricted stock unit program is based on an external valuation where input parameters include discounted cash flows, trading multiples for peers, secondary market trades and previous investment rounds.

Upon vesting, in accordance with certain countries' tax laws, the group are required to withhold an amount to settle the employee's tax associated with a share-based payment and transfer that amount in cash to taxing authorities on the employee's behalf. Such amounts are withheld from the employees in accordance with applicable laws, either through deduction of salary or withholding a number of vested shares. Upon vesting, participants retain ordinary shares in one of Klarna's subsidiaries holding an ownership interest in Klarna Bank AB (publ), reflected as non-controlling interest in the consolidated financial statements. It is intended that at a future date shareholders will have the opportunity to exchange their subsidiary company shares for Klarna Group plc shares. The number of Klarna Group plc shares to be exchanged is dependent upon the value of Klarna Group plc at the time of exchange. If such an exchange would have taken place as at the end of 2024 and 2023 the exchange yield would have been 0.02 and 0.02 shares for one subsidiary share, respectively.

Details regarding the RSU program are outlined in the table below:

Group	Restricted stock units	
	Number of RSUs	Weighted average fair value at grant SEK
January 1, 2023¹	7,988,295	63
Granted during the year	7,081,803	45
Exercised during the year	(2,411,162)	67
Forfeited during the year	(2,450,832)	54
December 31, 2023	10,208,104	52
Granted during the year	22,659,832	47
Released during the year	(3,164,977)	56
Forfeited during the year	(3,291,313)	49
December 31, 2024	26,411,646	48

Equity-related instruments granted in connection with business acquisitions

In relation to several business acquisitions in 2020, 2021 and 2022, Klarna Holding AB (publ) issued equity to acquired employees. The equity grant included a four-year vesting period and is accounted for as equity-settled share-based compensation and recognized as a post-business combination expense. When employees exited the company during the periods, the future personnel costs associated with the unvested equity were expensed in the income statement at the last day of employment. The instruments have been measured based on the fair market value of the underlying ordinary shares at the date of grant. In May, 2024, Klarna Holding AB (publ) completed a reorganization which resulted in Klarna Group plc becoming the new ultimate parent company of the group. As a result all the remaining unvested equity were expensed shares in this program were expensed.

Details regarding these instruments are outlined in the table below:

Group	Number of shares	Weighted average fair value at grant SEK
January 1, 2023	29,824	8,646
Released during the year	(2,367)	14,789
December 31, 2023	27,457	6,524
Released during the year	(27,457)	6,524
December 31, 2024	—	—

¹ The number of RSU at January 1, 2023 have been adjusted with (566,692).

Share warrants and stock options

In certain jurisdictions, the Group offers share warrants to certain individual contributors, including employees as well as executive officers and directors. Prior to 2024, these were awarded in the form of share warrants. Beginning in 2024, the Group also began granting stock options to acquire ordinary shares of Klarna Group plc. The warrants and options are subject to graded vesting over a term of typically four to five years. The awards are accounted for as equity-settled share-based payments, with the fair value determined at the grant date and expensed over the vesting period, based on the Group's estimate of the number of awards that will eventually vest. As of December 31, 2024 one share warrant entitles the recipient to purchase one ordinary share in Klarna Holding AB (publ) or a subsidiary at the agreed strike price. One stock option entitles the recipient to purchase one ordinary share in Klarna Group plc at the agreed strike price.

Certain warrants have been acquired by employees in exchange for a cash payment of the fair market value at grant date. Since pre-emption rights related to these awards transfer over a specified period they are accounted for as equity-settled share-based payments; however, no associated expense is recognized.

Klarna has granted share warrants to selected partners, including merchants and other service providers, in return for services. These arrangements are equity-settled and are accounted for as equity-settled share-based payments.

In 2024 and 2023, the group entered into commercial agreements with certain merchants under which the group granted warrants in exchange for consumer acquisition services to expand the group's user base, which Klarna determined to be distinct. The group determined the fair value of such services to be SEK 189m and SEK 62m, respectively, using the direct method for customer acquisition costs and this is recognized as share-based payments expense, included in general and administrative expenses, over the term of the commercial agreement.

The group have also granted warrants to certain merchants for non-distinct services, and the costs related to these warrants are recognized as a reduction of revenue.

Details on individual contributor and partner share warrant and option programs are outlined in the tables below:

Group	Share warrants & stock options	
	Number of warrants	Weighted average exercise price SEK
January 1, 2023	1,933,083	5,206
Granted during the year	1,102,024	6,131
Exercised during the year	(65,346)	807
Forfeited during the year	(417,518)	2,394
December 31, 2023	2,552,243	5,706
Granted during the year ²	868,935	5,448
Exercised during the year	(126,580)	1,711
Forfeited during the year	(278,719)	5,333
December 31, 2024	3,015,879	6,690

² In 2024, 400,065 options were granted with a weighted average exercise price of 5,811 per share. Of the total options granted, 179,519 vested immediately.

The range of exercise prices for warrants outstanding as of December 31, 2024 and 2023 is between SEK 1 and SEK 14,789. The weighted average remaining contractual life for warrants is 3 years and 3,5 years as of December 31, 2024 and 2023, respectively. The number of exercisable warrants is 40,000 and 51,500 as of December 31, 2024 and 2023, respectively.

The weighted average remaining contractual life for stock options was 3.7 years as of December 31, 2024. The number of exercisable stock options was 121,738 as of December 31, 2024. There were no stock options outstanding prior to the year ended December 31, 2024.

Klarna uses the Black-Scholes model when calculating the fair value of warrants and stock options granted to individual contributors, as well as certain partners when the fair value of goods and services cannot be reliably measured. The Company does not anticipate paying any cash dividends in the near future and, therefore, uses an expected dividend yield of zero in the option valuation model. The expected volatility is determined taking into consideration the historical volatility of the Company's common share and the historical volatility of comparable public companies. The risk-free rate is based on Swedish Central Bank (Sveriges Riksbank) bonds. The below table outlines the inputs used within the model:

Group	Share warrants & stock options	
	2024	2023
Expected volatility (%)	37	35-37
Risk-free interest rate (%)	2.0-2.8	2.6-3.3
Expected term (years)	2.9-4.5	2.8-5.3
Weighted average share price (SEK)	3,566	2,295

The weighted average fair value of warrants granted during the year was SEK 178 (SEK 171). The weighted average fair value of stock options granted during 2024 was SEK 1,023.

Employee Equity Program

The Group had a restricted share award program in which some employees acquired restricted shares in a group subsidiary entity that retains an ownership interest in Klarna Bank AB (publ), of which became fully vested in 2023. The restricted share awards were accounted for as an equity-settled share-based payment. The restricted shares were acquired by employees in exchange for a cash payment at fair market value, measured at the grant date, and therefore no associated expense was recognized. Upon vesting, participants retain ordinary shares in one of our subsidiaries holding an ownership interest in Klarna Bank AB (publ), reflected as non-controlling interest in the consolidated financial statements. The number of ordinary shares held in the group subsidiary entity as of December 31, 2024 and 2023 was 28,762 and 31,122 respectively. In 2024 and 2023, 2,347 and 10,693 shares held by former employees were exchanged for shares in Klarna Holding AB (publ), respectively.

It is intended that at a future date shareholders will have the opportunity to exchange their subsidiary company shares for Klarna Group plc shares. The number of Klarna Group plc shares to be exchanged includes a variable component dependent upon the value of Klarna Group at the time of the exchange. If such an exchange would have taken place as at the end of 2024 and 2023, the exchange yield would have been 6.1 and 2.8 shares for one subsidiary share, respectively.

Direct shares issuance

During 2024, the group granted 18,039 ordinary shares to certain employees. The shares were granted by the board of directors of Klarna Group plc and were accounted for as equity-settled share-based payments. The share-based compensation expense is based on grand-date fair value of the group's ordinary shares and was recognized immediately as there were no vesting conditions or restrictions placed on the awards. The weighted average fair value of the ordinary shares granted was SEK 4,491.

Note 36 Information on related parties

The following are defined as related parties, as defined by IAS 24 "Related Party Disclosures": shareholders in Klarna with significant influence, board members of Klarna, key management personnel, as well as close family members of and companies significantly influenced by such board members or key management personnel.

During the year, there have been normal business transactions between companies in the Group and agreed remuneration has been paid to the CEO, Board of Directors and other senior management personnel. The following transactions have taken place with related parties:

Milkywire was founded in 2018 by Nina Siemiatkowski, who is the spouse of Sebastian Siemiatkowski, the Groups Co-Founder and Chief Executive Officer. Klarna paid Milkywire AB SEK 7m in 2024 and SEK 10m in 2023 for sustainability-related services. In 2024, Klarna also transferred Milkywire an additional SEK 11m for purchases of carbon credits on the Group's behalf, all of which was paid to the providers of the carbon credits that the Group purchased.

Additionally, the Group donated SEK 40m in 2024 and SEK 58m in 2023 to the WRLD Foundation, where Nina Siemiatkowski serves as a board member. These arrangements were approved by the board, excluding the Chief Executive Officer.

Intragroup services are handled in accordance with the internationally recognized arm's length principle, meaning that Klarna Holding AB (publ) and its subsidiaries are remunerated or pay for intragroup services in a manner corresponding to market terms. Below table summarizes transactions with group companies with entities above Klarna Holding AB, that are not eliminated.

Related parties by type	31 Dec 2024	31 Dec 2023
<i>Related parties - revenues and expenses</i>		
Interest income	4	—
Services purchased	(188)	—
<i>Related parties - assets and liabilities</i>		
Loan receivables	232	—
Other receivables	6	—
Other liabilities	149	—

For information about transactions with the Board of Directors, CEO and senior management, see Note 11.

Note 37 Structured entities

A structured entity is an entity in which voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights may relate to administrative tasks only, with the relevant activities of the entity being directed by means of contractual arrangements.

Structured entities are generally created to achieve a narrow and well-defined objective with restrictions around their ongoing activities.

Unconsolidated structured entities

Synthetic securitizations

Klarna is not exposed to any variability in the returns of the SPVs involved in the synthetic securitization transactions. The premiums paid by Klarna are structured to mitigate, rather than introduce, variability of returns within the reference portfolio. Furthermore, Klarna is not considered the sponsor of the SPVs, as their management and operations are exclusively conducted by an independent external service provider, Intertrust.

Forward flow Securitization

During the year, the group entered into a forward flow transaction involving the sale of UK Pay Later 30 and Pay in 3 receivables to an external investor resulting in the incorporation of a securitization vehicle to house the transferred receivables, which was financed by the issuance of senior and junior notes held by third parties. The securitization vehicle does not meet the consolidation criteria as explained in the accounting principles. However, Klarna retains an interest in the vehicle due to the Group's continued involvement as servicer of the transferred receivables.

The following information pertains to the unconsolidated vehicle with regards to Klarna's total exposure to losses:

	Dec 31, 2024	Dec 31, 2023
Receivables held for sale (within other assets)	24	—
Pledged assets (within bonds and other interest bearing securities)	17	—
Total assets	41	—
Payable to SPV (within other liabilities)	161	—
Total liabilities	161	—

The maximum exposure to loss includes Klarna's role as a servicer of the transferred receivables and any potential future losses arising from repurchase obligations due to breaches of representations and warranties under Klarna's securitization and third-party sale agreements. As of December 31, 2024 the exposure related to these repurchase obligations is not considered material.

Note 38 Capital adequacy and leverage ratio

Capital adequacy regulations

Capital adequacy refers to the ability of an institution's Own Funds to cover the risk it is exposed to. Within the EU the capital adequacy requirements are contained in the Capital Requirements Directive (CRD) and Capital Requirements Regulation (CRR), both implemented in 2014. These regulations are based on the global capital adequacy standards Basel II and III, and define minimum requirements for total own funds in relation to risk-weighted exposure amounts (Pillar I), rules for the Internal Capital Adequacy Process and Internal Liquidity Adequacy Assessment Process "ICLAAP" as well as the Supervisory Review and Evaluation Process "SREP" (Pillar II), and rules for disclosures on risk, capital adequacy etc. (Pillar III).

The information about capital adequacy in this document is based on the Swedish Financial Supervisory Authority regulations (FFFS 2008:25 and FFFS 2014:12). Other disclosures required under Pillar III as well as the capital adequacy reports are published on Klarna's homepage www.klarna.com

Common Equity Tier 1 capital

Klarna Holding AB (publ) reported a CET1 capital amount of SEK 12,970m as of December 31, 2024 (SEK 11,632m).

During 2024, Common Equity Tier 1 for the consolidated situation of Klarna Holding AB (publ) increased by SEK 1,338m. The increase was mainly from 2024 profits and retained earnings (SEK 245m), movements within other reserves (SEK 509m), unrealized foreign exchange gains (SEK 426m) and an increase in share premium (SEK 215m).

Additional Tier 1 capital

On March 25, 2022 Klarna Bank AB (publ) issued SEK 276m Additional Tier 1 capital instruments. The instruments have a floating coupon rate corresponding to STIBOR 3M plus 7% per annum. The securities were offered to a limited number of large Nordic investors and the first call date is March 25, 2027.

On February 1, 2024 Klarna Holding AB (publ) issued SEK 1.5bn Additional Tier 1 capital instruments. The instruments have a floating coupon rate corresponding to STIBOR 3M plus 9.5% per annum. The securities were offered to a number of large Nordic investors and the first call date is February 1, 2029.

Subordinated liabilities

On May 16, 2023, Klarna Holding AB (publ) issued SEK 500m subordinated notes due 2033. The notes have a floating coupon rate corresponding to STIBOR 3M plus 7.5% per annum. The notes were allocated to a limited number of large Nordic investors and the first call date is May 16, 2028.

On August 16, 2023, Klarna Holding AB (publ) issued SEK 250m subordinated notes due 2033. The notes have a floating coupon rate corresponding to STIBOR 3M plus 7.5% per annum. The notes were allocated to a limited number of large Nordic investors and the first call date is August 16, 2028.

On April 19, 2024, Klarna Holding AB (publ) issued USD 100m subordinated notes due 2034. The notes have a floating coupon rate corresponding to SOFR (Index) plus 7% per annum. The notes were allocated to a limited number of large international investors and the first call date is April 19, 2029.

The three subordinated notes are eligible for inclusion as Tier 2 capital in accordance with current regulations.

Consolidated situation and methods for calculating minimum requirements

In accordance with capital adequacy regulations, the regulated consolidated situation is made up of Klarna Holding AB (publ) (Klarna Bank AB (publ)'s parent company) and its subsidiaries. All subsidiaries are fully consolidated in the Group. Klarna Bank AB (publ) is a registered bank under the supervision of the Swedish Financial Supervisory Authority (Finansinspektionen). Klarna Bank AB (publ) uses the standardized method for calculating the minimum capital requirements for credit, as well as market risk, and the alternative standardized approach for operational risk regarding Klarna Bank AB (publ) and its consolidated situation. The approval for calculating minimum capital requirement for operational risk using the alternative standardized approach was granted by the Finansinspektionen in December 2019.

Pillar II Requirements and Guidance

Pillar II requirements cover risks that are not or are insufficiently covered by Pillar I and are determined by the Swedish Financial Supervisory Authority (SFSA) as the result of its periodic Supervisory Risk Evaluation Process (SREP). From October 1, 2024, Klarna Group's Pillar II requirements were 1.16% of the risk exposure amount and Klarna Bank AB's Pillar II requirements were 1.36% of the risk exposure amount. Pillar II Guidance is the level of capital that the SFSA assesses to be a suitable level for each bank to hold to cover, for example, risks or aspects of risks and manage future stressed situations. From October 1, 2024, Klarna's Pillar II Guidance amount is set to 3.5% of the risk exposure amount.

The Internal Capital Adequacy Assessment Process and Internal Liquidity Adequacy Assessment Process (Pillar II)

The objective of the Internal Capital Adequacy Assessment Process and Internal Liquidity Adequacy Assessment Process (ICLAAP) is to ensure that Klarna clearly and correctly identifies, assesses and manages all risk to which it is exposed. The process considers the financial resources required to cover such risk, and to ensure that Klarna has access to sufficient capital and liquidity to support its business strategy over the coming planning horizon with regards to different market conditions. The main governing document for the ICLAAP is the ICLAAP policy. In this document, Klarna's board defines the responsibilities, processes and rules of the ICLAAP. The ICLAAP report is updated at least yearly.

The internally assessed capital requirement is based on the minimum capital requirement under Pillar I, the capital requirement for risks managed under Pillar II and the combined buffer requirements. The internally assessed capital required as per December 2024 amounts to SEK 11,857m (SEK 11,470m) for Klarna Bank AB (publ) and SEK 9,715m (SEK 9,074m) for the consolidated situation. Klarna thereby has sufficient capital to cover for required capital under Pillar I and Pillar II, including combined buffer requirements.

Capital Buffer Requirements

As at December 31, 2024, Klarna was subject to a Capital conservation buffer of 2.5% and to a Countercyclical capital buffer of 0.95% of the risk exposure amount for the consolidated situation, and 1.03% of the risk exposure amount for Klarna Bank AB.

Capital adequacy disclosure

Capital adequacy disclosures in accordance with the requirements in Commission Implementing Regulation (EU) No 2021/637 and the Swedish Financial Supervisory Authority (Finansinspektionen) requirements FFFS 2014:12 can be found in Klarna's Capital adequacy reports.

IFRS 9 transitional adjustments

From January 1, 2018, Klarna applied the transitional rules in accordance with article 473a of the European Union regulation no 575/2013 in order to phase in the effect on the capital when applying IFRS 9. The capital adequacy calculations are adjusted with one dynamic and two static amounts over a period spanning 5 years.

As of January 1, 2025, the phase in is complete, and Klarna's IFRS 9 components will be zero onwards.

Excess subsidiary capital deduction

In accordance with Article 85 and 87 of CRR Klarna Bank AB (publ)'s Tier 1 and Tier 2 capital can only be included in the capital base of Klarna Holding Group with the share required to cover the minimum capital requirements of Klarna Bank AB (publ). As of December 31, 2024, an amount of SEK 153m Additional Tier 1 capital instruments issued by Klarna Bank AB (publ) were included in the Own funds of Klarna Holding AB (publ) consolidated.

Note 39 Divestitures

On October 1, 2024, the Group completed the divestment of its Klarna Checkout ("KCO") operation to a consortium of investors. This transaction allows Klarna to focus on its flexible payment methods and partner more closely with payment service providers.

KCO was a shopping solution that provided consumers and merchants with a personalized shopping experience. KCO provided several different payment options as well as Klarna's proprietary products and other offerings from, or supported by, third-party payment option providers. KCO had approximately 24,000 merchants.

The Group received cash proceeds of SEK 2,065m and recognized a net gain of SEK 1,810m within other operating income in the income statement as a result of the sale in the fourth quarter of 2024.

In addition further cash proceeds up to a maximum of SEK 300m may be receivable contingent upon KCO's operation achieving certain performance criteria in 2026 and 2027. At the time of the sale and through December 31, 2024, Klarna had not recognized any additional consideration.

	1 Oct 2024
Consideration received or receivable:	
Cash	2,065
Fair value of contingent consideration receivable	—
Less: Transaction costs	(41)
Total disposal consideration	2,024
Carrying amount of net assets sold	(213)
Gain on sale before income tax	1,810
Income tax expense on gain	—
Gain on sale after income tax	1,810

The carrying amounts of net assets sold primarily consisted of goodwill of SEK 211m was allocated to KCO using a relative value approach, merchant receivables of SEK 23m, loans to credit institutions of SEK 108m, merchant liabilities of SEK 598m and provision and other accrued expenses related to payment fees, payroll, social charges among others of SEK 55m. In connection with the disposal the former eliminate intercompany receivables became external, impacting the consolidated financial net assets by SEK 501m.

Klarna determined that the operation of its KCO part of the business did not meet the criteria to be classified as discontinued operations under IFRS as it is not a major business line or a geographic area of operations and KCOs operations or cash flows have historically not been clearly distinguishable.

Note 40 Significant events after the end of the reporting period

In March 2025, Klarna entered into a commercial agreement with a global partner, pursuant to which Klarna granted 15,343,932 warrants in the group's ultimate parent company, Klarna Group plc, in exchange for certain services, with a weighted average exercise price of \$34 per warrant.

In March 2025, an internal reorganization was completed, transferring ownership of the subsidiaries Klarna Midco AB, Larkan Holding AB, and Larkan AB from Klarna Holding AB to Klarna Group plc, the ultimate parent company. As a result of this reorganization, Klarna Holding Group no longer has non-controlling interests, except for Additional Tier 1 bond holders of instruments issued in Klarna Bank AB.

Note 10 Accrued expenses

	31 Dec 2024	31 Dec 2023
Accrued expenses for consultants	76	31
Total	76	31

Note 11 Contingent liabilities

The subsidiary Klarna Bank AB (publ) continually pledges parts of its receivables as collateral for liabilities to credit institutions which provides security for the Group's credit facilities. The credit liability amounts to SEK 0m (0m) as at December 31, 2024. Klarna Holding AB (publ) acts as a guarantor for Klarna Bank AB (publ)'s outstanding liability regarding this credit facility.

Note 12 Information on related parties

The following are defined as related parties: all companies within the Klarna Group Plc Group, shareholders in Klarna Group Plc with significant influence, board members of Klarna Group Plc, Klarna Holding AB (publ) and Klarna Bank AB (publ), key management personnel, as well as close family members of and companies significantly influenced by such board members or key management personnel.

During the year, there have been normal business transactions between companies in the Group and agreed remuneration has been paid to the CEO, Board of Directors and other senior management personnel. The following transactions have taken place with related parties:

Related parties by type	31 Dec 2024	31 Dec 2023
Related parties - revenues and expenses		
Interest income	448	328
Related parties - assets and liabilities		
Loan receivables	5,184	7,225
Other receivables	1	—
Other liabilities	47	47

Intragroup services are handled in accordance with the internationally recognized arm's length principle, meaning that Klarna Holding AB (publ) and its subsidiaries are remunerated or pay for intragroup services in a manner corresponding to market terms.

For information about transactions with the board of directors, CEO and senior management, see Note 4.

Definitions and Abbreviations

Capital requirement

Total assets and off-balance sheet items, risk-weighted according to the capital adequacy rules for credit and market risk. The operational risks are measured and added as risk exposure amount.

Common Equity Tier 1 capital

Common Equity Tier 1 (CET1) capital is the highest quality regulatory capital as it absorbs losses as soon as they happen. It includes equity excluding proposed dividend, deferred taxes and intangible assets and certain other regulatory adjustments defined in Regulation (EU) No 575/2013 (CRR) and EU 241/2014.

CET1 ratio

A core measure of a bank's financial strength. This is calculated by dividing CET1 by risk exposure amounts (REAs). The higher the ratio the more reserves a bank has.

Consumer

An individual or company using our services.

Debt/equity ratio*

Average liabilities adjusted for untaxed reserves in relation to average equity adjusted for untaxed reserves. The calculation of average liabilities and average equity is based on opening and closing balances for the reporting period.

Equity/assets ratio*

Equity adjusted for untaxed reserves as a percentage of total assets at the end of the reporting period.

Gross Merchandise Volume

Value of products sold through Klarna platform.

Own funds (Total capital)

The sum of Tier 1 capital and Tier 2 capital.

Return on assets*

Net result for the last 12 months as a percentage of average total assets. The calculation of average total assets is based on opening and closing balances for the last 12 months.

Return on equity*

Operating result for the last 12 months as a percentage of average equity adjusted for untaxed reserves. The calculation of average equity is based on opening and closing balances for the last 12 months.

Restricted Stock Units

Klarna's Restricted Stock Unit Program for employees, implemented in 2020.

Risk Exposure Amount (REAs)

Risk Exposure Amount refers to the total exposure of a bank, financial institution, or any other regulated entity to potential losses. It is the sum of credit risk, operational risk, market risk and the risk of a credit valuation adjustment.

Tier 1 capital

The sum of Common Equity Tier 1 capital and Additional Tier 1 capital.

Tier 2 capital

Subordinated liabilities, which are eligible for inclusion in the total capital.

Total capital ratio

Total capital as a percentage of risk exposure amounts.

Board of Directors' affirmation

The Board of Directors and CEO certify that the annual report has been prepared in accordance with generally accepted accounting principles in Sweden and that the consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS/IAS) referred to in the European parliament and the councils' regulation (EC) 1606/2002, from July 19, 2002, on the application of International Accounting Standards. They give a true and fair view of the Parent Company's and the Group's financial position and result. It is further assured that the report of the Board of Directors gives a true and fair overview of the development of the Parent Company's and Group's business activities, financial position and results of operations as well as describes the material risks and uncertainties that the Parent Company and its subsidiaries are facing.

EU Taxonomy Statement

In accordance with the EU Taxonomy Regulation, Klarna must provide quantitative and qualitative disclosures containing:

- ▶ the proportion in its total assets of exposures to Taxonomy-eligible and Taxonomy-aligned economic activities of the two climate objectives, namely climate change mitigation and climate change adaptation;
- ▶ the proportion in its total assets of the exposures to Taxonomy-eligible economic activities of the four environmental objectives¹, namely water and marine resources, circular economy, pollution, and biodiversity;
- ▶ the proportion in its total assets of the exposures to Taxonomy-eligible economic activities related to nuclear and gas energy covered under the two climate objectives;
- ▶ contextual qualitative information that supports the quantitative disclosures.

This section of the report contains the quantitative and qualitative disclosures required for 2025, calculated on the basis of information for the Financial Year 2024². To comply with the EU Taxonomy requirements and ensure consistency between the financials in the annual report and the Taxonomy KPIs, the calculations are based on the same data used for Klarna's financial reporting under Regulation (EU) 2021/451³ (FINREP). To assess the eligibility and alignment of exposures, Klarna is often dependent on the information provided by third parties (customers, financial and non-financial counterparties). In some cases, this information is not available. Therefore, Klarna has used alternative methods and estimates, which are described below under Section 1.2.4. Assumptions and data limitations.

Quantitative information

Since January 1, 2024, the EU Taxonomy Regulation requires credit institutions to report on the Green Asset Ratio (GAR) and associated Stock and Flow KPIs as per the mandatory templates in Annex VI of the Disclosure Delegated Act⁴. This includes the eligibility of exposures for the activities covered in the Environmental Delegated Act, as well as the nuclear and gas-related activities following the templates provided in Annex XII of the Disclosure Delegated Act.

This results in the following list of mandatory templates:

- ▶ the "Summary of KPIs" template;
- ▶ the "Assets for the calculation of GAR" template that encompasses all on-balance sheet exposures;
- ▶ the "GAR – Sector information";
- ▶ the "GAR KPIs Stock";
- ▶ the "GAR KPIs Flow";
- ▶ the templates related to the eligibility of nuclear and gas-related economic activities.

These populated templates can be found in the Appendix.

As of the end of 2024, Klarna's GAR Stock, based on EU Taxonomy eligibility, accounted for 0.18% of its total covered assets for both the Turnover and Capex KPIs. The alignment figures were 0.008% for the Turnover KPI and 0.010% for the Capex KPI. These eligibility and alignment results are derived exclusively from Klarna's exposures to in-scope credit institutions, calculated in accordance with the parameters and definitions set in the Regulation. Klarna has no exposure to fossil fuels or nuclear energy-related activities, as confirmed in the Annex XII disclosure template, which includes research, construction, operation, or funding of facilities that produce electricity or heat from these sources.

¹ Reporting on the alignment for the four environmental objectives will be required starting January 1, 2026

² The KPI calculation uses counterparties' eligibility and alignment KPIs related to FY 2023 due to the lack of availability for FY 2024. This is further explained in the 'Assumptions and data limitations' section of this report

³ [EUR-Lex - 02021R0451-20240901 - EN - EUR-Lex](#)

⁴ [Delegated regulation - 2021/2178 - EN - EUR-Lex](#)

The low eligibility score (and thus alignment) results from various factors, primarily related to the limited relevance of the current scope of the EU Taxonomy for Klarna's business, particularly regarding Klarna's predominant exposures, namely households. Other factors include data constraints and materiality evaluations¹. Further elaboration on this can be found in the "Qualitative information" section of this report.

Qualitative information

Credit institutions are also required to disclose accompanying qualitative information to provide transparency and understanding of the reported metrics as set out in Annex XI of the Disclosures Delegated Act. This section provides insights into the eligibility and alignment percentages, limitations, details on changes to the mapping of exposures, and commentary on the scope of the regulation.

Scope of assets and activities covered by the GAR

The table below provides information on what is covered by each metric. The definitions correspond to those in the Disclosures Delegated Act and its Annexes, as referenced in the footnotes.

Table 1 - Description of the required exposure categories of Annex VI

Category	Description of the category
Total covered assets	Total loans and advances, debt securities, equities and repossessed collaterals and all other on-balance sheet assets on 31 December 2024 for Klarna Holding AB excluding exposures to central governments, central banks, and supranational issuers. ²
GAR – Covered assets in both the numerator and denominator	
Credit institutions	Undertaking, the business of which is to take deposits or other repayable funds from the public and to grant credits for its own account. Additionally, under the Taxonomy Regulation for credit institutions, the credit institutions must be split between European and non-European counterparties and between NFRD and non-NFRD counterparties. ³
Other financial corporations	All financial corporations and quasi-corporations, other than credit institutions, such as investment firms, investment funds, insurance companies, pension funds, collective investment undertakings, and clearing houses, as well as remaining financial intermediaries, financial auxiliaries, captive financial institutions and money lenders. Additionally, under the Taxonomy Regulation for credit institutions, the other financial corporations must be split between European and non-European counterparties and between NFRD and non-NFRD counterparties. ⁴
Non-financial undertakings	Corporations and quasi-corporations not engaged in financial intermediation but principally in the production of market goods and non-financial services. Under the Taxonomy Regulation for credit institutions, the non-financial corporations must be split between European and non-European companies and between NFRD and non-NFRD counterparties.
Households	Individuals or groups of individuals as consumers and producers of goods and non-financial services exclusively for their own final consumption, and as producers of market goods and non-financial and financial services provided that their activities are not those of quasi-corporations. Assets for the calculation of GAR according to the Disclosure Delegated Act only cover certain specified household exposures: loans collateralized by residential immovable property, building renovation loans, motor vehicle loans. ⁵
Local governments financing	Financing granted by institutions to local governments.

¹ For exposures where only high-level (not granular) information is available, a materiality assessment is conducted to assess the relevance of the potential eligibility.

² Klarna Bank AB (KBAB) is the entity holding the banking license. Thus, KBAB is the one authorized to conduct operations in compliance with the Swedish Banking and Financing Business Act (lending, accepting deposits and Forex operations). KBAB is a subsidiary of Klarna Holding AB.

³ [EUR-Lex - 02021R0451-20240901 - EN - EUR-Lex](#)

⁴ [EUR-Lex - 02021R0451-20240901 - EN - EUR-Lex](#)

⁵ https://www.eba.europa.eu/single-rule-book-qa/qna/view/publicId/2023_6780

Assets excluded from the numerator for GAR calculation (covered in the denominator)	
Non-NFRD companies	Companies that do not fall within the scope of the Non-Financial Reporting Directive (NFRD) such as SMEs and non-EU country counterparties. Since granular data is currently not available within Klarna's systems to assess whether an EU counterparty falls within the scope of the NFRD or not, it has been assumed for the present reporting period that all EU non-SMEs fall under the scope of the NFRD. This reflects a conservative approach with regards to the materiality consideration for the eligibility of covered non-financial undertakings.
Derivatives	According to EBA guidance, only derivatives not held for trading are covered under this section, and derivatives held for trading should be included in the trading book. ¹
On-demand inter-bank loans	Balances receivable on demand with credit institutions.
Cash and cash-related assets	Cash and cash equivalents.
Other assets	Other assets cover tangible assets, intangible assets, prepaid expenses, accrued income, and household exposures that are excluded from the numerator. Following the Q&A published by the European Banking Authority on 25 August, 2023, Klarna's Household exposures are not covered under the categories specified in the template. In addition, exposures to local government for which the use of proceeds are unknown are also covered in the 'Other assets' category. ²
Assets not covered for GAR calculation	
Central governments, central banks, and supranational users	Exposures to central governments, central banks, and supranational users. These exposures are not included in the total covered assets.
Trading book	All positions in financial instruments and commodities held by an institution either with the intent to trade, or in order to hedge positions held with the intent to trade as defined in point (86) of Article 4(1) of Regulation (EU) No 575/2013. As of 31 December 2024, Klarna does not have a trading book. ³
Total assets	Total loans and advances, debt securities, equities, and repossessed collaterals and all other on-balance sheet assets on 31 December 2024 for Klarna Holding AB.

Changes in the mapping of exposures compared to FY 2023

In preparation for this year's reporting, Klarna undertook a thorough review of the mapping of its exposures which are covered in the GAR calculation. This was largely driven by the publication of frequently asked questions (FAQs) and guidance documents that clarified regulatory requirements. These guidelines provided insights and interpretations of the Regulations, enabling Klarna to refine its taxonomy reporting approach. Clarifications from the Regulation have resulted in reclassifications that impact Klarna's reporting, as detailed in Table 2 below.

The updated mapping aligns with current regulatory expectations, thereby improving the transparency and reliability of the information we provide. While the previous year's reporting has also been updated in the tables to reflect these changes, and allow fair comparisons across the years, this does not alter Klarna's eligibility and alignment numbers for FY 2023.

Table 2 - Overview of the reclassification of exposures

Category of exposures	Reclassification	Rationale	Impact on the Disclosures
Households exposures	From row 24 'Households' to row 47 'Other categories of assets'.	The EBA Q&A clarifies that for retail exposures the GAR should only apply to the categories defined for credit institutions in the EU Taxonomy Regulation; namely, motor vehicle loans, loans collateralised by residential immovable property and building renovation loans. According to the Q&A, retail exposures other than the ones stated above should be included in 'Other categories of assets (e.g. goodwill, commodities, etc) and therefore are excluded from the numerator but covered in the denominator of the GAR. ¹	Retail exposures that were previously categorized under Households exposures and included in the numerator are now only accounted for in the denominator, following clarifications provided by the Regulator. This change results in a reduction, compared to the previous year, in the proportion of assets covered in the numerator of the GAR and therefore assessed for eligibility and alignment.
Non-EU counterparties	From covered in both the numerator and the denominator to covered only in the denominator.	As per Article 7(3) of Delegated Regulation (EU) 2021/2178, exposures to undertakings that are not subject to the NFRD shall be excluded from the numerator of the GAR. Since granular data is not currently available within Klarna's system to assess whether an EU counterparty falls within the scope of the NFRD, it has been assumed for the present reporting period that all EU non-SMEs fall under the scope of the NFRD. This assumption supports a conservative approach with regards to the materiality consideration for the eligibility of covered non-financial companies.	Non-EU exposures previously considered under financial undertakings and non-financial undertakings and included in the numerator and denominator are now only covered in the denominator. This change results in a reduction, compared to the previous year, in the proportion of assets covered in the numerator of the GAR and therefore assessed for eligibility and alignment.
Local government financing	From 'Other local government financing' to 'Other categories of assets'.	The European Commission (C/2024/6691) has clarified that financial instruments or lending to local governments where the use of proceeds is unknown should be excluded from the numerator of the GAR. ²	Local government exposures previously included in the numerator are only covered in the denominator. This change results in a reduction, compared to the previous year, in the proportion of assets covered in the numerator of the GAR and therefore assessed for eligibility and alignment.
Multilateral development banks (MDBs)	From 'Central governments and Supranational issuers' to 'SMEs and NFCs (other than SMEs) not subject to NFRD disclosure obligations' (for European MDBs) and 'Non-EU country counterparties not subject to NFRD disclosure obligations' (for non-European MDBs).	As per Annex V, MDBs, not being entities in scope of the NFRD, are excluded from the numerator of the GAR. Therefore, they fall under the 'Assets excluded from the numerator for GAR calculation (covered in the denominator)' category. Consequently, both types of exposures were reclassified into the most appropriate sub-category.	Exposures to MDBs, which were previously excluded from the GAR calculation (both from the numerator and denominator), are now included in the denominator, resulting in an increase in the overall denominator of the GAR.

Methodology

The key performance indicator for credit institutions under the EU Taxonomy is the Green Asset Ratio (GAR). This metric represents the proportion of the institution's exposures that are related to taxonomy-aligned activities compared to its total covered assets. The GAR categorizes the institution's main lending and investment exposures into four groups: financial undertakings, non-financial undertakings, households, and local governments.

To calculate the GAR, a structured, four-step process was applied:

- Identification and Allocation of Exposures: Allocate Klarna's exposures to counterparties in accordance with the definitions provided in Annex VI 'Table 1. Assets for the Calculation of GAR'.
- Eligibility Assessment and Calculation: Assess the eligibility of each exposure based on whether the counterparty engages in activities listed under the EU Taxonomy. Calculate taxonomy eligibility by determining the proportion of the exposure to eligible activities for each counterparty category.
- Alignment Assessment and Calculation: Reviewing alignment of eligible exposures and determining the proportion of the exposure to aligned activities for each counterparty category.
- Reporting: Consolidate and structure the calculated data into GAR templates for standardized disclosure (see Appendix for further details).

Assumptions and data limitations

Given the nuances associated with each counterparty category, a tailored approach, incorporating specific assumptions to address data limitations, was adopted for the four categories to ensure consistency with the specific requirements and technical criteria outlined in the EU Taxonomy Regulation.

Financial Undertakings

The category is assessed, both for eligibility and alignment KPIs, based on the exposure Klarna has towards the financial undertaking counterparties and their latest available eligibility and alignment reporting, which was available for the first time in 2024.

When assessing the eligibility and alignment of exposures towards financial undertakings, Klarna faced data limitations due to reliance on the most recently publicly available data. The assessment is therefore based on the previous year's (FY 2023) eligibility and alignment KPIs of the counterparties, which provides an approximate picture for the current year. Klarna depends on its counterparties' Taxonomy reporting to calculate its own eligibility and alignment KPIs. However, because FY 2024 KPIs are not yet available, Klarna's report uses the FY 2023 figures.

Non-Financial undertakings

To identify EU Taxonomy eligible exposures to non-financial undertakings, NACE industry codes are used, aligning with the EU Taxonomy's classification structure under the Climate Delegated Act and Environmental Delegated Act. At the time of assessment, only one-digit NACE codes were available in Klarna's systems, which might not accurately capture the breadth of companies' activities. Consequently, this could lead to underestimating or overestimating a counterparty's eligibility. Given the low potential for eligible exposures and the lack of granularity of data available, these exposures were not assessed for eligibility nor alignment. To address this data gap and enable more accurate future analysis, Klarna is actively developing a detailed 4-digit NACE code mapping of its non-financial counterparties.

Households

The exposures to households currently included in the GAR under the EU Taxonomy Regulation cover only three categories, namely loans collateralised by residential immovable property, building renovation loans, and motor vehicle loans. Klarna has either no exposure towards or no granular information available for these three categories of exposures. Therefore, these were not considered for eligibility or alignment.

Local governments

For the financial year 2024, Klarna's exposure to in-scope local governments amounted to zero and therefore did not present potential for eligibility. In addition, there were no local government exposures for which the use of proceeds was known. Therefore, no exposures were assessed for alignment.

Taxonomy alignment in the business strategy, product design processes, and engagement with clients and counterparties

Klarna has previously identified that its credit model has significant potential to contribute to economic activities under the transition to a Circular Economy objective, such as "5.2 Sale of spare parts", "5.4 Sale of second-hand goods," and "5.6 Marketplace for the trade of second-hand goods for reuse". However, as detailed previously, the GAR for credit institutions has so far limited eligible household exposures to three categories. These categories do not capture the potentially eligible exposures of Klarna under the Circular Economy environmental objective, as Klarna's household exposures are mostly related to retail and consumer goods.

Klarna acknowledges its role in promoting sustainability by providing consumers with more comprehensive information to help them make informed purchasing decisions. In line with this, the company is engaged in various sustainability initiatives. These include providing consumers with sustainability information about products and brands throughout the shopping journey, offering donations touch points, and encouraging second-hand shopping and reselling opportunities.

Annex

Summary of KPIs^{1,2}

		Total environmentally sustainable assets (Turnover)	Total environmentally sustainable assets (Capex)	Turnover KPI ³	Capex KPI ⁴	% coverage (over total assets) ⁵	% of assets excluded from the numerator of the GAR (Article 7(2) and (3) and Section 1.1.2. of Annex V)	% of assets excluded from the denominator of the GAR (Article 7(1) and Section 1.2.4 of Annex V)
Main KPI	Green asset ratio (GAR) stock	10,533,331	12,668,806	0.008%	0.010%	79.71%	77.86%	20.29%
		Total environmentally sustainable activities (Turnover)	Total environmentally sustainable activities (Capex)	Turnover KPI	Capex KPI	% coverage (over total assets)	% of assets excluded from the numerator of the GAR (Article 7(2) and (3) and Section 1.1.2. of Annex V)	% of assets excluded from the denominator of the GAR (Article 7(1) and Section 1.2.4 of Annex V)
Additional KPIs	GAR (flow)	310,037,295	324,970,125	4.79%	5.01%	N/A	N/A	N/A

Institutions shall disclose forward looking information for this KPIs, including information in terms of targets, together with relevant explanations on the methodology applied.

¹ Across the reporting templates: cells shaded in black should not be reported.

² Fees and Commissions (sheet 6) and Trading Book (sheet 7) KPIs shall only apply starting 2026. SMEs'inclusion in these KPI will only apply subject to a positive result of an impact assessment.

³ Based on the Turnover KPI of the counterparty.

⁴ Based on the CapEx KPI of the counterparty, except for lending activities where for general lending Turnover KPI is used.

⁵ Percentage of assets covered by the KPI over banks' total assets.

1. This template shall include information for loans and advances, debt securities and equity instruments in the banking book, towards financial corporates, non-financial corporates (NFC), including SMEs, households (including residential real estate, house renovation loans and motor vehicle loans only) and local governments/municipalities (house financing).

2. The following accounting categories of financial assets should be considered: Financial assets at amortised cost, financial assets at fair value through other comprehensive income, investments in subsidiaries, joint ventures and associates, financial assets designated at fair value through profit or loss and non-trading financial assets mandatorily at fair value through profit or loss, and real estate collaterals obtained by credit institutions by taking possession in exchange in of cancellation of debts.
3. Banks with non-EU subsidiary should provide this information separately for exposures towards non-EU counterparties. For non-EU exposures, while there are additional challenges in terms of absence of common disclosure requirements and methodology, as the EU taxonomy and the NFRD apply only at EU level, given the relevance of these exposures for those credit institutions with non-EU subsidiaries, these institutions should disclose a separate GAR for non-EU exposures, on a best effort basis, in the form of estimates and ranges, using proxies, and explaining the assumptions, caveats and limitations.
4. For motor vehicle loans, institutions shall only include those exposures generated after the date of application of the disclosure.

1. Credit institutions shall disclose in this template information on exposures in the banking book towards those sectors covered by the Taxonomy (NACE sectors 4 levels of detail), using the relevant NACE Codes on the basis of the principal activity of the counterparty
2. The counterparty NACE sector allocation shall be based exclusively on the nature of the immediate counterparty. The classification of the exposures incurred jointly by more than one obligor shall be done on the basis of the characteristics of the obligor that was the more relevant, or determinant, for the institution to grant the exposure. The distribution of jointly incurred exposures by NACE codes shall be driven by the characteristics of the more relevant or determinant obligor. Institutions shall disclose information by NACE codes with the level of disaggregation required in the template.

1. Institution shall disclose in this template the GAR KPIs on stock of loans calculated based on the data disclosed in template 1, on covered assets, and by applying the formulas proposed in this template
2. Information on the GAR (green asset ratio of 'eligible' activities) shall be accompanied with information on the proportion of total assets covered by the GAR
3. Credit institutions can, in addition to the information included in this template, show the proportion of assets funding taxonomy relevant sectors that are environmentally sustainable (Taxonomy-aligned). This information would enrich the information on the KPI on environmentally sustainable assets compared to total covered assets
4. Credit institutions shall duplicate this template for revenue based and CapEx based disclosures

Annex XII

Template 1 - Nuclear and fossil gas related activities

Nuclear energy related activities	
The undertaking carries out, funds or has exposures to research, development, demonstration and deployment of innovative electricity generation facilities that produce energy from nuclear processes with minimal waste from the fuel cycle	No
The undertaking carries out, funds or has exposures to construction and safe operation of new nuclear installations to produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production, as well as their safety upgrades, using best available technologies.	No
The undertaking carries out, funds or has exposures to safe operation of existing nuclear installations that produce electricity or process heat, including for the purposes of district heating or industrial processes such as hydrogen production from nuclear energy, as well as their safety upgrades.	No
Fossil gas related activities	
The undertaking carries out, funds or has exposures to construction or operation of electricity generation facilities that produce electricity using fossil gaseous fuels.	No
The undertaking carries out, funds or has exposures to construction, refurbishment, and operation of combined heat/cool and power generation facilities using fossil gaseous fuels.	No
The undertaking carries out, funds or has exposures to construction, refurbishment and operation of heat generation facilities that produce heat/cool using fossil gaseous fuels.	No

Auditor's report

To the general meeting of the shareholders of Klarna Holding AB, corporate identity number 556676-2356

Report on the annual accounts and consolidated accounts

Opinions

We have audited the annual accounts and consolidated accounts of Klarna Holding AB for the year 2024 except for the corporate governance report on pages 7-25. The annual accounts and consolidated accounts of the company are included on pages 1-107 in this document.

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the parent company as of 31 December 2024 and its financial performance and cash flow for the year then ended in accordance with the Annual Accounts Act. The consolidated accounts have been prepared in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies and present fairly, in all material respects, the financial position of the group as of 31 December 2024 and their financial performance and cash flow for the year then ended in accordance with IFRS Accounting Standards, as adopted by the EU, and the Annual Accounts Act for Credit Institutions and Securities Companies. Our opinions do not cover the corporate governance statement on pages 7-25. The statutory administration report is consistent with the other parts of the annual accounts and consolidated accounts.

We therefore recommend that the general meeting of shareholders adopts the income statement and balance sheet for the parent company and the group.

Our opinions in this report on the annual accounts and consolidated accounts are consistent with the content of the additional report that has been submitted to the parent company's audit committee in accordance with the Audit Regulation (537/2014) Article 11.

Basis for Opinions

We conducted our audit in accordance with International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements. This includes that, based on the best of our knowledge and belief, no prohibited services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided to the audited company or, where applicable, its parent company or its controlled companies within the EU.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Key Audit Matters

Key audit matters of the audit are those matters that, in our professional judgment, were of most significance in our audit of the annual accounts and consolidated accounts of the current period. These matters were addressed in the context of our audit of, and in forming our opinion thereon, the annual accounts and consolidated accounts as a whole, but we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Allowance for credit losses

<i>Description</i>	<i>How our audit addressed this key audit matter</i>
As described in Notes 2 and 19 to the consolidated financial statements, the recorded consumer receivables are SEK 94 billion net of allowances for expected credit losses of SEK 3.9 billion. Allowances for expected credit losses ("ECL") are based on estimated loan repayment performance and the evaluation of accumulated credit risk by product, geography, and days past due. The probability of default, magnitude of estimated loss, and expected changes in exposure are derived from historical internal and external data. Auditing the Company's allowance for ECL was complex due to the estimation uncertainty in loan repayment performance, accumulated credit risk assumptions, the automated nature of the Company's consumer receivable process, and the complexity of the models and assumptions used to calculate ECL. Significant audit effort included the involvement of specialists.	To test the Company's allowance for ECL our audit procedures included, among others, testing inputs and assumptions noted above used in model calculations such as days past due and probability of default. With the support of our specialists, we performed procedures on certain models used to determine the allowance for ECL, including, new model implementation testing, assessment of model performance, and sensitivity analyses. We have evaluated the Company's validation procedures over a sample of models, and assessed the potential impact of future economic conditions and the application of historical internal and external data by comparing realized losses to previous estimates.

Merchant fees

<i>Description</i>	<i>How our audit addressed this key audit matter</i>
As disclosed in Note 2 and 4 to the consolidated financial statements, merchant fees are derived from the volume of consumer transactions processed and a combination of value-based and fixed pricing. The transaction price is recognized at the point in time when the merchant successfully confirms the transaction, which is when the terms of the contract are fulfilled. A reduction of merchant fees to certain merchants is provided based on performance measures, including volume of processed transactions. Consideration payable to merchants that is not for a distinct good or service is recognized as a reduction to the transaction price. Auditing merchant fees is complex due to the judgment related to recognition of performance measures within certain merchant contracts.	To test the Company's merchant fees our audit procedures included, on a sample basis, reviewing and evaluating merchant contracts, including those with performance measures, testing transactions back to fixed or value-based pricing terms and recalculating merchant fees using actual transaction data. We have compared merchant fee amounts to subsequent cash settlements, tested revenue recognition by inspecting management's transaction confirmation process with merchants, and evaluated completeness by testing a sample of transactions to merchant contracts. We have tested consideration payable to merchants by vouching to contract terms.

Other Information than the annual accounts and consolidated accounts

This document also contains other information than the annual accounts and consolidated accounts and is found on pages 108-154. The Board of Directors and the Managing Director are responsible for this other information.

Our opinion on the annual accounts and consolidated accounts does not cover this other information and we do not express any form of assurance conclusion regarding this other information.

In connection with our audit of the annual accounts and consolidated accounts, our responsibility is to read the information identified above and consider whether the information is materially inconsistent with the annual accounts and consolidated accounts. In this procedure we also take into account our knowledge otherwise obtained in the audit and assess whether the information otherwise appears to be materially misstated.

If we, based on the work performed concerning this information, conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts and that they give a fair presentation in accordance with the Annual Accounts Act and, concerning the consolidated accounts, in

accordance with IFRS Accounting Standards as adopted by the EU, and the Annual Accounts Act for Credit Institutions. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts and consolidated accounts, The Board of Directors and the Managing Director are responsible for the assessment of the company's and the group's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is however not applied if the Board of Directors and the Managing Director intends to liquidate the company, to cease operations, or has no realistic alternative but to do so.

The Audit Committee shall, without prejudice to the Board of Director's responsibilities and tasks in general, among other things oversee the company's financial reporting process.

Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts and consolidated accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered

material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts and consolidated accounts.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of the company's internal control relevant to our audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors and the Managing Director.
- ▶ Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting in preparing the annual accounts and consolidated accounts. We also draw a conclusion, based on the audit evidence obtained, as to whether any material uncertainty exists related to events or conditions that may cast significant doubt on the company's and the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts and consolidated accounts or,

if such disclosures are inadequate, to modify our opinion about the annual accounts and consolidated accounts. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company and a group to cease to continue as a going concern.

- ▶ Evaluate the overall presentation, structure and content of the annual accounts and consolidated accounts, including the disclosures, and whether the annual accounts and consolidated accounts represent the underlying transactions and events in a manner that achieves fair presentation.
- ▶ Plan and perform the group audit to obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the consolidated accounts. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our opinions.

We must inform the Board of Directors of, among other matters, the planned scope and timing of the audit. We must also inform of significant audit findings during our audit, including any significant deficiencies in internal control that we identified.

We must also provide the Board of Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or related safeguards applied.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the annual accounts and consolidated accounts, including the most important assessed risks for material misstatement, and are therefore the key audit matters. We describe these matters in the auditor's report unless law or regulation precludes disclosure about the matter.

Report on other legal and regulatory requirements

Opinions

In addition to our audit of the annual accounts and consolidated accounts, we have also audited the administration of the Board of Directors and the Managing Director of Klarna Holding AB for the year 2024 and the proposed appropriations of the company's profit or loss.

We recommend to the general meeting of shareholders that the profit be appropriated in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the Managing Director be discharged from liability for the financial year.

Basis for opinions

We conducted the audit in accordance with generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the *Auditor's Responsibilities* section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a

dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's and the group's type of operations, size and risks place on the size of the parent company's and the group's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's and the group's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner. The Managing Director shall manage the ongoing administration according to the Board of Directors' guidelines and instructions and among other matters take measures that are necessary to fulfill the company's accounting in accordance with law and handle the management of assets in a reassuring manner.

Auditor's responsibility

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect:

- ▶ has undertaken any action or been guilty of any omission which can give rise to liability to the company, or

- in any other way has acted in contravention of the Companies Act, the Banking and Financing Business Act, the Annual Accounts Act, the Annual Accounts Act for Credit Institutions and Securities Companies or the Articles of Association.

Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional skepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined whether the proposal is in accordance with the Companies Act.

The auditor's examination of the corporate governance statement

The Board of Directors is responsible for that the corporate governance statement on pages 7-25 has been prepared in accordance with the Annual Accounts Act.

Our examination of the corporate governance statement is conducted in accordance with FAR's standard RevR 16 The auditor's examination of the corporate governance statement. This means that our examination of the corporate governance statement is different and substantially less in scope than an audit conducted in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. We believe that the examination has provided us with sufficient basis for our opinions.

A corporate governance statement has been prepared. Disclosures in accordance with chapter 6 section 6 the second paragraph points 2-6 of the Annual Accounts Act and chapter 7 section 31 the second paragraph the same law are consistent with the other parts of the annual accounts and consolidated accounts and are in accordance with the Annual Accounts Act.

Ernst & Young AB, Hamngatan 26, 111 47 Stockholm, was appointed auditor of Klarna Holding AB by the general meeting of the shareholders on the June 27, 2024 and has been the company's auditor since the May 26, 2016.
