Use of Non-GAAP Financial Measures

Certain information set forth in this presentation refers to financial measures determined by methods other than in accordance with GAAP. In each case, we have identified special circumstances that we consider to be non-recurring and have excluded them. We believe that this shows the impact of such events as acquisition-related purchase accounting adjustments and swap termination fees, among others we have identified in our reconciliations. Horizon believes these non-GAAP financial measures are helpful to investors and provide a greater understanding of our business and financial results without giving effect to the purchase accounting impacts and one-time costs of acquisitions and non-recurring items. These measures are not necessarily comparable to similar measures that may be presented by other companies and should not be considered in isolation or as a substitute for the related GAAP measure. See the tables and other information below and contained elsewhere in this presentation for reconciliations of the non-GAAP information identified herein and its most comparable GAAP measures.
