Network Computing readers voted Extreme Networks' Purview™ as the best new-to-market product, highlighting its differentiated capabilities that help transform the network into a strategic business asset. Purview has been deployed by a wide variety of organization including large universities, government agencies, healthcare organizations, and stadiums.

"As a first-to-market product, we are proud that loyal Network Computing readers have recognized and voted Purview as a clear standout in the industry this year," said Chris Elliott, channel director for the UK and Ireland, Extreme Networks. "As the network becomes a strategic component of the overall IT infrastructure and the enterprise, we help businesses gain the insight they need to deliver a great user experience."

Channel Partner Perspectives

Martin Jones, managing director, LAN3

"Extreme Networks' Purview provides LAN3 with a higher value proposition for our customers, enabling us to demonstrate how the network can become a strategic asset through added visibility into applications, services and users. Purview is pervasive in its reach and places valuable insight, data and actionable intelligence into the hands of the company's CIO, facilitating the optimization of IT assets. The new product award for Extreme Networks is well deserved."

Peter Cooper, sales director, Vanix

"Extreme Networks has a singular solution in Purview, serving as a competitive advantage for Vanix. Our customers can work with us to implement and customize Purview in order to gain a better understanding of the behavior, transactions and applications on their networks. The Network Computing best new product for 2015 further establishes Purview's unique place in the market, as business analytics and network visibility have become a high priority for customers across many industries."

Courtney Green, managing director, NETconnection Systems Ltd

"Network Computing readers have rightfully recognized Extreme Networks for bringing a ground-breaking analytics solution to market and for changing the way that organizations can assess and benefit from their technology investments. Analytics, stemming from both wired and wireless applications and users, are crucial to enabling successful business outcomes and Purview truly hits the mark."

Mahmood Chaudhri, managing director, Datrix Ltd.

"Success in ICT is predicated on actionable data that comes from visibility into applications, connected devices, and user behavior. Extreme Networks' Purview delivers all the critical analytics necessary for the ICT department to see what is happening in real time. The end result of Purview is an elevated role for the network in the enterprise."

Purview Timeline:

- February 2014: **Launched** as one of the industry's first network-powered analytics platforms
- February 2014: Deployed at **Super Bowl XLVIII** to measure fan experience
- September 2014: Deployed by multiple NFL teams for the 2014/15 season
- July 2014: **Awarded in US and Europe** as year's most innovative IT solution
- November 2014: **Deployed in large NHS hospitals** to improve patient care
- February 2015: **Deployed at Super Bowl XLIX** in Phoenix
- March 2015: Recognized by Network Computing as best new product of 2015
