

ChromaDex Announces Introduction of CVS Health NIAGEN(R) NR Age Defense Supplement

2015-09-09

The New Dietary Supplement Formulated to Help Support Cognitive Endurance and Energy is Available in CVS Locations

IRVINE, Calif., Sept. 9, 2015 (GLOBE NEWSWIRE) -- ChromaDex Corp. (OTCQX:CDXC), an innovator of proprietary health, wellness and nutritional ingredients that creates science-based solutions for dietary supplement, food and beverage, skin care, sports nutrition, and pharmaceutical products announced today a new dietary supplement product, NIAGEN® NR Age Defense, is now available at CVS Health stores. CVS Health is a leading pharmacy health care provider, with 7,800 retail drugstores and nearly 1,000 walk in medical clinics.

The product features ChromaDex's patented ingredient NIAGEN®, the first and only commercially available form of nicotinamide riboside (NR), a naturally occurring vitamin B3 metabolite found in milk. NIAGEN® NR Age Defense can be found at CVS locations.

Published research has shown that NR is perhaps the most effective precursor to boost the co-enzyme NAD+ in the cell. NAD+ is arguably the most important cellular co-factor for improvement of mitochondrial performance and energy. In recent years, NAD+ has been shown to be essential in supporting healthy cellular metabolism including the efficient conversion of blood glucose into energy.

As organisms age, NAD+ levels drop, which leads to a decrease in mitochondrial health; this in turn leads to age-related health issues. Low NAD+ levels limit activity of a group of enzymes called sirtuins, which are believed to play a key role in longevity. NAD+ levels also can be depleted by lifestyle choices such as overeating and lack of exercise. By boosting NAD+, NR can increase mitochondrial health and induce creation of new mitochondria.

In February 2015, ChromaDex announced the initial results of the first human clinical study for NIAGEN®

nicotinamide riboside (NR) had met its primary endpoint by demonstrating that a single dose of NR resulted in statistically significant increases in NAD+ in healthy human volunteers. The study showed for the first time a similar conversion of NR into NAD+ as has been shown in prior animal studies.

About ChromaDex:

ChromaDex leverages its complementary business units to discover, acquire, develop and commercialize patented and proprietary ingredient technologies that address the dietary supplement, food, beverage, skin care and pharmaceutical markets. In addition to our ingredient technologies unit, we also have business units focused on natural product fine chemicals (known as "phytochemicals"), chemistry and analytical testing services, and product regulatory and safety consulting (known as Spherix Consulting). As a result of our relationships with leading universities and research institutions, we are able to discover and license early stage, IP-backed ingredient technologies. We then utilize our in-house chemistry, regulatory and safety consulting business units to develop commercially viable ingredients. Our ingredient portfolio is backed with clinical and scientific research, as well as extensive IP protection. Our portfolio of patented ingredient technologies includes NIAGEN[®] nicotinamide riboside; pTeroPure[®] pterostilbene; PUREENERGY[®], a caffeine-pTeroPure[®] co-crystal; ProC3G[®], a natural black rice containing cyanidin-3-glucoside; IMMULINA[™], a spirulina extract; and Suntava[®] Purple Corn derived from a proprietary non-GMO purple corn hybrid which contains an extraordinarily high level of anthocyanins.
