### About ChromaDex:

ChromaDex leverages its complementary business units to discover, acquire, develop, and commercialize patented

and proprietary ingredient technologies that address the dietary supplement, food, beverage, skin care, and pharmaceutical markets. In addition to our ingredient technologies unit, we also have business units focused on natural product fine chemicals (known as "phytochemicals"), chemistry and analytical testing services, and product regulatory and safety consulting (known as Spherix Consulting). As a result of our relationships with leading universities and research institutions, we are able to discover and license early stage, IP-backed ingredient technologies. We then utilize our in-house chemistry, regulatory and safety consulting business units to develop commercially viable ingredients. Our ingredient portfolio is backed with clinical and scientific research, as well as extensive IP protection. Our portfolio of patented ingredient technologies includes **NIAGEN**<sup>®</sup> nicotinamide riboside; **pTeroPure**<sup>®</sup> pterostilbene; **PUREENERGY**<sup>®</sup>, a caffeine-pTeroPure<sup>®</sup> cocrystal; **ProC3G**<sup>®</sup>, a natural black rice containing cyanidin-3-glucoside; **IMMULINA**<sup>™</sup>, a spirulina extract; and Purple Corn derived from a proprietary non-GMO purple corn hybrid which contains an extraordinarily high level of anthocyanins.
