

# Niagen Bioscience Adds Olympia Pharmaceuticals to 503B Compounding Partner Network for Niagen Plus™

2026-04-28

Partnership unlocks Olympia's established clinic network for Niagen Plus, expands pharmaceutical-grade Niagen supply chain, and brings liquid compounded vials to market

LOS ANGELES--(BUSINESS WIRE)-- **Niagen Bioscience, Inc.** (NASDAQ: NAGE), the global authority on NAD+ (nicotinamide adenine dinucleotide) with a focus on the science of healthy aging, today announced a new partnership with **Olympia Pharmaceuticals**, a state-of-the-art U.S. FDA-registered 503B outsourcing facility, to compound and distribute pharmaceutical-grade Niagen® (patented nicotinamide riboside, NR) for the Company's **Niagen Plus™** intravenous and injectable products. Olympia Pharmaceuticals joins Wells Pharma of Houston, diversifying the Company's 503B network and supply chain capabilities to support continued growth across its clinic footprint and expand access to the Company's innovative Niagen Plus product pipeline.

"We anticipate that Olympia will play an important role in meeting the growing demand for Niagen IV and Niagen injections," said Rob Fried, Chief Executive Officer of Niagen Bioscience.

Under its Niagen Plus product portfolio, Niagen Bioscience developed its next-generation intravenous formulation of pharmaceutical-grade Niagen designed to support healthy aging and longevity at the cellular level. Compared to traditional NAD+ IV, the aqueous-based Niagen IV supports faster infusions and elevates NAD+ levels higher without the severe side effects of NAD+ IV (**Reyna et al., 2026; Hawkins et al., 2024**). Niagen Bioscience **recently reported** the expansion of its NAD+ precursor intellectual property (IP), with a newly granted patent covering methods of use for Niagen and its derivatives in IV and injectable formulations.

“We are honored to partner with Niagen Bioscience, a company that has set the standard for quality and scientific rigor in the NAD+ category,” said Dr. Mark Mikhael, PharmD, Chief Executive Officer of Olympia Pharmaceuticals. “Their leadership in pharmaceutical-grade Niagen and disciplined approach to innovation make them an exceptional partner, and we are proud to support growing demand for Niagen Plus with the manufacturing quality and reliability this market requires.”

Olympia Pharmaceuticals is a state-of-the-art 503B facility serving providers and patients nationwide, distinguished by its focus on quality, regulatory excellence, and premium compounded medications. Licensed across 49 states, Olympia follows cGMP (Current Good Manufacturing Practices), the same guidelines as pharmaceutical manufacturers, supports its operations with dedicated Quality and Compliance teams, and conducts rigorous third-party testing to help ensure the consistent delivery of high-quality pharmaceutical solutions.

To become a provider through Olympia Pharmaceuticals, please complete the **Olympia Intake Form**. Once the form has been submitted, a representative from Olympia Pharmaceuticals will reach out with additional information needed to create an account. For more details on the submission process, please call 407-673-2222.

## About Niagen Bioscience:

**Niagen Bioscience, Inc.** (NASDAQ: NAGE) is the global leader in NAD+ (nicotinamide adenine dinucleotide) science and healthy-aging research. As a trusted pioneer of NAD+ discoveries, Niagen Bioscience™ is dedicated to advancing healthspan through precision science and innovative NAD+-boosting solutions.

The Niagen Bioscience team, composed of world-renowned scientists, works with independent investigators from esteemed universities and research institutions around the globe to uncover the full potential of NAD+. A vital coenzyme found in every cell of the human body, NAD+ declines with age and exposure to everyday lifestyle stressors. NAD+ depletion is a key contributor to age-related changes in health and vitality.

Distinguished by state-of-the-art laboratories, rigorous scientific and quality protocols, and collaborations with leading research institutions worldwide, Niagen Bioscience sets the gold standard for research, quality, and innovation. There's a better way to age.

At the heart of its clinically proven product portfolio is Niagen® (patented nicotinamide riboside, or NR), the most

efficient, well-researched, and high-quality NAD+ booster available. Niagen powers the Company's consumer supplement, Tru Niagen®, the number one NAD+ boosting oral supplement in the United States† (available at [www.truniagen.com](http://www.truniagen.com)), and Niagen™ Plus, featuring pharmaceutical-grade intravenous (IV) and injectable Niagen products ([www.niagenplus.com](http://www.niagenplus.com)). Pharmaceutical-grade Niagen IV and injections are compounded and distributed by U.S. FDA-registered 503B outsourcing facilities and are available exclusively at clinics with a prescription.

Niagen Bioscience's robust patent portfolio protects NR and other NAD+ precursors. Niagen Bioscience maintains a website at [www.niagenbioscience.com](http://www.niagenbioscience.com), where copies of press releases, news, and financial information are regularly published.

### Forward Looking Statements:

This release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. Statements that are not a description of historical facts constitute forward-looking statements and may often, but not always, be identified by the use of such words as "expects," "anticipates," "intends," "estimates," "plans," "potential," "possible," "probable," "believes," "seeks," "may," "will," "should," "could," "predicts," "projects," "continue," "would" or the negative of such terms or other similar expressions.

Forward-looking statements are based on current expectations and assumptions and are subject to risks and uncertainties that could cause actual results to differ materially from those described. These risks and uncertainties include, but are not limited to, inflationary conditions and adverse economic conditions; our history of operating losses; the growth and profitability of our product sales; our ability to maintain and grow sales, marketing and distribution capabilities; changing consumer perceptions of our products; our reliance on a single or limited number of third-party suppliers; risks of conducting business in China; including unanticipated developments in and risks related to the Company's ability to secure adequate quantities of pharmaceutical-grade Niagen in a timely manner; the Company's ability to obtain appropriate contracts and arrangements with U.S. FDA-registered 503B outsourcing facilities required to compound and distribute pharmaceutical-grade Niagen to clinics; the Company's ability to remain on the U.S. FDA Bulk Drug Substances Nominated for Use in Compounding Under Section 503B of the Federal Food, Drug, and Cosmetic Act Category 1 list; the Company's ability to maintain and enforce the Company's existing intellectual property and obtain new patents; whether the potential benefits of NRC can be further supported; further research and development and the results of clinical trials possibly being unsuccessful or insufficient to meet applicable regulatory standards or warrant continued development; the ability to enroll sufficient numbers of subjects in clinical trials; determinations made by the FDA and other governmental authorities, including with respect to products seeking to compete in our market; mislabeling or other misleading

marketing practices by competitors; economic and market instability, including as a result of tariffs or trade conflicts; and the risks and uncertainties associated with our business and financial condition in general, described in our filings with the Securities and Exchange Commission (SEC), including, without limitation, our most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q as filed with the SEC.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and actual results may differ materially from those suggested by these forward-looking statements. All forward-looking statements are qualified in their entirety by this cautionary statement and Niagen Bioscience undertakes no obligation to revise or update this release to reflect events or circumstances after the date hereof.
