

NEWS RELEASE

Niagen Bioscience to Present at Nasdaq X LD Micro Inaugural SF Summit

2026-08-26

LOS ANGELES--(BUSINESS WIRE)-- **Niagen Bioscience, Inc.** (NASDAQ: NAGE), the global authority on NAD+ (nicotinamide adenine dinucleotide) with a focus on the science of healthy aging, today announces that senior management will participate in the Nasdaq X LD Micro Inaugural SF Summit on Wednesday, September 9, 2026, in San Francisco, CA.

Nasdaq is partnering with LD Micro to host 25 curated public companies, each delivering a 15-minute presentation to a room of institutional investors within the Nasdaq San Francisco office. Each presenting company will also participate in dedicated 15-minute breakout sessions immediately following their presentations, allowing interested investors to ask questions and engage directly with management.

Niagen Bioscience CFO, Ozan Pamir, will present at 11:20 a.m. PT, followed by a 15-minute breakout session with local institutional investors. Mr. Pamir will also be available for one-on-one meetings with institutional investors at the conference.

If you would like to schedule a one-on-one meeting with the Niagen Bioscience management team during the conference, please contact your respective conference representative or email Niagen@KCSA.com.

About Niagen Bioscience

Niagen Bioscience, Inc. (NASDAQ: NAGE) is the global authority in healthy aging and NAD+ (nicotinamide adenine dinucleotide) science. As a trusted pioneer of NAD+ discoveries, Niagen Bioscience[™] is dedicated to advancing

healthspan through precision science and innovative NAD⁺-boosting solutions.

The Niagen Bioscience team, composed of world-renowned scientists, works with independent investigators from esteemed universities and research institutions around the globe to uncover the full potential of NAD⁺. A vital coenzyme found in every cell of the human body, NAD⁺ declines with age and exposure to everyday lifestyle stressors. NAD⁺ depletion is a key contributor to age-related changes in health and vitality.

Distinguished by state-of-the-art laboratories, rigorous scientific and quality protocols, and collaborations with leading research institutions worldwide, Niagen Bioscience sets the gold standard for research, quality, and innovation. There's a better way to age.

At the heart of its clinically tested product portfolio is Niagen[®] (patented nicotinamide riboside, or NR), the most efficient, well-researched, and high-quality NAD⁺ booster available. Niagen powers the Company's consumer supplement, Tru Niagen[®], the number one NAD⁺ boosting oral supplement in the United States[†] (available at www.truniagen.com), and Niagen[™] Plus, featuring pharmaceutical-grade intravenous (IV) and injectable Niagen products (www.niagenplus.com). Pharmaceutical-grade Niagen IV and injections are compounded and distributed by U.S. FDA-registered 503B outsourcing facilities and are available exclusively at clinics with a prescription. NAD Pharmaceuticals Corp., the Company's wholly owned subsidiary focused on developing therapies for accelerated aging and rare genetic diseases, is conducting research on NB4168, a differentiated small molecule.

Niagen Bioscience's robust patent portfolio protects NR and other NAD⁺ precursors. Niagen Bioscience maintains a website at www.niagenbioscience.com, where copies of press releases, news, and financial information are regularly published.
