Comparability of Results

All figures presented in this news release are prepared under U.S. GAAP, unless noted otherwise. Adjusted figures exclude the impact of items such as purchase accounting, impairment charges, restructuring expense, foreign exchange, and certain one-time, primarily transaction-related items. Reconciliations to the most directly comparable U.S. GAAP measures are included in the tables in this news release. Constant currency changes for 2022 are calculated using the same foreign exchange rates as the corresponding 2021 period. Management uses non-GAAP financial measures to understand and compare operating results across accounting periods, for internal budgeting and forecasting purposes, and to evaluate the Company's financial performance. Management believes these non-GAAP financial measures reflect the Company's ongoing business in a manner that allows for meaningful period-to-period comparisons and analysis of business trends. These constant currency changes and non-GAAP financial measures should however be viewed in addition to, and not as an alternative for, the Company's reported results prepared in accordance with U.S. GAAP. Amounts reported in millions are computed based on amounts in thousands. Certain amounts in columns and rows within tables may not foot due to rounding. Percentages and earnings per share amounts presented are calculated from the underlying unrounded amounts.

Non-GAAP Financial Measures

Management supplements the reporting of financial information, determined under GAAP, with certain non-GAAP financial information. Management believes the non-GAAP information presented provides investors with additional useful information, but it is not intended to nor should it be considered in isolation or as a substitute for the related GAAP measures. Moreover, other companies may define non-GAAP measures differently, which limits the usefulness of these measures for comparisons with such other companies. The Company encourages investors to review its financial statements and publicly-filed reports in their entirety and not to rely on any single financial measure.

Adjusted EBITDA represents net income (loss) from continuing operations (a GAAP measure) before income taxes, interest expense, net, foreign exchange gain (loss), net, other non-operating expenses (e.g., DDI / Benson Matter provision, gains/losses on extinguishment and modifications of debt, etc.), net, depreciation, impairment losses, amortization (service revenue, purchase accounting and non-purchase accounting), restructuring expenses, stock-based compensation, litigation expense (income), and certain other non-recurring items. Other non-recurring items are infrequent in nature and are not reflective of ongoing operational activities. For the business segments, Adjusted EBITDA represents segment operating income (loss) before depreciation, amortization (service revenue, purchase accounting and non-purchase accounting), restructuring expenses, stock-based compensation, litigation expense (income) and certain other non-recurring items. Management believes that Adjusted EBITDA is useful in providing period-to-period comparisons of the results of the Company's ongoing operational performance.

Adjusted EPS represents diluted earnings per share from continuing operations (a GAAP measure), excluding the effects of foreign exchange, impairments, amortization from purchase accounting, discrete tax items, and other significant non-recurring adjustments that are not reflective of on-going operational activities (e.g., DDI / Benson Matter provision, gains/losses on extinguishment and modifications of debt, etc.). Adjusted EPS is calculated using our diluted weighted-average number of shares outstanding, including the impact of any potentially dilutive common stock equivalents that are anti-dilutive to GAAP net income (loss) per share but dilutive to Adjusted EPS. Management believes that Adjusted EPS is useful in providing period-to-period comparisons of the results of the Company's ongoing operational performance.

Net debt is a non-GAAP financial measure that represents debt (a GAAP measure, calculated as long-term obligations plus short-term borrowings) minus capitalized debt issuance costs and cash and cash

equivalents, including cash and cash equivalents held for sale. Cash and cash equivalents, including cash and cash equivalents classified as held for sale, are subtracted from the GAAP measure because they could be used to reduce the Company's debt obligations. Management believes that net debt is a useful measure to monitor leverage and evaluate the balance sheet.

Net debt leverage is a non-GAAP financial measure that represents the ratio of Net debt as of a particular balance sheet date to Adjusted EBITDA for the last twelve months ("LTM") prior to such date. Management believes that Net debt leverage is a useful measure to assess IGT's financial strength and ability to incur incremental indebtedness when making key investment decisions.

Free cash flow is a non-GAAP financial measure that represents cash flow from operations (a GAAP measure) less capital expenditures. Management believes free cash flow is a useful measure of liquidity and an additional basis for assessing IGT's ability to fund its activities, including debt service and distribution of earnings to shareholders.

Constant currency or constant FX is a non-GAAP financial measure that expresses the current financial data using the prior-year/period exchange rate (i.e., the month end exchange rates used in preparing the financial statements for the prior year). Management believes that constant currency is a useful measure to compare period-to-period results without regard to the impact of fluctuating foreign currency exchange rates.

A reconciliation of the non-GAAP measures to the corresponding amounts prepared in accordance with GAAP appears in the tables in this release. The tables provide additional information as to the items and amounts that have been excluded from the adjusted measures.
