ADTRAN Hosts 2015 ATIS PEG Conference and Leads Network Protection Engineering Education

2015-03-24

Global experts in network infrastructure, reliability and sustainability collaborate on solving challenges of providing voice, data and video services in cloud-based decentralized networks

HUNTSVILLE, Ala.--(BUSINESS WIRE)--Mar. 24, 2015-- **ADTRAN®, Inc.**, (NASDAQ: ADTN), a leading provider of next-generation networking solutions, today announced that it is hosting the annual **ATIS Protection Engineers Group (PEG) Conference** on March 24-26, 2015. The three-day event brings leading experts to ADTRAN's campus in Huntsville, Ala., for discussions on applying reliability, sustainability and protection principles and how to overcome the challenges of providing voice and video services in cloud-based decentralized networks. ADTRAN will share how it's developing innovative technologies for the market.

As new standards, products and services are developed and implemented throughout the information and communications technology (ICT) market, vendors, manufacturers and operators are forced to continuously update their technologies and educate themselves on new standards and trends. The ATIS PEG Conference serves as an interactive hub for experts to ask questions, exchange ideas and get answers as they look to expand their topical knowledge. The conference and vendor demonstrations provide a forum for experts to connect with other experts and get up-to-date insight on the latest protection engineering technologies, services, equipment and supplies from the field's most recognized and respected companies.

"ADTRAN's leadership in industry standards organizations is a collaborative effort with global leaders to tackle the challenges facing the communications industry and continuously develop innovative technologies that meet global demand," said Jay Wilson, senior vice president and general manager, ADTRAN Carrier Networks Division. "Events

like the ATIS PEG Conference bring together industry experts so that we can share best practices, discuss modern networking requirements, strengthen future products and services and better assist customers.”

By driving the advancement and approval of industry standards, ADTRAN ensures its solutions and technologies are created and tested with the appropriate criteria and needs in mind. At the ATIS PEG Conference, ADTRAN will showcase how its ADTRAN Labs engineers are addressing operators’ critical network infrastructure challenges. Event attendees will also see demonstrations of the latest approaches in reliability, sustainability and gain insights on field experiences with new techniques and technologies.

About ADTRAN

ADTRAN, Inc. is a leading global provider of networking and communications equipment. ADTRAN’s products enable voice, data, video and Internet communications across a variety of network infrastructures. ADTRAN solutions are currently in use by service providers, private enterprises, government organizations, and millions of individual users worldwide.
