Adjusted EBITDA: Adjusted EBITDA is presented as a supplemental measure of the Company's performance that management believes is useful to investors because the excluded items may vary significantly in timing or amounts and/or may obscure trends useful in evaluating and comparing the Company's operating activities across reporting periods. The Company defines adjusted EBITDA as net income attributable to the Company adjusted to eliminate the impact of depreciation and amortization, restructuring and impairment expense, net interest expense, loss on divestiture, equity in net income of non-consolidated affiliates, gain on non-consolidated affiliate transactions, provision for income taxes, discontinued operations, net income attributable to non-controlling interests, non-cash stock-based compensation expense, and other gains and losses not reflective of the Company's ongoing operations. Because not all companies use identical calculations, this presentation of adjusted EBITDA may not be comparable to similarly titled measures of other companies.

Adjusted EBITDA is not a recognized term under U.S. GAAP and does not purport to be a substitute for net income as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. Adjusted EBITDA has limitations as an analytical tool and is not intended to be a measure of cash flow available for management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. In addition, the Company uses adjusted EBITDA (i) as a factor in incentive compensation decisions, (ii) to evaluate the effectiveness of the Company's business strategies, and (iii) because the Company's credit agreements use similar measures for compliance with certain covenants.

Free Cash Flow and Adjusted Free Cash Flow: Free cash flow and adjusted free cash flow are presented as supplemental measures of the Company's liquidity that management believes are useful to investors in analyzing the Company's ability to service and repay its debt. The Company defines free cash flow as cash flow provided from operating activities less capital expenditures, including intangibles. The Company defines adjusted free cash flow as cash flow provided from operating activities less capital expenditures, including intangibles as further adjusted for restructuring related payments. Because not all companies use identical calculations, this presentation of free cash flow and adjusted free cash flow may not be comparable to other similarly titled measures of other companies.

Free cash flow and adjusted free cash flow are not recognized terms under U.S. GAAP and do not purport to be a substitute for cash flows from operating activities as a measure of liquidity. Free cash flow and adjusted free cash flow have limitations as analytical tools as they do not reflect cash used to service debt and do not reflect funds available for investment or other discretionary uses. In addition, the Company uses free cash flow and adjusted free cash flow (i) as factors in incentive compensation decisions and (ii) for planning and forecasting future periods.

Adjusted Net Income and Adjusted Earnings Per Share: Adjusted net income and adjusted earnings per share are presented as supplemental measures that management believes are useful to investors in analyzing the Company's profitability, providing comparability between periods by excluding certain items that may not be indicative of recurring business operating results. The Company believes management and investors benefit from referring to these supplemental measures in assessing company performance and when planning, forecasting and analyzing future periods. The Company defines adjusted net income as net income attributable to Visteon adjusted to eliminate the impact of restructuring and impairment, loss on divestiture, gain on non-consolidated affiliate transactions, discontinued operations, other gains and losses not reflective of the Company's ongoing operations and related tax effects. The Company defines adjusted earnings per share as adjusted net income divided by diluted shares. Because not all companies use identical calculations, this presentation of adjusted net income and adjusted earnings per share may not be comparable to other similarly titled measures of other companies.

| Adjusted earnings per share | <u>\$ 1.34</u> | <u>\$ (0.32)</u> | <u>\$ 2.42</u> | <u>\$ 0.25</u> |

Adjusted net income and adjusted earnings per share are not recognized terms under U.S. GAAP and do not purport to be a substitute for profitability. Adjusted net income and adjusted earnings per share have limitations as analytical tools as they do not consider certain restructuring and transaction-related payments and/or expenses. In addition, the Company uses adjusted net income and adjusted earnings per share for internal planning and forecasting purposes.
