# How Local Sustainability Efforts Transform the World

2024-06-25

At Visteon, we take environmental responsibility seriously, integrating **sustainable practices** throughout our operations and inspiring our teams worldwide to act. For World Environment Day, Visteon employees around the world championed a range of initiatives that showcase our commitment to a sustainable future.

## Highlights from Visteon's World Environment Day Activities

One of our most significant achievements was saving 492 KGCO<sub>2</sub>e through carpooling on June 5th. Not only did this lighten our environmental impact, but it also brought us closer together, both figuratively (working as a team) and literally (sharing the ride!).

On Kanakapura Road in Bangalore, India, our Bangalore team, along with RR Nagar I Care and the Karnataka Forest Department, planted 75 tree saplings across 2 acres as part of the Elephant Corridor Planting Project. This initiative marks a first for Bengaluru, aiming to restore the ecological balance. Moving east to Coimbatore, 35 enthusiastic Visteon volunteers partnered with a local NGO. Together, we planted 250 trees, enhancing green cover and contributing to the local ecosystem. In the meantime, further west in Pune, our team planted 55 fruit saplings, which will provide fresh fruits for the shelter residents at "Real Life Real People."

In Wuhan, China, our teams also embraced eco-friendly habits. These practices included low-carbon commuting and creative recycling initiatives, like turning plastic bottles into vases.

Similarly, Thailand saw a unique environmental initiative by our team. We launched a PET bottle recycling campaign, collecting a significant number of bottles that were then reborn as yarn for monks' robes. This not only diverted plastic waste but also created a sustainable resource for the community. Additionally, 400 trees, including valuable

teak and Siamese rosewood, were planted to enhance the local environment. To further promote sustainability, our team also conducted a dam inspection to mitigate potential landslide risks.

In Portugal, a recent initiative saw 515 trees planted in Palmela, a positive step towards restoring natural habitats. This commitment extends beyond planting, as proven by a recent beach cleanup effort.

In Sofia, Bulgaria, employees took a bee-positive stance by planting pollinator-friendly flowers. In addition, we hosted a children's drawing competition themed "The Earth, Our Home," creating environmental awareness through artistic expression.

Meanwhile, our team in Cergy, France took action for a greener future during a month-long environmental campaign. The initiative tackled multiple fronts, encouraging our colleagues to reduce plastic use, collect batteries and pharmaceuticals for safe disposal, and explore sustainable ways to get around.

Lastly, In Namestovo, Slovakia, we hosted workshops and eco-games centered around recycling and sustainability. These culminated in a fun-filled day of eco-friendly activities and sports for all ages, promoting the use of bicycles as a sustainable mode of transport.

### Leading by Example

Visteon's World Environment Day efforts are just one piece of our ongoing sustainability commitment. We are constantly seeking ways to reduce our environmental impact, including:

- Implementing energy-saving measures at our manufacturing facilities.
- Designing and developing products that are lighter, more recyclable, and use less energy throughout their lifecycle.
- Partnering with suppliers who share our commitment to environmental responsibility.

### Building a Sustainable Future Together

At Visteon, we believe that sustainability is not just a responsibility, it's an opportunity. By working together, we can create a cleaner, greener future for ourselves and generations to come.
