Visteon announce William Lau as managing director of Visteon China

2020-06-15

Shanghai, June 15, 2020 – Visteon Corporation (Nasdaq: VC), a leading supplier of vehicle cockpit electronics, recently announced William Lau’s appointment as managing director of Visteon China. He will be responsible for Visteon China strategy, product and business operation.

With more than 30 years of experience in the auto industry, Lau is an expert in air control, instrumentation, safety, autonomous driving and infotainment product electronics. He is also experienced in enterprise management. From 2016 to 2019, Lau was the general manager of Shanghai Visteon Electronics Co., and Yanfeng Visteon Investment Co., Ltd.

Before joining Visteon, Lau worked at Delphi Group as engineering executive director and telematics and ADAS managing director of their Asia Pacific electronics and safety division. He has also previously worked at Delco Electronics in the U.S., and returned to China in 1999 with Shanghai Delco Electronic Instrument R&D Center, where he was engineering director.

Enjoying a presence in the country for nearly 27 years, today China is Visteon’s fastest-growing market. Supporting its mission to enable a rich driving experience in a safe and convenient manner, Visteon is bringing advanced technologies and high-quality products to vehicle manufacturers in China. Visteon also serves the China market

through joint ventures, with 10 manufacturing facilities, four technology centers and a customer service center.
