Visteon expands India engineering operations with new technology center in Bangalore

2019-06-13

Visteon has expanded its development footprint in India with a new technology center in Bangalore, located in Pritech Park SEZ, in Bellandur Village. On June 12, the new facility was inaugurated by Visteon's Senior Vice President Matt Cole in the presence of SEZ officials, Visteon India leaders and employees.

The center will collaborate closely with Visteon's existing global technology centers and will support the company's development of advanced technologies in the areas of cybersecurity, Android-based infotainment, AUTOSAR, driver awareness systems and autonomous vehicle solutions for regional and global customer applications.

The new Bangalore technology center complements Visteon's hubs in Chennai, Pune and Goa. With capacity for 200 employees, the facility also houses a state-of-the-art lab supporting infotainment systems, audio, radiofrequency, cybersecurity and driver monitoring systems development.

Visteon has exciting opportunities available for engineers with an experience level of four to eight years in the area of Android infotainment, AUTOSAR, C++, computer vision, machine learning, artificial intelligence and security.
